two world wars the Weimar failure and Nazi disaster Cold War division and the nation's unexpected recent reunification This book systematically explores the issue in terms of its four central dimensions Germany's identity national unity power and role in world politics Ambitious in conception and meticulous in execution Dirk Verheyen's wide ranging analysis incorporates historical and geopolitical considerations in an intellectually rigorous yet accessible discussion *Self and Identity* Trenton Merricks, 2022 Trenton Merricks shows that we cannot get clear about personal identity unless we bring together the ethics and the metaphysics He argues that while identity is not what matters in survival it delivers what matters in survival which is the appropriateness of first personal anticipation of and self interested concern for a future person

Capturing Identity Meike Watzlawik, Aristi Born, 2007-06-15 Scientists from six countries well known for their work in the field of identity research explain and comment on methodological approaches used to research identity This book concentrates on qualitative methods such as narrative identity analysis or semi structured interviewing techniques to determine identity status as well as the quantitative method of using questionnaires It also discusses the advantages and disadvantages of these methods and their future integration The reader will learn about qualitative and quantitative research and discover the similarities and differences between the methods of researching identity depending on research with methodological roots in one field the other or both Chapters include James E Marcia presents his latest thoughts and experiences regarding the identity status concept and focuses on the Identity Status Interview ISI as a method to obtain empirical access to ego identity development Guenter Mey presents a case study from his project Adolescence Identity Narration based on problem centered interviews and the specific interviewing transcription and data analysis procedures utilized Mechthild Kiegelmann introduces the Voice Approach a qualitative oriented research method developed by Carol Gilligan Lyn Brown and their colleagues which can be applied to identity research Luc Goossens and Koen Luyckx present their results which are mostly based on questionnaires offering a broad range of data analyses Wim Meeus the author of the Utrecht Groningen Identity Development Scale and Minet de Wied offer an overview of twenty five years of research on relationships with parents and identity in adolescence Encountering American Faultlines Jose Itzigsohn, 2009-06-18 The descendants of twentieth century southern and central European immigrants successfully assimilated into mainstream American culture and generally achieved economic parity with other Americans within several generations So far that is not the case with recent immigrants from Latin America and the Caribbean A compelling case study of first and second generation Dominicans in Providence Rhode Island Encountering American Faultlines suggests that even as immigrants and their children increasingly participate in American life and culture racialization and social polarization remain key obstacles to further progress Encountering American Faultlines uses occupational and socioeconomic data and in depth interviews to address key questions about the challenges Dominicans encounter in American society What is their position in the American socioeconomic structure What occupations do first and second generation Dominicans hold as they enter the workforce How

do Dominican families fare economically How do Dominicans identify themselves in the American racial and ethnic landscape The first generation works largely in what is left of Providence s declining manufacturing industry Second generation Dominicans do better than their parents economically but even as some are able to enter middle class occupations the majority remains in the service sector working class Jos Itzigsohn suggests that the third generation will likely continue this pattern of stratification and he worries that the chances for further economic advancement in the next generation may be seriously in doubt While transnational involvement is important to first generation Dominicans the second generation concentrates more on life in the United States and empowering their local communities Itzigsohn ties this to the second generation s tendency to embrace panethnic identities Panethnic identity provides Dominicans with choices that defy strict American racial categories and enables them to build political coalitions across multiple ethnicities This intimate study of the Dominican immigrant experience proposes an innovative theoretical approach to look at the contemporary forms and meanings of becoming American Jos Itzigsohn acknowledges the social exclusion and racialization encountered by the Dominican population but he observes that by developing their own group identities and engaging in collective action and institution building at the local level Dominicans can distinguish themselves and make inroads into American society But Encountering American Faultlines also finds that hard work and hope have less to do with their social mobility than the existing economic and racial structures of U S society

*The Constitution of Selves* Marya Schechtman, 1996 An amnesia victim asking Who am I means something different from a confused adolescent asking the same question Marya Schechtman takes issue with analytic philosophy s emphasis on the first sort of question to the exclusion of the second The problem of personal identity she suggests is usually understood to be a question about historical life What she calls the reidentification question is taken to be the real metaphysical question of personal identity whereas questions about beliefs or values and the actions they prompt the characterization question are often presented as merely metaphorical Failure to recognize the philosophical importance of both these questions Schechtman argues has undermined analytic philosophy s attempts at offering a satisfying account of personal identity Considerations related to the characterization question creep unrecognized into discussions of reidentification with the result that neither question is adequately addressed Schechtman shows how separating the two questions allows for a more fruitful approach to the reidentification question and she develops her own narrative account of characterization She suggests that persons constitute their identities by developing autobiographical narratives that bear the right relation to facts about the environment the general concept of a person and other people s concepts of who they are

Constructing Identity in Contemporary Architecture Peter Herrle,Stephanus Schmitz,2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore First Nationalism Then Identity Mirsad Kriještorac,2022-09-29 First Nationalism Then Identity focuses on the case of Bosnian Muslims a rare historic instance of a new nation emerging Although for Bosnian Muslims the process of national emergence and the assertion of a new salient identity have been going on for over two decades Mirsad Krije torac is the first to explain the significance of the whole process and how the adoption of their new Bosniak identity occurred He provides a historical overview of Yugoslav and Bosnian Slavic Muslims transformation into a full fledged distinct and independent national group as well as addresses the important question in the field of nationalism studies about the relationship between and workings of nationalism and identity While this book is noteworthy for ordinary readers interested in the case of Bosnian Muslims it is an important contribution to the scholarly debate on the role of nationalism in the political life of a group and adds an interdisciplinary perspective to comparative politics scholarship by drawing from anthropology history geography and sociology Questions and Questioning Michel Meyer,2011-10-13 No **Fictional Objects** Stuart Brock,Anthony Everett,2015-06-04 detailed description available for Questions and Questioning

Eleven original essays discuss a range of puzzling philosophical questions about fictional characters and more generally about fictional objects For example they ask questions like the following Do they really exist What would fictional objects be like if they existed Do they exist eternally Are they created Who by When and how Can they be destroyed If so how Are they abstract or concrete Are they actual Are they complete objects Are they possible objects How many fictional objects are there What are their identity conditions What kinds of attitudes can we have towards them This volume will be a landmark in the philosophical debate about fictional objects and will influence higher level debates within metaphysics the philosophy of mind and the philosophy of language

**White Identity Politics** Ashley Jardina,2019-02-28 Amidst discontent over diversity racial identity is a lens through which many US white Americans now view the political world

**Identity in Formation** David D. Laitin,1998 Laitin portrays these Russian speakers as a beached diaspora since the populations did not cross international borders the borders themselves receded He asks what will become of these populations Will they learn the languages of the republics in which they live and prepare their children for assimilation Will they return to a homeland many have never seen Or will they become loyal citizens of the new republics while maintaining a Russian identity
