Cafiero, 2014-06-24 Electra is a utopian type city and the envy of every city in the U S Its citizens enjoyed the benefits of good government and therefore lulled into complacency by its many amenities believing the good life would last forever without their participation in civic affairs and henceforth neglected their right to vote Their indifference to the political process left the door ajar for the criminal element to establish a foothold in city government Gradually the tentacles of corruption penetrated every office of city government This once great city is now degenerated into one of crime and vice with the establishment of gambling prostitution and drugs This story centers on two wealthy individuals who decided on restoring the city to its former greatness by combining their resources influence and expertise in a resourceful dangerous and questionable plan Alvin Cain came from humble origins and through his intelligence and fearless nature he became a wealthy man and the architect of a daring plan to restore Electra to respectability John Winthrop Hamilton III was born into wealth a philanthropist and the moral guide of the two men he had to be convinced that Alvin Cains method was the only viable plan that could succeed Although daring dangerous and unethical the plan was adopted *Shockwave* Michael Mathiesen, 2025-07-04 The first shockwaves have already hit our planet The next ones are going to be much bigger Shockwave author Michael Mathiesen being the creator of the latest science on the subject of Time Waves has crafted a thrilling science fiction story that is set in the future but could have happened in our past and may actually be taking place in the present The ending will shock and amaze you beyond your wildest dreams and will live on into the future for many generations to come It s actually a love story that is designed to resonate with any readers who have been in love before or who want to be in love in the future and this includes Quantum Physicists Our story demonstrates what true love is all about and how far in the past it reaches from and how it may even impact the future of the entire universe You believe you know about the force of Time but you know nothing except for the disinformation that has been served to you for the last several centuries Actually TIME is a force just like Gravity and it flows around the universe in waves just like Gravity does The author of Shockwave will win the Nobel Prize for this completely new theory of the universe that changes everything Reading this science fiction adventure story will not only entertain you but you will also become educated in how the force of Time impacts your own life This is something that rarely happens in literature and so this is a book you don t want to miss **Al's Blind Date** Constance C.
