Faces Of Intention:

Faces of Intention Michael Bratman, 1999-01-13 A collection of essays is concerned with deepening our understanding of the notion of intention

The Power of Intention Dr. Wayne W. Dyer, 2010-10-01 Intention is a force in the universe and everything and everyone is connected to this invisible force Dr Wayne W Dyer has researched intention as a force in the universe that allows the act of creation to take place This beautiful edition of Wayne s international bestseller explores intention not as something we do but as an energy we re a part of We re all intended here through the invisible power of intention a magnificent field of energy we can access to begin co creating our lives Part I deals with the principles of intention offering true stories and examples showing how to make the connection Wayne identifies the attributes of the all creating universal mind of intention as kind loving beautiful expanding endlessly abundant and receptive emphasizing the importance of emulating this source of creativity In Part II he offers an intention guide with specific ways to apply the co creating principles in daily life Part III is an exhilarating description of Wayne s vision of an individual connected at all times to the universal mind of intention

The Essential Wayne Dyer Collection Dr. Wayne W. Dyer, 2013-09-24 The 1 New York Times best selling author Wayne Dyer has been inspiring people to change their lives for many years Now three of his most fascinating books are collected in this single volume *The Power of Intention* details Wayne s research on intention as a force in the universe that allows the act of creation to take place He explains that it is not something we do but rather an energy we re a part of This is the first book to look at intention as a field of energy that we can access to begin co creating our lives *Inspiration* dissects feelings of emptiness the idea that there must be something more and trying to determine the meaning of life all evidence of a yearning to reconnect with our soul space This book explains how we ve chosen to enter this world of particles and form and each chapter is filled with specifics for living an inspired life From a very personal viewpoint Wayne offers a blueprint through the world of Spirit to inspiration our ultimate calling *Excuses Begone* reveals how to change the self defeating thinking patterns that have prevented us from living at the highest levels of success happiness and health Wayne presents many of the conscious and subconscious crutches most of us employ along with ways to cast them aside once and for all The old habituated ways of thinking will melt away as the absurdity of hanging on to them is exposed and we ultimately come to realize that there are no excuses worth defending ever *The Essential Wayne Dyer Collection* is a must read for those wanting to explore the power and potential of the human mind as well as anyone who is finally ready to live the best life possible

Shared Agency Michael Bratman, 2014 Human beings act together in characteristic ways that matter to us a great deal This book explores the conceptual metaphysical and normative foundations of such sociality It argues that appeal to the planning structures involved in our individual temporally extended agency provides substantial resources for understanding these foundations of our sociality

Face Politics Jenny Edkins, 2015-04-10 The face is central to contemporary politics In Deleuze and Guattari s work on faciality we find an assertion that the face is a particular politics

and dismantling the face is also a politics This book explores the politics of such diverse issues as images and faces in photographs and portraits expressive faces psychology and neuroscience face recognition face blindness facial injury disfigurement and face transplants through questions such as What it might mean to dismantle the face and what politics this might entail in practical terms What sort of a politics is it Is it already taking place Is it a politics that is to be desired a better politics a progressive politics The book opens up a vast field of further research that needs to be taken forward to begin to address the politics of the face more fully and to elaborate the alternative forms of personhood and politics that dismantling the face opens to view The book will be agenda setting for scholars located in the field of international politics in particular but cognate areas as well who want to pursue the implications of face politics for the crucial questions of subjectivity sovereignty and personhood

Shared and Institutional Agency Michael Bratman, 2022 Our human lives involve remarkable forms of practical organization diachronic organization of individual activity small scale organization of shared action and the organization of institutions In this book Michael Bratman argues that the key to these multiple inter related forms of human practical organization is our capacity for planning agency Drawing on earlier work on the roles of planning agency in our human cross temporal and small scale social organization it focuses on the role of planning agency within our organized institutions whether a religious congregation a small business a professional association a city council a university a non profit organization a corporation a political party a legal system or a democratic state *Shared and Institutional Agency* draws on ideas inspired by H L A Hart that our organized institutions are rule guided and that to understand this we need a theory of social rules This book develops a planning theory of social rules and puts forth an organized institution as involving authority according social rules of procedure This supports a model of organized institutions that makes room for pluralistic divergence and leads to a model of institutional intention and institutional intentional agency The view that emerges sees our capacity for planning agency as a core capacity that underlies not only string quartets and informal social rules but also the rule guided structure of organized institutions and institutional agency

Structures of Agency Michael E. Bratman, 2007-01-04 This is a collection of published and unpublished essays by distinguished philosopher Michael E Bratman of Stanford University They revolve around his influential theory known as the planning theory of intention and agency Bratman's primary concern is with what he calls strong forms of human agency including forms of human agency that are the target of our talk about self determination self government and autonomy These essays are unified and cohesive in theme and will be of interest to philosophers in ethics and metaphysics

Praxiology and the Reasons for Action Piotr Makowski, 2017-07-05 This volume explores two traditions in practical philosophy action theory which concerns the nature of motivation for human action and praxiology the study of human action By bringing different perspectives together the volume strives to contribute to the international debate on theories of reasons for action as a philosophy of action The volume consists of three main parts The first part *Reasons for Action* bridges the gap between reasons for action theories and

praxiology The second part of the volume titled Theories of Action explores philosophical approaches to action Finally in the third part Applications the contributors show several ways of applying praxiological ways of thinking and acting to the problems of reflection assessment solving action incompleteness and knowledge management The ultimate goal of this volume is to broaden the scientific view of action to establish a perspective on action that is permeated by moral theories on the one hand and accounts focused on efficiency and economy of action on the other hand This work is the newest volume in Transaction s Praxiology series

Face-to-Face Diplomacy Marcus Holmes,2018-03-08 Argues that face to face interaction undercuts the security dilemma at the interpersonal level by providing a mechanism for understanding intentions

Entrepreneurship and Digital Transformation: Managing Disruptive Innovation in a Changing Environment

Víctor Jesús García Morales,Aurora Garrido-Moreno,Nigel Lockett,Rodrigo Martín-Rojas,2022-02-02 Number Track Games Various,2002 Number Track Games are big bright and glossy Each double sided board has an illustrated unnumbered track on one side and a numbered track on the other They provide young children with five different representations of the number system helping them develop visual images and understanding of number Oxford Studies in Agency and Responsibility Volume 4 David Shoemaker,2017 Oxford Studies in Agency and Responsibility is a forum for outstanding new work in an area of vigorous and broad ranging debate in philosophy and beyond What is involved in human action Can philosophy and science illuminate debate about free will How should we answer questions about responsibility for action

Rational and Social Agency Manuel Vargas,Gideon Yaffe,2014-04-04 Michael Bratman s work has been unusually influential with significance in disciplines as diverse as philosophy computer science law and primatology This is a collection of critical essays by some of contemporary philosophy s most distinguished figures including Margaret Gilbert Richard Holton Christine Korsgaard Alfred Mele Elijah Milgram Kieran Setiya Geoffrey Sayre McCord Scott Shapiro Michael Smith J David Velleman R Jay Wallace It also contains an introduction by the editors situating Bratman s work and its broader significance The essays in this volume engage with ideas and themes prominent in Bratman s work The volume also includes a lengthy reply by Bratman that breaks new ground and deepens our understanding of the nature of action rationality and social agency

They Shimmer Within: Cognitive-Evolutionary Perspectives on Visionary Beings Bruce Rimell,2018-01-19 The use of psychedelic drugs plants is rising and with it the number of reports narrating encounters with otherworldly visionary beings Approaches to these experiences have often been literal archetypal or dismissive Evolutionary psychology and the cognitive science of religion suggest innate and non imagistic mental foundations for these phenomena arising from easily triggered evolutionary functions during emotive periods of high cognitive demand Such functions include agent detection social intelligence faculties and metacognition This wide ranging book explores how our deepest mental processes predispose us as humans to believe in supernatural agents and presents a new hypothesis of how these same cognitions facilitate the emergence of those agents to become present when psychedelic drugs and plants are ingested Bruce concludes

that visionary beings shimmer within as awe inspiring products of the mind an experience which rests at the heart of what it is to be human Reasons and Intentions Bruno Verbeek,2016-12-05 There are a number of problems in philosophy that seem to share a similar possible solution Why do promises and contracts bind Why ought citizens and judges obey the law and Can we realize the gains to be made from cooperation All three problems as well as some others share a possible solution in the form of rational internal commitment Reasons and Intentions is a state of the art overview of the relevant positions on the possibility of such commitment including critical ones The introduction provides a survey of the central problem of the volume how the will can bind itself and still be instrumental in nature and the various positions which are further examined in the contributions Addressing the question of the relation between intentions and action the considerations which make an intention rational and how this translates into our conception of moral agency this book brings together specially commissioned essays by the leading scholars in the field **Proceedings of the 3rd Annual Conference of Education and Social Sciences (ACCESS 2021)** Amrullah Amrullah,Lovy Herayanti,Tesha Sengupta-Irving,Yeo Sook Fern,Fathoroni

Planning, Time, and Self-Governance Michael E. Bratman, 2018-06-01 Our human capacity for planning agency plays central roles in the cross temporal organization of our agency in our acting and thinking together both at a time and over time and in our self governance both at a time and over time Intentions can be understood as states in such a planning system The practical thinking at the bottom of this planning capacity is guided by norms that enjoin synchronic plan consistency and means end coherence as well as forms of plan stability over time The essays in this book aim to deepen our understanding of these norms and to defend their status as norms of practical rationality for planning agents The general guidance by these planning norms has many pragmatic benefits especially given our cognitive and epistemic limits But appeal to these general pragmatic benefits does not fully explain the normative force of these norms in the particular case In response to this challenge some think these norms are at bottom norms of theoretical rationality on one s beliefs some think these norms are constitutive of intentional agency some think they are norms of interpretation and some think the idea of such norms of practical rationality is a myth These essays chart an alternative path This path sees these planning norms as tracking conditions of a planning agent s self governance both at a time and over time It seeks associated models of such self governance And it appeals to the idea that the end of one s self governance over time while not essential to intentional agency per se is within the planning framework rationally self sustaining and a keystone of a rationally stable reflective equilibrium that involves the norms of plan rationality This end is thereby in a position to play a role in our planning framework that parallels the role of a concern with quality of will within the framework of the reactive emotions as understood by Peter Strawson
