The Knowledge Business Rob Imrie, 2016-03-03. This book provides a critique of the knowledge business and describes and evaluates its different manifestations in and impacts on the university sector. Its focus is the social sciences and in particular housing and urban studies. Drawing on a wide range of experiences both in the UK and elsewhere, it illustrates the changing management of the academy and the development by university managers of instruments or techniques of control to ensure that academics are disciplined in ways that are commensurate with achieving commercial goals. The individual chapters highlight the different ways in which the academy is being put to work for commercial gain and they evaluate how far the public service ethos of the universities is coming apart in a context in which what is to be serviced is increasingly a private clientele defined by their ability to pay. The Knowledge Business examines the contradictions and tensions associated with these processes, highlighting the implications for the academic labour process and the future of the academy.

International Handbook on Civil Service Systems A. Massey, 2011-01-01. This Handbook on civil service systems is truly international and comparative. It covers and compares countries from all continents. It also connects historical Weberian legacies to contemporary challenges such as coordination, the hollow state, and trust. Massey's Handbook does not avoid difficult issues for civil service systems such as ruined reforms, fiscal retrenchment, and cultural and political system shocks. Therefore, this book is exceptionally rich and stimulating.

Geert Bouckaert, Katholieke Universiteit Leuven, Belgium. While there is no universally accepted definition of civil servant and civil service, this authoritative and informative Handbook compares and contrasts various approaches to organising the structure and activities of different civil service systems. Underpinning theories and frameworks provide a disciplinary perspective from which to explore recurring topics and themes, and international comparisons are made via case studies from Africa, Asia, Australasia, Europe, and North and South America. The expert contributors consider the historical and theoretical context of public administration and public sector management, encompassing issues such as the Weberian legacy, joined-up government, and the hollowed-out state thesis. The debate between Anglo-American influenced systems versus the continental European approach to organising the civil service is also addressed.

Democratic Governance Mark Bevir, 2010-04-26. Democratic Governance examines the changing nature of the modern state and reveals the dangers these changes pose to democracy. Mark Bevir shows how new ideas about governance have gradually displaced old style notions of government in Britain and around the world. Policymakers cling to outdated concepts of representative government while at the same time placing ever more faith in expertise, markets, and networks. Democracy exhibits blurred lines of accountability and declining legitimacy. Bevir explores how new theories of governance undermined traditional government in the twentieth century. Politicians responded by erecting great

bureaucracies increasingly relying on policy expertise and abstract notions of citizenship and more recently on networks of quasi governmental and private organizations to deliver services using market oriented techniques Today the state is an unwieldy edifice of nineteenth century government buttressed by a sprawling substructure devoted to the very different idea of governance and democracy has suffered In *Democratic Governance* Bevir takes a comprehensive look at governance and the history and thinking behind it He provides in depth case studies of constitutional reform judicial reform joined up government and police reform He argues that the best hope for democratic renewal lies in more interpretive styles of expertise dialogic forms of policymaking and more diverse avenues for public participation
