Evaluating The Reliability Of Macro Economic Models:

Evaluating the Reliability of Macro-economic Models Gregory C. Chow, Paolo Corsi, 1982 **Evaluating the Reliability of Macroeconomic Models** Gregory C. Chow, Paolo Corsi, 1982 **Evaluating the Reliability of Macro-Economic Models** Gregory C. Chow, Paolo Corsi, 1982 *Rational Expectations in Macroeconomic Models* P. Fisher, 2013-04-17 It is commonly believed that macroeconomic models are not useful for policy analysis because they do not take proper account of agents expectations Over the last decade mainstream macroeconomic models in the UK and elsewhere have taken on board the Rational Expectations Revolution by explicitly incorporating expectations of the future In principle one can perform the same technical exercises on a forward expectations model as on a conventional model and more Rational Expectations in Macroeconomic Models deals with the numerical methods necessary to carry out policy analysis and forecasting with these models These methods are often passed on by word of mouth or confined to obscure journals Rational Expectations in Macroeconomic Models brings them together with applications which are interesting in their own right There is no comparable textbook in the literature The specific subjects include i solving for model consistent expectations ii the choice of terminal condition and time horizon iii experimental design i e the effect of temporary vs permanent anticipated vs unanticipated shocks deterministic vs stochastic dynamic vs static simulation iv the role of exchange rate v optimal control and inflation output tradeoffs The models used are those of the Liverpool Research Group in Macroeconomics the London Business School and the National Institute of Economic and Social Research *Challenges for Macroeconomic Modelling* W. Driehuis, M.M.G. Fase, H. den Hartog, 2014-06-28 This book collects the revised and edited proceedings of the conference held in honour of the 50th anniversary of Professor Tinbergen s first macroeconomic policy model Written by experts both in the field of model building and policy analysis the contributions provide an invaluable overview of the state of the art and the use of macroeconomic models in our time *The New Palgrave Dictionary of Economics* , 2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product **Specification, Estimation, and Analysis of Macroeconometric Models** Ray C. Fair, 1984 This book gives a practical applications oriented account of the latest techniques for estimating and analyzing large nonlinear macroeconomic models Ray Fair demonstrates the application of these techniques in a detailed presentation of several actual models including his United States model his multicountry model Sargent s classical macroeconomic model autoregressive and vector autoregressive models and a small twelve equation linear structural model He devotes a good deal of attention to the difficult and often neglected problem of moving from theoretical to econometric models In addition he provides an extensive discussion of optimal control techniques and methods for estimating and analyzing rational expectations models A

computer program that handles all the techniques in the book is available from the author making it possible to use the techniques with little additional programming The book presents the logic of this program A smaller program for personal microcomputers for analysis of Fair's United States model is available from Urban Systems Research Engineering Inc Anyone wanting to learn how to use large macroeconomic models including researchers graduate students economic forecasters and people in business and government both in the United States and abroad will find this an essential guidebook A

Disequilibrium Model of Real and Financial Accumulation in an Open Economy Giancarlo Gandolfo, Pietro C.

Padoan, 2012-12-06 This is the fourth version of a model that five years ago we set out to build and estimate along the lines of the continuous time approach clarified In chapter 1 Previous versions appeared in journal articles and conference proceedings where the space is notoriously limited Therefore we welcome the possibility of publishing a book length treatment of this fourth version so that we can describe its theoretical and empirical aspects in some detail Although we have worked closely together and accept joint responsibility for the whole book chs 1 and 2 and appendix I have been written by G Gandolfo whilst chs 3 and 4 and appendix II have been written by P C Padoan Different parts of this version of the model have been discussed In various lectures at the European University Institute Florence in 1984 In a seminar organized by the Bank of Italy Sadiba Perugia Italy February 16 18 1984 in the second Viennese Workshop on Economic Applications of Control Theory Vienna May 16 18 1984 and in the sixth annual Conference of the Society for Economic Dynamics and Control Nice France June 13 15 1984 In all of these we received helpful comments similarly helpful were the comments of Clifford R Wymer who however is absolved of any responsibility **Filtering and Control of Macroeconomic Systems** M.J.M.

Rao, 2013-10-22 Advances in computer technology coupled with the sophistication of econometric modelling have enabled rapid progress in the formulation and solution of optimal control and filtering programmes especially in the sphere of macroeconomic policy designing These developments in systems methodology have prompted the need for an interface between optimal control theory and dynamic macroeconomic analysis The implications of this convergence have already aroused a great deal of research but it remains to be seen whether policy makers in most developing countries will consider actually incorporating these techniques into planning The author argues that control and systems theory can be of immense help in stabilizing those economies plagued by cyclical and structural problems By demonstrating the applicability of control filter theory to short term macroeconomic planning this book illuminates the impressive array of problems that can thereby be solved and helps foster a closer working relationship between economists and control theorists The work deals specifically with the construction of a Kalman filter mechanism for deriving short term optimal economic policies under conditions of uncertainty It specifies and resolves a macroeconometric model which is linked to a unique observation sub system of a given economy congruent with the errors in information signalling which are prevalent within the data base context of most developing countries An evaluation of control settings contrasts short and long term economic policies This indicates that an

economy may overheat under protracted settings of instrument values around their optimal levels if the constraints on the system in the form of external shocks are too great to allow reaching all targets simultaneously using feasible instrument paths

A Companion to Economic Forecasting Michael P. Clements, David F. Hendry, 2008-04-15 A Companion to Economic Forecasting provides an accessible and comprehensive account of recent developments in economic forecasting Each of the chapters has been specially written by an expert in the field bringing together in a single volume a range of contrasting approaches and views Uniquely surveying forecasting in a single volume the Companion provides a comprehensive account of the leading approaches and modeling strategies that are routinely employed

overlapping generation models and measurement of expectations and direct tests of the REH are also elaborated This monograph likewise covers the dynamic econometric modeling of decisions under uncertainty and fundamental bordered matrix of linear estimation This publication is a good reference for students and specialists interested in quantitative economics

Econometric Model Selection Antonio Aznar Grasa, 2013-03-09 This book proposes a new methodology for the selection of one model from among a set of alternative econometric models Let us recall that a model is an abstract representation of reality which brings out what is relevant to a particular economic issue An econometric model is also an analytical characterization of the joint probability distribution of some random variables of interest which yields some information on how the actual economy works This information will be useful only if it is accurate and precise that is the information must be far from ambiguous and close to what we observe in the real world Thus model selection should be performed on the basis of statistics which summarize the degree of accuracy and precision of each model A model is accurate if it predicts right it is precise if it produces tight confidence intervals A first general approach to model selection includes those procedures based on both characteristics precision and accuracy A particularly interesting example of this approach is that of Hildebrand Laing and Rosenthal 1980 See also Hendry and Richard 1982 A second general approach includes those procedures that use only one of the two dimensions to discriminate among models In general most of the tests we are going to examine correspond to this category

Econometric Decision Models Josef Gruber, 2013-06-29 This volume contains a refereed selection of revised papers which were originally presented at the Second International Conference on Econometric Decision Models University of Hagen FernUni versitat The conference was held in Haus Nordhelle a meeting place in the mountainous area Sauerland some 50 kilometers south of Hagen on August 29 September 1 1989 Some details about this conference are given in the first paper they need not be repeated here The 40 papers included in this volume are organized in 10 parts shown in the table of contents Included are such fashionable topics like optimal control cointegration and rational expectations models In each part the papers have been arranged alphabetically by author unless there were good reasons for a different arrangement To facilitate the decision making of the readers all papers except a few short ones contain an abstract a list of keywords and a table of contents At the end of the proceedings volume there is a list of authors More than ten years ago I began to organize meetings of econometricians mainly called seminar or colloquium One major purpose of these meetings has always been to improve international cooperation of econometric model builders and model users from the East and the West Unprecedented changes to the better have taken place recently perestroika For a large fraction of participants from the Soviet Union the 1989 conference was the first conference in a Western country

Modelling Economic Series Clive William John Granger, 1990 This is a volume of readings for graduate students especially those taking courses in applied econometrics who need to learn how to evaluate the validity of present theories and techniques The aim of the text is to aid readers in the difficult task of actually constructing models The essays vary in the degree of technical

sophistication used but each paper intends to provide students with a sound knowledge of the practical difficulties of model specification evaluation and interpretation as well as advice on tackling these difficulties

Forecasting Economic Time Series Michael Clements, David F. Hendry, 1998-10-08 This book provides a formal analysis of the models procedures and measures of economic forecasting with a view to improving forecasting practice David Hendry and Michael Clements base the analyses on assumptions pertinent to the economies to be forecast viz a non constant evolving economic system and econometric models whose form and structure are unknown a priori The authors find that conclusions which can be established formally for constant parameter stationary processes and correctly specified models often do not hold when unrealistic assumptions are relaxed Despite the difficulty of proceeding formally when models are mis specified in unknown ways for non stationary processes that are subject to structural breaks Hendry and Clements show that significant insights can be gleaned For example a formal taxonomy of forecasting errors can be developed the role of causal information clarified intercept corrections re established as a method for achieving robustness against forms of structural change and measures of forecast accuracy re interpreted

Macroeconomic Policy in Britain 1974-1987 Andrew J. Britton, 1994-09-29 Arguing that there were important elements of continuity in the decisions of the Treasury and the Bank of England this survey of macroeconomic policy in Britain contains a chronological account of policy actions that covers the most influential writings of economists during this period
