Communicating Process Architectures 2004 Ian East,J. Martin,P.H. Welch,2004 Communicating Process Architecture CPA describes an approach to system development that is process oriented It makes no great distinction between hardware and software It has a major root in the theory of Communicating Sequential Processes CSP However the underlying theory is not limited to CSP The importance of mobility of both channel and process within a network sees integration with ideas from the calculus Other formalisms are also exploited such as BSP and MPI The focus is on sound methods for the engineering of significant concurrent systems including those that are distributed across the Internet or within a single chip and or software scheduled on a single execution unit Traditionally at CPA the emphasis has been on theory and practice developing and applying tools based upon CSP and related theories to build high integrity systems of significant size In particular interest focuses on achieving scalability and security against error The development of Java C and C libraries to facilitate secure concurrent programming using mainstream languages has allowed CPA to continue and proliferate This work continues in support of the engineering of distributed applications Recently there has been greater reference to theory and its more direct application to programming systems and languages In this volume the formal CSP is very well presented The papers provide a healthy mixture of the academic and commercial software and hardware application and infrastructure which reflects the nature of the discipline *Technology of Object-Oriented Languages, Systems and Architectures* Theo D'Hondt,2012-12-06 The TOOLS EE Technology of Object Oriented Languages and Systems Eastern Europe conference series combines the experience with object technology and its applications in industrial environments with an academically oriented vision They offer a meeting place for Eastern European experts and practitioners and their colleagues from all over the world Technology of Object Oriented Languages Systems and

Architectures is a compilation of contributing papers presented at TOOLS Eastern Europe 2000 and 2002 respectively second and third conference in this series Both conferences were held in Eastern Europe more specifically in Sofia Bulgaria Technology of Object Oriented Languages Systems and Architectures is designed to meet the needs of a professional audience composed of in computer science and engineering
