**Elsevier's Dictionary of Technical Abbreviations** S. Bobryakov, M. Rosenberg, 2005-03-23 The English Russian dictionary of technical abbreviations contains nearly 65 000 entries covering various fields and subfields of engineering and technology Abbreviations are widely used in technical literature and as a rule they create difficulties for the reader Numerous abbreviations are used in technical literature dealing with space agriculture electronics computer science chemistry thermodynamics nuclear engineering refrigeration cryogenics machinery aviation business accounting optics radio electronics and military fields including abbreviations used on a wide scale by the Navy Airforce and the Army In many instances the same abbreviation is used in most different fields of engineering and technology though depicting different notions There are cases when the same abbreviation may have dozen of meanings depending on the specific field of engineering The entries are arranged in alphabetical order A wide range of literature has been explored for the selection and translation of the abbreviations The dictionary has been compiled by comparing parallel texts in both languages and by consultation with experts This publication will be invaluable to the personnel of designing bureaus and research institutions and also to translators scientists researchers designers and university personnel dealing with various fields of engineering and technology approx 125 000 terms

**Guide to Sources for Agricultural and Biological Research** J. Richard Blanchard, Lois Farrell, 2023-07-28 **The Translator's Handbook** Morry Sofer, 2006 Since 1997 this translator's guide has been the worldwide leader in its field and has elicited high praise from some of the world's best translators It has been fully updated in the 2006 edition

**Elsevier's Dictionary of Geography** Vladimir Kotlyakov, Anna Komarova, 2006-12-20 Geography is a system of highly developed sciences about the environment Geographical science embracing the study of the Earth's physical phenomena people and their economic activities has always been in need of an extensive terminology Geographical terms are related to the terms of natural sciences physics chemistry biology geology etc and humanities history economics sociology etc since geography is based on these fundamental subjects Geography includes a number of disciplines and subdivisions which appeared along with the development of the science In spite of being very different geographical disciplines have some common tools of investigation which is maps comparative method of exploration remote sensing geoinformation systems Today very well developed terminologies of all the specialist fields of geography and related subjects exist in the main world languages However they are not always well correlated Nowadays geographical terminology requires unification and international correlation more than ever before Hence the idea of compiling a multilingual polydisciplinary dictionary The Dictionary consists of the basic table of terms arranged according to the order of the English alphabet with each term numbered Each entry consists of the term in English and its equivalents in Russian French German Spanish Short definitions of terms are given in English and in Russian The terms are supplied with the necessary grammar labels such as gender of nouns plural number etc The Dictionary combines two functions that of a defining dictionary and that of a bilingual

dictionary These two functions are basically contradictory because usually the defining dictionary is aimed at giving one meaning of the word which is the main and essential one while the bilingual dictionary tries to give different equivalents of a given word in the other language in order to supply the user with maximum possible translations differing in the shades of meanings thus giving him the possibility to choose the appropriate word But in our Dictionary we intentionally decided to combine the two functions defining and multilingual because a short definition of the term and equivalents in other languages help to achieve our main aim which consists in showing the basic geographical terminology and harmonizing it in several languages Having this into consideration we deliberately mixed two types of dictionaries in one Organized alphabetically via English Provides short definition of geographical terms in English and Russian Includes multilingual translation of terms from English to Russian French German Spanish      **Using the Engineering Literature** Bonnie A. Osif, 2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links
