Even In A Maze:

Embrosewyn Tazkuvel,2010-05-01 **The Idea of the Labyrinth from Classical Antiquity through the Middle Ages** Penelope Reed Doob,2019-03-15 Ancient and medieval labyrinths embody paradox according to Penelope Reed Doob Their structure allows a double perspective the baffling fragmented prospect confronting the maze treader within and the comprehensive vision available to those without Mazes simultaneously assert order and chaos artistry and confusion articulated clarity and bewildering complexity perfected pattern and hesitant process In this handsomely illustrated book Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages Doob first examines several complementary traditions of the maze topos showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity She then describes two common models of the labyrinth and explores their formal implications the unicursal model with no false turnings found almost universally in the visual arts and the multicursal model with blind alleys and dead ends characteristic of literary texts This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze as Doob s examination of a vast array of materials from the classical period through the Middle Ages suggests She concludes with linked readings of four labyrinths of words Virgil s Aeneid Boethius Consolation of Philosophy Dante s Divine Comedy and Chaucer s House of Fame each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works Readers in such fields as Classical literature Medieval Studies Renaissance Studies comparative literature literary theory art history and intellectual history will welcome this wide ranging and illuminating book **Cognitive deficits in schizophrenia and other**

Adaptive Behavior and Learning J. E. R. Staddon, 1983-11-25 Adaptive behaviour is of two types only Either an animal comes equipped by heredity with the ability to identify situations in which a built in response is appropriate or it has mechanisms allowing it to adapt its behaviour in situations in which the correct response cannot be predicted Adaptive behaviour of the second type comes about through natural selection which weeds out individuals that identify situations inaccurately or respond inappropriately Adaptive behaviour of the second type comes about through the selection of behavioural variants by the environment This book is about the second type of adaptive behaviour of which learning is the most highly developed form Adaptive Behaviour and Learning constitutes a provocative theoretical integration of the psychological and biological approaches to adaptive behaviour John Staddon s ideas will have a major impact on psychologists and zoologists conceptions of the problem of learning Highly readable the book will serve as a useful text for courses in learning animal behaviour and comparative psychology
