Evaluation And Auditing Prospects For Convergence

Victor Jupp

Evaluation And Auditing Prospects For Convergence:

Evaluation and Auditing: Prospects for Convergence Carl Wisler, 1996-11-07 Both evaluation and auditing claim to help decision makers by providing them with systematic and credible information that can be useful in the creation management oversight change and occasionally abolishment of programs Yet despite considerable overlap in objectives subject matter and clients auditing and evaluation have until recently functioned largely in isolation from one another The literature of each discipline scarcely recognized the existence of the other academic preparation of auditors and evaluators could hardly be more different Organizationally the two activities have traditionally been separate The practitioners have difficulty communicating with one another not only because of differences in vocabulary but also because of some important differences in mind set This issue of New Directions for Evaluation explores the question of whether auditing and evaluation are on convergent courses or whether the two disciplines will persist as distinctive services to decision makers The chapters are based on presentations made at the International Evaluation Conference held in Vancouver British Columbia in November 1995 This is the 71st issue in the journal series New Directions for Evaluation For more information on the series please see the Journals and Periodicals page

Crossover of Audit and Evaluation Practices Maria Barrados, Jeremy Lonsdale, 2020-02-24 Crossover of Audit and Evaluation Practices brings together academic analysis with insights from practitioners to discuss the potential for collaboration in audit and evaluation practices between three professional disciplines Clearly written and thoughtfully organized this volume is structured in three parts to deal with theory practice issues and how the practices have worked together Part One provides definitions of performance audit internal audit and program evaluation Part Two addresses several challenges that professionals face in applying these standards and principles Part Three contains examples of organizational collaboration between the practices how they have worked together and the lessons that were learned from that experience Specific cases from the Government Accountability Office and UNESCO UNDP and Inter Americas Development Bank illustrate what has worked or not and suggest reasons why Crossover of Audit and Evaluation Practices offers even the most skilled and experienced professional insight on how to bridge some of the divides It will help generate a better understanding of the activities and services that are either imposed on them or are freely available and help to stimulate their optimal use

Rist, 2009 The Road to Results Designing and Conducting Effective Development Evaluations presents concepts and procedures for evaluation in a development context It provides procedures and examples on how to set up a monitoring and evaluation system how to conduct participatory evaluations and do social mapping and how to construct a rigorous quasi experimental design to answer an impact question The text begins with the context of development evaluation and how it arrived where it is today It then discusses current issues driving development evaluation such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations The topics of implementing Results based Measurement and Evaluation and constructing a Theory of Change are emphasized throughout the text Next the authors take the reader down the road to results presenting procedures for evaluating projects programs and policies by using a Design Matrix to help map the process This road includes determining the overall approach formulating questions selecting designs developing data collection instruments choosing a sampling strategy and planning data analysis for qualitative quantitative and mixed method evaluations The book also includes discussions on conducting

complex evaluations how to manage evaluations how to present results and ethical behavior including principles standards and guidelines The final chapter discusses the future of development evaluation This comprehensive text is an essential tool for those involved in development evaluation *The SAGE Dictionary of Social Research Methods* Victor Jupp, 2006-04-18 Bringing together the work of over eighty leading academics and researchers worldwide to produce the definitive reference and research tool for the social sciences The SAGE Dictionary of Social Research Methods contains more than 230 entries providing the widest coverage of the all the main terms in the research process It encompasses philosophies of science research paradigms and designs specific aspects of data collection practical issues to be addressed when carrying out research and the role of research in terms of function and context Each entry includes A concise definition of the concept A description of distinctive features historical and disciplinary backgrounds key writers applications A critical and reflective evaluation of the concept under consideration Cross references to associated concepts within the dictionary A list of key readings Written in a lively style The SAGE Dictionary of Social Research Methods is an essential study guide for students and first time researchers It is a primary source of reference for advanced study a necessary supplement to established textbooks and a state of the art reference guide to the specialized language of research across the social sciences

Utilization-Focused Evaluation Michael Quinn Patton, 2008-06-18 The Fourth Edition of the bestselling Utilization Focused Evaluation provides expert detailed advice on conducting program evaluations from one of leading experts Chock full of useful pedagogy including a unique utilization focused evaluation checklist this book presents Michael Quinn Patton's distinctive opinions based on more than thirty years of experience Key Features of the Fourth Edition Provides thoroughly updated materials including more international content new references new exhibits and sidebars and new examples stories and cartoons Includes follow up exercises at the end of each chapter Features a utilization focused evaluation checklist Gives greater emphasis on mixed methods Analyzes the pluses and minuses of the increased emphasis on accountability and performance measurement in government at all levels Details the explosion of international evaluation Intended Audience Both theoretical and practical this core text is an essential resource for students enrolled in Program Evaluation courses in a variety of disciplines including public administration government social sciences education and management Practitioners will also find this text invaluable **Performance Auditing** Jeremy Lonsdale, Peter Wilkins, Tom Ling, 2011-01-01 It is time 15 years on from the coining of the Audit Explosion to re appraise the growth of new forms of auditing As we move into what might be called Auditing in Austerity this book gives us that overview An extremely well informed team of authors has been assembled to deliver a comparative analysis that successfully mixes insider and outsider perspectives This should be required reading not just for auditors and their academic hangers on but for the wider audience of those interested in contemporary developments in democratic accountability and policymaking Christopher Pollitt Catholic University of Leuven Belgium This book fills an important gap in the market At a time when governments around the world face the largest deficits in decades

there is a strong need to reduce public expenditures whilst ensuring greater value for money from public services This book addresses these concerns and many more Each of the chapter authors is a senior practitioner and or an academic who specialises in performance auditing and accountability in modern complex democracies They explore the nature of the concepts which underlie current practice set out a variety of institutional structures and processes and identify the limits of both theory and practice These make this a book of considerable significance and one which makes an important contribution to our understanding of the democratic process This is not a narrowly focused book only of interest to those who specialise in performance auditing Given the richness of its analysis and the fine grained understanding of institutions and processes it has much to say to students of public administration management and policy analysis I am confident that this will rapidly become the standard reference for those who are interested in performance auditing Peter M Jackson AcSS University of Leicester UK What a good read Insightful and challenging It is likely to incite a lot of discussion on the wide ranging views from the very well informed and qualified contributors not least from those who actually have to implement the findings and recommendations of performance audit reports The focus is rightly on accountability for performance not only in achieving government program objectives in an economic efficient and effective manner but also on the audit institutions themselves It should be welcomed by the public sector and particularly by the parliamentary institutions concerned with achieving accountability for government performance Pat Barrett AO Australian National University and former Australian Auditor General 1995 2005 This book is a much welcome tonic for public administration It is one of the few books that explicitly focus on how audit institutions carry out their performance auditing responsibilities While auditors will likely read this the authors have geared the book to a broader readership including public managers who are often the subject of performance audits From the foreword by Paul Posner George Mason University US This state of the art book examines the development of performance audit drawing on the experience in a number of different countries including the United Kingdom the United States Australia the Netherlands and Belgium The expert contributors identify the trajectory of performance audit examine how it is conducted and consider what it is contributing to effective government They conclude that in the face of new challenges performance auditors should focus both on their core responsibilities to ensure accountability and continue to develop more insightful and sophisticated approaches to enable them to assess the growing complexity of the delivery of public services By doing so they can continue to play a valuable role in democratic accountability Providing an up to date overview and discussion of performance audit this highly topical book will appeal to all those working within audit academics working in the fields of public management and public administration as well practitioners in and close to state audit institutions Members of Parliament evaluators internal auditors researchers policy analysts and consultants will also find this book invaluable

Collaboration in Public Services Bill Jenkins, 2017-10-19 The International Group for Policy and Program Evaluation INTEVAL serves as a forum for scholars and practitioners of public policy to discuss ideas and

developments as a community dedicated to enhancing the contribution of evaluation to government. From the group's studies has emerged a concern with the impact of public management reforms. Collaboration in Public Services examines collaboration in the delivery of public policies and identifies the challenges for policy and program evaluation. Written by a mix of academics, program managers, evaluators, and auditors, this volume explores the forms and challenges of collaboration in different national contexts. Chapter 1 introduces the notion and manifestations of collaboration and discusses emerging issues. Chapter 2 examines partnerships and networks of public service delivery. Chapter 3, drawing on Dutch and British data, reveals the QUANGO as both a collaborative end and means. Chapter 4 analyzes Israel's push to enhance collaboration with voluntary organizations. Chapter 5 examines the Canadian and Danish experiences. Chapter 6 suggests that the creation of markets to improve quality has not been totally successful at least in Nordic countries. Chapter 7 suggests that traditional service values such as trust and parliamentary accountability are challenged by the complexity of collaboration, but using illustrations from Canada and other OECD countries argues that results-based governance can increase trust, flexibility, and empowerment. Chapter 8 demonstrates from Dutch and Canadian experiences that auditor responses to collaborative delivery tend to overlook traditional roles as guardians of accountability on behalf of parliaments. Chapter 9 deliberates the efficacy of programs involving multiple partners. Chapter 10 discusses the lessons and challenges of evaluation and collaborative government.
