Dains, Linda Ciofu Baumann, Pamela Scheibel, 2015-04-24 Take the next step in health assessment Advanced Health Assessment and Clinical Diagnosis in Primary Care 5th Edition goes beyond basic history and physical examination to help you master the diagnostic reasoning process

You'll develop this key skill by following assessment guidelines that focus on a specific complaint rather than beginning with a previously established diagnosis or disease entity. Written by advanced practice nursing experts Joyce Dains, Linda Baumann, and Pamela Scheibel, this edition includes new chapters on evidence-based preventive health screening and on heartburn and indigestion along with a new full-color design. Master the differential diagnosis process outlined in this book and you'll be able to accurately diagnose the majority of patients seen in today's primary care settings. A clear, consistent diagnostic reasoning process takes you to the next step of health assessment beyond basic history and physical examination to diagnostic reasoning. Diagnostic Reasoning Focused History sections use self-questions to walk you through the thinking process involved in obtaining a pertinent, relevant, problem-specific history that will assist in differential diagnosis. Diagnostic Reasoning Focused Physical Examination sections explain how to perform more advanced diagnostic techniques and interpret the findings. Key Questions guide you through assessment and toward an accurate diagnosis by listing questions to ask the patient followed by explanations of what the patient's responses might signify. Laboratory and Diagnostic Studies sections outline the types of studies that might be appropriate based on the focused history and focused physical examination. Differential Diagnosis sections offer the most common diagnoses for each patient problem and summarize the history and physical examination findings along with recommended laboratory and diagnostic studies. Differential Diagnosis tables provide a quick reference summary of possible diagnoses for each patient problem. Evidence-Based Practice boxes more than 30 are NEW, summarize the scientific evidence related to the diagnosis of patient problems. Alphabetical Table of Contents provides a convenient listing of common health problems.

**Sleep Problems: Diagnosis, Biomarkers, Interventions, and Treatments** Haitham Jahrami, Nina Christmann, 2023-10-25 Sleep medicine is a burgeoning field owing to the fact that several sleep disorders may cause and/or exacerbate serious conditions like psychiatric disorders, cardiovascular disease, stroke, type 2 diabetes, and obesity and lead to an overall reduction of quality of life. Also, poor sleep increases community costs due to increased motor vehicle accidents and loss in productivity. Furthermore, while chronic sleep deprivation leads to a significant loss of quality of life, short-term sleep deprivation is a powerful therapeutic option for depression which emphasises the very complex and still not fully understood interaction between the physiology of sleep and psychiatric disorders.

*Management of Sleep Disorders in Psychiatry* Amit Chopra, Piyush Das, Karl Doghramji, 2020-10-27 Management of Sleep Disorders in Psychiatry provides the most comprehensive and evidence-based review of the clinical management of DSM-V based sleep-wake disorders in patients with psychiatric disorders. This book is organized into three sections that focus on the basics of sleep medicine, clinical features and treatment of DSM-V sleep-wake disorders, and evidence-based management of sleep disorders commonly associated with a range of DSM-V based psychiatric disorders. The first section orients the reader to topics such as sleep physiology, neural mechanisms of wakefulness and sleep, circadian rhythms, effects of sleep on cognition, history taking in sleep medicine, and clinical application of technical procedures used in

the field of sleep medicine The second section adopts a unique perspective of using DSM V classification of sleep wake disorders to integrate the management of sleep disorders with mainstream clinical psychiatry This section features a comprehensive chapter on pediatric sleep wake disorders a topic of interest to fellows and practicing clinicians specializing in child and adolescent psychiatry The third section offers the most comprehensive review of comorbidity shared pathophysiology and clinical management of sleep disorders within the context of a wide range of DSM V based psychiatric disorders This section also highlights important topics such as delirium neurocognitive disorders effects of psychotropic medications on sleep neurological disorders pain disorders forensic sleep medicine and eating disorders This clinically oriented resource provides case vignettes and clinical pearls to illustrate the diagnosis and treatment of sleep disorders in the setting of a variety of psychiatric presentations Additionally each chapter includes a self assessment section with multiple choice questions that helps the reader solidify their clinical skills and prepare for the board and certification examinations for topics pertinent to sleep wake disorders in psychiatry
