Sih,Vitauts P. Tamusz,1979-03-31 The current situation with regard to the use of high performance composites is one of seeking a reliable means of characterizing the fundamental properties and or behavior of composite materials The employment of such materials in vi tal structural applications require criteria as part of the materials selection and design procedures However the principal limitation of the many currently available procedures most of which were borrowed from the metal industry is its intrinsic restriction to single phase materials They cannot adequately ac count for the variations in the constituents or structure of the composite that can have a significant influence on its gross behavior Although a considerable amount of research has been conducted in the past with the objective of under standing composite material behavior for the most part the research efforts tended to cover too wide a spectrum of problems with little penetration into the fundamental aspects For this reason the investigators in this field have long felt the need to bring together a small group of experts to review the fun damentals discuss the problem areas and display the current developments The USA USSR Sympo on the f ct e 06 Compo e Mat was organized for this purpose There is the additional need to share this information with the new comers to the field as well as the oldtimers This is accomplished by publish ing the symposium proceedings contained in the present volume A Russian trans lation of the papers in this volume will also be made available **American Society of Composites, Fourteenth International Conference Proceedings** Amer Society Composi,1999-10-25 Conference proceedings of the Fourteenth American Society for Composites held on the September 27 29 1999 at the Holiday Inn 1675 Conference Centre Fairborn Ohio *Recent Advances in Structural Joints and Repairs for Composite Materials* Liyong Tong,C.
