

Types of Evaluation Research

- outcome evaluations investigate whether the program or technology caused demonstrable effects on specifically defined target outcomes
- impact evaluation is broader and assesses the overall or net effects -- intended or unintended -- of the program or technology *as a whole*
 - *i.e. – it did this, but it also did that*
- cost-effectiveness and cost-benefit analysis address questions of efficiency by standardizing outcomes in terms of
 - dollar costs and values
 - “social costs” – we reduced hospitalizations but increased incarcerations
 - “opportunity costs” – because we did “A” we couldn’t do “B”
- secondary analysis reexamines existing data to address new questions or use methods not previously employed –
 - can be used to do all of the above relatively inexpensively
