Idolatry and Representation Leora Batnitzky,2009-07-06 Although Franz Rosenzweig is arguably the most important Jewish philosopher of the twentieth century his thought remains little understood Here Leora Batnitzky argues that Rosenzweig s redirection of German Jewish ethical monotheism anticipates and challenges contemporary trends in religious studies ethics philosophy anthropology theology and biblical studies This text which captures the hermeneutical movement of

Rosenzweig's corpus is the first to consider the full import of the cultural criticism articulated in his writings on the modern meanings of art language ethics and national identity. In the process the book solves significant conundrums about Rosenzweig's relation to German idealism to other major Jewish thinkers to Jewish political life and to Christianity and brings Rosenzweig into conversation with key contemporary thinkers. Drawing on Rosenzweig's view that Judaism's ban on idolatry is the crucial intellectual and spiritual resource available to respond to the social implications of human finitude, Batnitzky interrogates idolatry as a modern possibility. Her analysis speaks not only to the question of Judaism's relationship to modernity and vice versa but also to the generic question of the present's relationship to the past, a subject of great importance to anyone contemplating the modern statuses of religious tradition, reason, science and historical inquiry. By way of Rosenzweig, Batnitzky argues that contemporary philosophers and ethicists must relearn their approaches to religious traditions and texts to address today's central ethical problems.

Eventful Cities Greg Richards, Robert Palmer, 2012-05-31 Processes of globalization, economic restructuring and urban redevelopment have placed events at the centre of strategies for change in cities. Events offer the potential to achieve economic, social, cultural and environmental outcomes within broader urban development strategies. This volume analyzes the process of cultural event development, management and marketing and links these processes to their wider cultural, social and economic context. It provides a unique blend of practical and academic analysis with a selection of major events and festivals in cities where eventfulness has been an important element of development strategy. It examines the reasons why different stakeholders should collaborate as well as the reasons why cities succeed or fail to develop events and become eventful. *Eventful Cities* evaluates theoretical perspectives and links theory and practice through case studies of cities and events across the world. Critical success factors are identified which can help to guide cities and regions to develop event strategies. This book is essential reading for any undergraduate or graduate student and all practitioners and policy makers involved in event management, cultural management, arts administration, urban studies, cultural studies and tourism.
