

A dramatic, apocalyptic scene featuring a shipwrecked vessel on a rocky shore. A lone figure stands on the debris, looking out at a massive, turbulent wave of water. The sky is dark and filled with several large, glowing meteors falling towards the horizon. The word "SURVIVE" is prominently displayed in large, white, block letters across the center of the image.

Constructivism and Classical Aristotelianism fall short He demonstrates why the objects of scientific knowledge need to be not located in space or time if they are to do the explanatory work scientists need them to do The result is a contemporary version of Platonism that provides us with the best way to explain what the objects of scientific understanding are and how those non spatiotemporal things relate to the spatiotemporal things of scientific experiments as well as everything around us including even ourselves
