Fixed-Term Parliaments Bill Great Britain: Parliament: House of Lords: Select Committee on the Constitution, 2010-12-16 This report considers the Fixed term Parliaments Bill which would remove the Prime Minister's power to call an election at the time of his choosing and sets a five year fixed term subject to the possibility of early dissolution following a vote by the House of Commons It examines the key issues of the Bill's principals as well as the process by which it was brought forward The Committee takes the view that the origins and content of the Bill owe more to short term considerations than to a mature assessment of enduring constitutional principles or sustained public demand In the view of the majority of the Committee the shift from a five year maximum to five year norm would be inconsistent with the Government's stated aim of making the legislature more accountable with existing constitutional practice and with the practice of the devolved institutions and the clear majority in international legislatures However the Committee does accept that an elected government should have a full term in which to develop their policies and take their legislative programme through Parliament It considers a four year term should be adopted for any fixed term arrangement at Westminster Potential date clashes with elections to the devolved institutions should also be avoided Some form of safety valve which would allow for an early election in circumstances such as the government losing the confidence of the Commons or where a political or economic crisis has affected the country is also necessary The report also makes several specific recommendations for amendments for the Bill Competition and Consumer Act Australia, 2015-11-25 COMPETITION AND CONSUMER ACT No 51 of 1974 as amended 3 An Act relating to competition fair trading and consumer protection and for other purposes
