*The Viability of the Rhetorical Tradition* Richard Graff, Arthur E. Walzer, Janet M. Atwill, 2012-02-01 *The Viability of the Rhetorical Tradition* reconsiders the relationship between rhetorical theory practice and pedagogy Continuing the line of questioning begun in the 1980s contributors examine the duality of a rhetorical canon in determining if past practice can make us more or less able to address contemporary

concerns Also examined is the role of tradition as a limiting or inspiring force rhetoric as a discipline rhetoric s contribution to interest in civic education and citizenship and the possibilities digital media offer to scholars of rhetoric

**Handbook of Linguistic Annotation** Nancy Ide,James Pustejovsky,2017-06-16 This handbook offers a thorough treatment of the science of linguistic annotation Leaders in the field guide the reader through the process of modeling creating an annotation language building a corpus and evaluating it for correctness Essential reading for both computer scientists and linguistic researchers Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications Part one of this book covers all phases of the linguistic annotation process from annotation scheme design and choice of representation format through both the manual and automatic annotation process evaluation and iterative improvement of annotation accuracy The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types including morpho syntactic tagging syntactic analyses a range of semantic analyses semantic roles named entities sentiment and opinion time and event and spatial analyses and discourse level analyses including discourse structure co reference etc Each case study addresses the various phases and processes discussed in the chapters of part one

**Multilingual Norms** Madalena Cruz-Ferreira,2010 Multilinguals are not multiple monolinguals Yet multilingual assessment proceeds through monolingual norms as if fair conclusions were possible in the absence of fair comparison In addition multilingualism concerns what people do with language not what languages do to people Yet research focus remains on multilinguals languages as if languages existed despite their users This book redresses these paradoxes Multilingual scholars teachers and speech language clinicians from Europe Asia Australia and the US contribute the first studies dedicated to multilingual norms those found in real life multilingual development assessment and use Readership includes educators clinicians decision makers and researchers interested in multilingualism

**Cross-Linguistic Study of Acquired Reading Disorders** Prathibha Karanth,2012-12-06 The acquisition ofreading the teaching ofreading and the difficulties encountered have been ofsubstantial interest to a wide mnge ofresearchers and practitioners for centuries Given the increasing centrality ofliteracy in modern life they are now of even greater interest to an ever widening base ofprofessionals The study of the acquired reading disorders though in existence for over a century received enormous impetus with the publication of a seminal paper by Marshall and Newcombe in 1966 leading to neuropsychological model building of reading Over the last 30 years within the single case study design there has been extensive and exceedingly fme gmined research on individuals with acquired disorders ofreading in an attempt to establish the validity ofthese models ofreading and the human brain In addition these models have had considerable influence on models of the acquisition ofreading in children and their concomitant difficulties Much ofthis research has been in readers ofthe alphabetic scripts particularly the opaque English script During the last decade or so there has been increasing evidence particularly in research on reading acquisition that what is true ofalphabetic

scripts like English may not be universally true of all of the scripts of the world This has led to considerable research into the process of learning to read and write and on the factors affecting reading which are the touchstone of the models within broader cross linguistic and cross cultural perspectives *Communication Disorders in Spanish Speakers* José G. Centeno, Raquel Teresa Anderson, Loraine K. Obler, 2007 This book bridges the gap in the literature on Hispanic individuals for student clinicians and professionals in Speech Language Pathology Speech Therapy It links empirical and theoretical bases to evidence based practices for child and adult Spanish users This volume provides both students and licensed professionals in speech language pathology much needed multidisciplinary bases to implement clinical services with Spanish speakers Researchers and practitioners from Speech Language Pathology Neurolinguistics Neuropsychology Education and Clinical Psychology provide theoretical and empirical grounds to develop evidence based clinical procedures for monolingual Spanish and bilingual Spanish English children and adults with communication disorders **The Psychologist**, 1997

*Folia Phoniatica Et Logopaedica*, 1996 **Hua Jen Hsin Li Hsüeh Pao**, 2001 *Speech and Language Disorders Associated with Subcortical Pathology* Bruce E. Murdoch, 2009-03-25 This book provides comprehensive coverage of speech and language disorders arising from pathological processes involving the subcortical structures of the brain It gives an understanding of these disorders in terms of their neuropathological basis clinical symptomatology and prognosis A full discussion of contemporary models and theories of subcortical participation in speech and language processing is given including discussion of the possible roles of structures such as the basal ganglia subthalamic nucleus thalamus and cerebellum The book covers speech and language disorders associated with a variety of subcortical conditions ranging from major degenerative conditions such as Parkinsons Disease Huntingtons chorea and dystonia through to acquired non degenerative subcortical lesions arising from for example cerebrovascular accidents and stereotactic surgically induced lesions In addition a full description of the relevant assessment and treatment procedures currently recommended for use for each of the subcortical communication disorders is given **Research on Child Language Acquisition** International Congress for the Study of Child Language. Conference, 2001 *The Social Psychology of Communication Impairments* Shelagh Brumfitt, 1999-12-16 The study of communication impairment has up until now failed to include the influence of both social and health psychology in its core understanding of the problem The discipline of neuropsychology has given remarkable insights into language impairments yet we have little knowledge about what influences the behaviour of people with language impairments This book is intended to redress the balance in order to recognise the importance of social behaviour in the complexity of the communication problem by exploring the aspects of social and health psychology which are relevant to the communicatively impaired speaker and looking at ways in which we can understand their predicament more fully **Handbook on Children's Speech** Raymond D. Kent, 2023-11-08 Written by renowned basic and clinical scientist Raymond D Kent the Handbook on Childrens Speech Development Disorders and Variations provides

comprehensive and systematic coverage of the topic of how speech develops and how it can be disordered or otherwise a departure from typical patterns of a mainstream dialect The book emphasizes relevant biology and psychology of speech development contemporary models of spoken language typical speech development bilingualism and dialect motor learning and motor control clinical assessments of articulation phonology voice prosody and intelligibility populations in which speech disorders and differences often occur and methods and strategies for prevention and treatment The Handbook covers both speech development and pediatric speech disorders focusing on the ages of birth to puberty Because speech disorders in children occur against a complex developmental background the understanding of these disorders requires knowledge about how speech develops and how it is affected in children with disorders or with exposure to languages other than American English A major theme of the book is that speech development is a constructive goal directed phenomenon that weaves together several different processes having their own individual trajectories that generally reach maturity only in puberty or adolescence For clinicians researchers and students this book will serve as a valuable compendium of the many different tools and methods that have been developed to study speech development in diverse populations and to assess and treat speech disorders and variations

**Differential Diagnosis and Treatment of Children with Speech Disorder** Barbara Dodd, 2013-05-30 Paediatric speech and language therapists are challenged by diminished resources and increasingly complex caseloads The new edition addresses their concerns Norms for speech development are given differentiating between the emergence of the ability to produce speech sounds articulation and typical developmental error patterns phonology The incidence of speech disorders is described for one UK service providing crucial information for service management The efficacy of service provision is evaluated to show that differential diagnosis and treatment is effective for children with disordered speech Exploration of that data provides implications for prioritising case loads The relationship between speech and language disorders is examined in the context of clinical decisions about what to target in therapy New chapters provide detailed intervention programmes for subgroups of speech disorder delayed development use of atypical error patterns inconsistent errors and development verbal dyspraxia The final section of the book deals with special populations children with cognitive impairment hearing and auditory processing difficulties The needs of clinicians working with bilingual populations are discussed and ways of intervention described The final chapter examines the relationship between spoken and written disorders of phonology

**The Oxford Handbook of Aphasia and Language Disorders** Anastasia M. Raymer, Leslie J. Gonzalez Rothi, 2018 The Oxford Handbook of Aphasia and Language Disorders integrates neural and cognitive perspectives providing a comprehensive overview of the complex language and communication impairments that arise in individuals with acquired brain damage The volume also describes theoretically motivated and evidence based methods for assessment and treatment of those impairments
