Johnstone,2001-09-05 The current era in higher education is characterized by increased need for accountability and fiscal constraint coupled with demands for increased productivity Higher education is expected to meet the demand of changing student demographics as well as requests for research and service from government and industry To preserve the academy s ability to meet these demands the editors and contributors to this volume argue that while change is inevitable and desirable any radical alterations to the practices that have established and upheld the excellence of higher education in the United States must be carefully considered The editors and contributors cherish the best ideals of higher education academic freedom commitment to both inquiry and teaching and preservation of an independence of mind and spirit in the face of external pressures At the same time the authors of these essays also reflect upon the failings of higher education including problematic historical legacies such as racism sexism and anti semitism In Defense of American Higher Education is a careful analysis of what we have inherited undertaken with a critical eye for constructive reform It will be of interest to anyone concerned about the future of American higher education

**Handbook of Research on Advancing Critical Thinking in Higher Education** Wisdom, Sherrie,Leavitt, Lynda,2015-07-17 The importance of critical thinking has surged as academics in higher education realize that many students upon entering college lack the critical thinking skills necessary to succeed While much has been written regarding the lack of critical thinking less has been written on the success of methods implemented to develop this fundamental skill The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies Due to the difficulties associated with teaching critical thinking skills to learners of any age this publication is a crucial addition to the scholarly reference works available to pre service and early career teachers seasoned educational professionals professors across disciplines curriculum specialists and educational administrators

**The Performance of Asian Higher Education** Gwilym Croucher, Chuanyi Wang, Jiale Yang, 2022-07-28 With contributions from several Asia Pacific countries this book compares performance and productivity in higher education from the perspective of institutional change Using multiple methods and datasets and including case studies from Australia Cambodia China Malaysia India and Japan the authors focus on shedding light on the efficacy of institutional policies and reforms The worldwide Gross Enrolment Ratio GER in higher education neared 40 per cent in 2020 due to the dramatic increase in enrolments in many developing economies especially in Asia This significant increase in the number of students in higher education brings great benefits but requires major ongoing investment by governments around the world This growth has followed waves of internationalization and marketization and universities are undergoing substantial change in their organization and character The goal of many institutional policies and reforms has been better performance and higher productivity Yet little is known about whether they have achieved this aim Students government officials and university leaders all have the right to ask whether the outcomes of higher education justify the costs of running the system Although increasing attention has been paid to higher education institutions management and operation the study of higher education performance and productivity is still in its relative infancy compared to other enterprises Written for students and scholars interested in higher education management and productivity this book will also appeal to government officials and university

leaders keen to know more about institutional reform and how to achieve better performance      **University Rankings** Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties      Faculty at the Margins Nancy Van Note Chism, 2008-09-16 This volume looks at faculty who are different from the traditional conception of the professor in academia by virtue of the conditions of their appointments their demographics or the tasks upon which they focus In all cases their differences put them at the margins Four chapters explore contingent contractual arrangements for faculty employment distinguishing them in four year two year and virtual university contexts Four chapters then examine the issues of historically underrepresented faculty women and people of color who are becoming a larger proportion of the total faculty population but often at slower rates and in less advantageous categories than majority members Then chapters in the final section look at faculty who choose or agree to focus on work that is not normally at the top of the institutional value scheme student learning and development and community service Positive initiatives already in progress can improve the situations and effectiveness of members of all of these groups The contributors of this volume provide a valuable resource to foster further progress in this area This is the 143rd volume of the Jossey Bass quarterly report series New Directions for Higher Education Addressed to presidents vice presidents deans and other higher education decision makers on all kinds of campuses New Directions for Higher Education provides timely information and authoritative advice about major issues and administrative problems confronting every institution      **Women in Higher Education** Ana M. Martínez Alemán, Kristen A. Renn, 2002-12-13 The only comprehensive encyclopedia on the subject of women in higher education America's first wave of feminists Susan B Anthony Elizabeth Cady Stanton and others included expanded opportunities for higher education in their Declaration of Sentiments at the first Women's Rights Convention in Seneca Falls New York in 1848 By then the first American institutions to educate women had been founded among them Mt Holyoke Seminary in 1837 However not until after the Civil War did most universities admit women and not for egalitarian purposes War casualties had caused a drop in enrollment and the states needed teachers Women students paid tuition but as teachers were paid salaries half that of men By the late 20th century there were more female than male students of higher education but women remained

underrepresented at the higher levels of educational leadership and training This volume covers everything from historical and cultural context and gender theory to women in the curriculum and as faculty and administrators     **The Finance of Higher Education** Michael B. **AAHE-ERIC/higher Education Research Report** ,1985     **Global Health Informatics Education** E.J.S. Hovenga, Evelyn J. S. Hovenga, John Mantas, 2004 Throughout the world healthcare professionals often lack knowledge of the possibilities and limitations of systematically processing data information and knowledge and of the resulting impact on quality decision making They are often asked to use information technologies of which they have limited appreciation in order to enhance their practices through better use of information resources However for systematically processing data information and knowledge in medicine and in healthcare healthcare professionals who are well trained in medical informatics or health informatics are needed It will only be through improved education of healthcare professionals and through an increase in the number of well trained workers in health and medical informatics that this lack of knowledge and associated skills can begin to be reversed Although we can recognize further progress in educating health and a considerable number of educational programs for health informatics medical informatics specialists have been set up there is still a need to enhance these educational activities world wide considering global developments as well as new curricular concepts and technological opportunities This book is especially helpful for educators in the field of health medical informatics
