America Confronted by strange new animals plants and landscapes settlers in the colonies and West Indies found new ways to produce food Integrating their British and European tastes with the demands and bounty of the rugged American environment early Americans developed a range of regional cuisines From the kitchen tables of typical Puritan families to Iroquois longhouses in the backcountry and slave kitchens on southern plantations McWilliams portrays the grand variety and inventiveness that characterized colonial cuisine As colonial America grew so did its palate as interactions among European settlers Native Americans and African slaves created new dishes and attitudes about food McWilliams considers how Indian corn once thought by the colonists as fit for swine became a fixture in the colonial diet He also examines the ways in which African slaves influenced West Indian and American southern cuisine While a mania for all things British was a unifying feature of eighteenth century cuisine the colonies discovered a national beverage in domestically brewed beer which came to symbolize solidarity and loyalty to the patriotic cause in the Revolutionary era The beer and alcohol industry also instigated unprecedented trade among the colonies and further integrated colonial habits and tastes Victory in the American Revolution initiated a culinary declaration of independence prompting the antimonarchical habits of simplicity frugality and frontier ruggedness to define American cuisine McWilliams demonstrates that this was a shift not so much in new ingredients or cooking methods as in the way Americans imbued food and cuisine with values that continue to shape American attitudes to this day
