medieval African states and the Islamic world and the United States and Japan post 1950 It examines railway empires through the examples of Russia and Japan and explores current synergies of innovation in energy supply and smartphone technology through African cases The book uses the term technological dialogue to challenges the top down concept of technology transfer showing instead that technologies are typically modified to fit local needs and conditions often triggering further innovation The authors trace these encounters and exchanges over a thousand years examining changes in such technologies as agriculture firearms printing electricity and railroads A new chapter brings the narrative into the twenty first century discussing technological developments including petrochemicals aerospace and digitalization from often unexpected global viewpoints and asking what new kind of industrial revolution is needed to meet the challenges of the Anthropocene

Frontier Memory: Cultural Conflict and Exchange in the Romancero fronterizo. Sizen Yiacoup, 2013-10-07

Scholarship on the late medieval and early modern Castilian frontier ballad has tended to fall into two distinct categories analyses which promote a view of the fronterizo corpus as an instrument of anti Muslim nationalist ideology in the service of the Christian Reconquest or interpretations which favour the perception of the poems as idealizing and distinctly Islamophile in their representations of Granadan Muslims In this study izen Yiacoup offers readings of the romances fronterizos that take into consideration yet look beyond expressions of cross cultural hostility or sympathy in order to assess the ways in which the poems recall a process of cultural exchange between Christians and Muslims An understanding of the relationship between the ballads their original social setting and the setting in which they achieved their greatest popularity provides the framework for this interpretation of the poems shifting cultural connotations Accordingly Yiacoup traces the evolution of their historical and cultural significance as they moved from their origins in the fourteenth and fifteenth centuries when a Castilian frontier with Islamic Granada was still a reality into the sixteenth when this boundary vanished as part of the larger realignment of cultural territorial and political frontiers of the new Spanish empire
