**Making Strategy Work** Lawrence G. Hrebiniak, 2005-01-05 Without effective execution, no business strategy can succeed. Unfortunately, most managers know far more about developing strategy than about executing it and overcoming the difficult political and organizational obstacles that stand in their way. In this book, leading consultant and Wharton professor Lawrence Hrebiniak offers the first comprehensive disciplined process model for making strategy work in the real world. Drawing on his unsurpassed experience, Hrebiniak shows why execution is even more important than many senior executives realize and sheds powerful new light on why businesses fail to deliver on even their most promising strategies. Next, he offers a systematic roadmap for execution that encompasses every key success factor: organizational structure, coordination, information sharing, incentives, controls, change management, culture, and the role of power and influence in your business. **Making Strategy Work** concludes with a start to finish case study showing how to use Hrebiniak's ideas to address one of today's most difficult business execution challenges: ensuring the success of a merger or acquisition.      **Managing**

**Krishna's Industrial Economics & Principles of Management ,      The Nature of Organizational Leadership**

Stephen J. Zaccaro, Richard J. Klimoski, 2002-02-28. The quality of an organization's top leaders is a critical influence on its overall effectiveness and continuing adaptability. Yet little current research examines leadership within the context of organizational structure such as how leaders influence organizational performance in those key moments when an executive's action is critical to driving the organization forward. This book represents a significant contribution to the literature of leadership, combining a contextual approach to organizational leadership with an in-depth treatment of the cognitive, social and affective dynamics underlying that leadership. *The Nature of Organizational Leadership* using an interdisciplinary approach that draws from the work of scholars in both management and psychology provides a much needed organizational perspective on the problems confronted by top executive leaders and the requisite behaviors, attributes and outcomes necessary to lead organizations effectively.
