**The European Union in the Asia-Pacific** Weiqing Song, Jianwei Wang, 2019-02-20 Since the mid 1990s the European Union has defined the Asia Pacific as one of its key strategic targets on its ambitious road towards a global power Over the past decades big changes have taken place on both sides and the wider world It's high time to evaluate the EU's performance in its Asian policy In fact the EU is at crossroads with its Asia Pacific policy On several aspects the EU is compelled to redefine its interests and roles and rethink its strategies and policies towards the dynamic and ever important Asia Pacific region This volume addresses this theme by elaborating the general context major issues and countries in the EU's Asia Pacific policy It covers issue areas of traditional security economy and trade public diplomacy and human security and focuses on the EU's relations with China Japan the ASEAN countries and Australasia *The European Union as a Global Actor* Charlotte Bretherton, John Vogler, 2002-06-01 First published in 2002 Routledge is an imprint of Taylor Francis an informa company **A New World-System** Donald G. Reid, 2020-11-18 A New World System From Chaos to Sustainability examines the present crisis in the social and ecological environment that is producing profound potentially catastrophic challenges to the planet and humanity and outlines a process for moving forward to address these critical issues This book is a cautionary interpretation of the present and vision for the future Unlike other books on this or allied subjects that are focused singularly Part 1 surveys the five major threats facing humanity today climate change inequality and poverty new technologies migration and globalization It approaches the challenge of integrating these phenomena into a global picture from a systems perspective rather than taking a purely reductionist approach to understanding what is occurring in the

world today Part 2 moves from identifying the problems to solving them with chapters examining the ability of the present world system to address these issues and outlining a process for action The book concludes by discussing what could follow capitalism as a social organizing strategy and perhaps more importantly the consequences to the planet if we do not construct a new world system This book is essential reading for students and scholars of sustainable development climate change environmental studies rural and urban planning environmental psychology political economy sociology social policy leisure studies and environmental politics More broadly it is a vital resource for all those interested in building a sustainable society

**Perspective** Manuela Boatca,Andrea Komlosy,Hans-Heinrich Nolte,2017-09-22 During its 500 year history the modern world system has seen several shifts in hegemony Yet since the decline of the U S in the 1970s no single core power has attained a hegemonic position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue dur e of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe s Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them      *WORLD SYSTEM HISTORY-Volume I* George Modelski and Robert A. **Regions** Robert Gwynne, Denis Shaw, Thomas Klak, 2014-05-12 This book aims to examine the effects of globalization and economic and political transformations in those parts of the world which are now regularly referred to as emerging regions. These are Latin America and the Caribbean, East Central Europe and the former Soviet Union and East Asia. This book breaks new ground in three areas. First of all it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory. Secondly it explores the development trajectories and challenges of countries in this so called emerging world countries that will be crucial to the evolution of the world economy in the twenty first century. Thirdly it compares and contrasts the pathways of both economic and political change in the three world regions under focus. This is a unique approach in terms of books published in both geography and the social sciences. Within the context of the three world regions the book combines historical and contemporary analysis of the evolving world system. In these regions we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production, exchange and regulation are evolving. The authors believe that at the present time these processes have produced alternative capitalisms, economic and associated developments which while assuredly capitalist differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe. **Understanding**

**the European Union** John McCormick, 2020-11-13 This is the must have introduction to the European Union. Offering a primer on the EU's history, institutions and politics, this concise textbook also covers the various challenges and opportunities faced by the EU from the democratic deficit and the potential of future enlargement to the spread of nationalism and crises such as Brexit and the impact of the global pandemic. Understanding the European Union is now more crucial than ever and this text provides a succinct but nuanced account of its development and how it works. This book will be the ideal guide for all undergraduate and postgraduate courses in political science, global affairs and European studies. It is also a suitable starting point for anyone seeking to learn more about the EU. New to this Edition: A number of key themes and issues run throughout the book including past and ongoing crises facing the EU, the EU's place within the broader international system, a focus on the EU's comparative political, social and economic context, the confederal qualities of the EU and Brexit. Addresses the early impact of the global pandemic on the EU. Greater use of maps, figures, tables and boxes where useful to inform the analysis. Accompanied by up to date further reading. Informed throughout by sophisticated yet accessible treatment of theory including post functionalism and critical perspectives. Cutting edge coverage of Brexit and negotiations around withdrawal. **The**

**New World Architecture** Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill. It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations. After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s. With respect to its international role, reorganization of the

EU's external relations department was high on the list. The New World Architecture explores the contribution that the European Union is making to the emerging global governance system. It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems. It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system. None of these is complete; all are partial. They include the political regime of governance, the socioeconomic regime of governance, and the territorial regime of governance. The author assesses the impact of the European Union on global politics. The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation. Magone argues that within the next twenty-five years, global governance may and should emerge as the new and reconfigured stable system of international relations. In this system, the European Union is and will remain the most advanced regional system. This volume will be of interest to specialists, scholars, and students of European Politics and the European Union. **Rethinking the European Union** Alice Landau, Richard Whitman, 2016-07-27

**Rethinking the European Union** draws together contributors from across Europe to reflect upon methods of conceptualising the European Union within both changing global and European contexts. The book takes the themes of institutions, interests, and identities as its organising framework within which each contributor offers a distinctive commentary on the EU. The outcome is a text that goes beyond an exploration of the existing methods of conceptualising the European integration process and reflects upon the nature of the EU itself. **Contemporary Issues and Debates in EU Policy** Vassiliki N. Koutrakou, 2004. An exploration of the European Union with sections on conflict, intelligence and security, immigration and human rights, world economic development and environmental sustainability, high technologies and their growing impact.

*Modern World-System in the Longue Duree* Immanuel Wallerstein, 2015-11-17. In this book, prominent scholars from around the world debate two major themes: the past and future of the capitalist world economy and the ways in which a capitalist economy shapes Western research, the academy, and broader knowledge structures. Putting the two themes together, they also analyze the relationship between scholarship and the rest of the world. The book is published to commemorate the 25th anniversary of the Fernand Braudel Center. Contributors: Samir Amin, Christopher Chase Dunn, Bart Tromp, Claudia von Werlhof, Giovanni Arrighi, Pablo Gonzalez Casanova, Marcel van der Linden, Randall Collins, Mahmood Mamdani, Boaventura de Sousa Santos, Michel Rolph Trouillot, Janet Abu Lughod, Maurice Aymard, and Immanuel Wallerstein.
