

The background of the book cover is a photograph of a modern building's exterior. It features a grid of large glass windows and concrete structural elements. A large, dark, leafy tree is positioned in the center, its branches and leaves partially obscuring the building behind it. The overall color palette is dominated by the greys of the concrete and the various shades of green from the foliage.

Evaluating Sustainable Development In The Built Environment:

Evaluating Sustainable Development Peter S. Brandon, Patrizia Lombardi, 2009-02-18 Sustainable development has been characterised by an emphasis on environmental issues and an ad hoc approach to structuring the subject which hinders the development of knowledge in a systematic way. The built environment contributes significantly to the environment but is also one of the major factors in determining whether a community is sustainable in the longer term. A structure is required which aids definition, provides a common set of values, establishes measurement methods to define progress and suggests a management system and decision protocol which enables practitioners to engage and use the resultant structures and information. This book provides a suggested structure in which all aspects of sustainable development can be included together with a set of evaluation techniques which can be used within the structure to provide assistance to decision making.

Future Challenges in Evaluating and Managing Sustainable Development in the Built Environment Peter S. Brandon, Patrizia Lombardi, Geoffrey Q. Shen, 2017-04-05 Future Challenges in Sustainable Development within the Built Environment stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development. It examines the methods of evaluation, the use of technology, the creation of new models and the role of human factors for examining and developing the subject over the next twenty years. Evaluating

Sustainable Development in the Built Environment Peter S. Brandon, Patrizia Lombardi, 2010-12-01 The first edition was extremely well received, providing an introduction and insight to this important topic in a comprehensive yet easy to read form. It was chosen to be issued to the representatives of the organizations from the G8 and G20 countries attending the University Summit held in Turin in 2009 which addressed the issue of how education and research can assist sustainable development. The second edition, completely updated to reflect the significant advances and new insights that have been made since publication, focuses on two main issues: Facilitating a dialogue between all stakeholders so that the complexity of the problem can be exposed, structured and communicated; Understanding how to assess progress in sustainable development. It continues to provide coherent guidance on the techniques that can be used to assess sustainable development in a rigorous manner. The approach is introduced using illustrations and case studies together with follow up references. It remains the ideal starting point for those trying to get a handle on the subject and for those who wish to examine a structured and systematic approach to the evaluation of sustainable development in the built environment.

Future Challenges in Evaluating and Managing Sustainable Development in the Built Environment Peter S. Brandon, Patrizia Lombardi, Geoffrey Q. Shen, 2024-09-23 Future Challenges in Sustainable Development within the Built Environment stimulates and reinterprets the demands of Responsible and Sustainable Development in the Built Environment for future action and development. It examines the methods of evaluation, the use of technology, the creation of new models

and the role of human factors for examining and developing the subject over the next twenty years **Evaluation of the Built Environment for Sustainability** Vincenzo Bentivegna, P.S. Brandon, Patrizia Lombardi, 2003-09-02 Sustainability in the built environment is a major issue facing policy makers planners developers and designers in the UK Europe and worldwide The measuring of buildings and cities for sustainability becomes increasingly important as pressure for green sustainable development translates into policy and legislation The problems of such measurement and evaluation are presented by the authors in contributions which move from the general to the particular e.g. from a general framework for an environmentally sustainable form of urban development to a specific input output model application to environmental problems The book is divided into three parts the first covers city models and sustainable systems research programmes environmental policies green corporations and collaborative strategies to make urban development more sustainable part two discusses the problems of evaluating the built environment in planning and construction covering economic and environmental methods and construction development and regeneration processes part three illustrates a number of applications using different approaches and techniques and referring to a range of environmental aspects of the natural and built environment from maintaining historic buildings to transport management and air pollution monitoring **Evaluating sustainable**

development , Environment and the City Joe Ravetz, Clive George, Joe Howe, 2004-07-15 For the first time at the beginning of the twenty first century urban dwellers outnumber rural residents and this trend is set to continue Consequently one of the most pressing issues of our time is how to square the social and economic development of cities with their environmental limits and those of the wider environment The theme of the environment and city is topical at every level from the politics of global trade to local community networks Environment and the City looks at the evolution of cities in the developed and the developing world and the implications for resource consumption and environmental impacts It takes a cross cutting approach with new thinking on multiple geographies the configuration of networks exclusion consumption risk and ecological footprint Urban environmental themes and their related social economic and political agendas are outlined In turn the environmental impacts and environmental agendas relating to key sectors of the urban economy are discussed The global context to such issues is then explored before the practical tools and methods of urban environmental management are investigated The theme of the sustainable city emerges from this not so much as a standard menu but as a learning process between all sections of society This book a valuable resource provides a concise accessible route map for all students interested in the environmental issues emanating from our urban society Written to aid student understanding the easily navigable text features boxed practical examples discussion points signposts to reading and websites and a glossary

Constructing Professional Discourse Concepción Orna-Montesinos,2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursual and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced

Foundations and Practice of Research Andrew Basden,2019-10-11 Many of the issues on which meaningful research is founded are seldom discussed for example the role of everyday

experience diversity and coherence of meaning in the world the meaningfulness and wider mandate of research the very nature and validity of theoretical thought and the deep presuppositions of philosophy and how they undermine the success of research Such questions are material to the philosophies that guide research thinking in all fields and since they cannot be satisfactorily addressed in a piecemeal fashion this book employs the radically different philosophy of Herman Dooyeweerd to consider them together Parts I and II discuss these issues theoretically and philosophically while Part III discusses them practically specifically the adventures that researchers across the world have had using Dooyeweerd s philosophy Foundations and Practice of Research assembles a wide range of experiences of using Dooyeweerd s philosophy in research in the fields of mathematics the natural sciences the social sciences design sciences and the humanities Case studies demonstrate how Dooyeweerd s philosophy has been found fruitful in most stages of research and the philosophical discussion backs this up This book challenges researchers to join the adventures including suggestions of potential research that could be carried out as well as questions still left unanswered
