Wigner, 1998-10-20 E P Wigner one of the leading scientists involved in the early development of nuclear technology had always in mind its political and social implications In the 60s persuing his goal of a peaceful open world he began to develop the concept of Civil Defense against nuclear attacks Looking back one might see this as an alternative to the concept of the Nuclear Shield The present volume contains a selection of Wigner's writings on this subject It is annotated by Conrad Chester **Problematic** Laura Hengehold, 2010-09-30 Late in life Foucault identified with the critical tradition of Kant encouraging us to read both thinkers in new ways Kant's Copernican strategy of grounding knowledge in the limits of human reason proved to stabilize political social scientific and medical expertise as well as philosophical discourse These inevitable limits were made concrete in historical structures such as the asylum the prison and the sexual or racial human body Such institutions built upon and shaped the aesthetic judgment of those considered normal Following Kant through all of Foucault's major works this book shows how bodies functioned as problematic objects in which the limits of post Enlightenment European power and discourse were imaginatively figured and unified It suggests ways that readers in a neoliberal political order can detach from the imaginative schemes vested in their bodies and experiment normatively with their own security needs

Free Public Reason Fred D'Agostino, 1996-01-04 Free Public Reason examines the idea of public justification stressing its importance but also questioning the coherence of the concept itself Although public justification is employed in the work of theorists such as John Rawls Jeremy Waldron Thomas Nagel and others it has received little attention on its own as a philosophical concept In this book Fred D Agostino shows that the concept is composed of various values interests and notions of the good and that no ranking of these is possible The notion of public justification itself is thus shown to be contestable In demonstrating this D Agostino undermines many current political theories that rely on this concept Having broken down the foundations of public justification D Agostino then offers an alternative model of how a workable consensus on its meaning might be reached through the interactions of a community of interpreters or delegates at a constitutional **Becoming Two in Love** Roland J. De Vries, 2013-07-25 This book draws Soren Kierkegaard and Luce Irigaray convention into conversation on the nature and ethics of sexual difference While these two initially seem like doubtful dialogue partners the conversation between them yields a rich and compelling account of intersubjectivity between man and woman an account that moves beyond the limited and tired debate over egalitarianism vs complementarianism Through engagement with Irigaray and Kierkegaard this book develops a constructive theological ethics of sexual difference that focuses on an epistemological and subjective gap that sets man and woman at a decisive distance from each other. They are a mystery to each other Yet it is also an ethical framework that allows woman and man to encounter one another in ways that respect the

independence subjectivity and becoming of each Above all this is a theological ethics of sexual difference that centers on Jesus Christ who is defined as the middle term in every relationship and whose love command defines the encounter between man and woman in difference Columbia Law Times ,1888 Maxims and Reflections (Ricordi) Francesco Guicciardini,1972-01-29 Review Unlike Machiavelli inveterate dreamer and cynic Guicciardini s mind is remarkable for the balance and masterly coolness of its judgment Federico Chabod In the history of Renaissance thought Guicciardini s Ricordi occupy a place of singular importance Few works of the sixteenth century allow us so penetrating an insight into the views and sentiments of its author as these reflections of the great Italian historian Like Machiavelli s Prince the Ricordi form one of the outstanding documents of a time of crisis and transition but unlike the Prince they range over a wide field of private as well as public life In doing so they revel the man as well as the political theorist Nicolai Rubenstein from the Introduction

The Making of Chinese Criminal Law Ying Ji,2021-03-08 By examining the reasons behind the preventive criminalization of Chinese criminal law this book argues that the shift of criminal law generates popular expectations of legislative participation and meets punitive demands of the public but the expansion of criminal law lacks effective constraints which will keep restricting people s freedom in the future The book is inspired by the eighth amendment of Chinese criminal law in 2011 which amended several penalties related to road drug and environmental safety It is on the eighth amendment that subsequent amendments have been based The amendment stemmed from a series of nationally known incidents that triggered widespread public dissatisfaction with the Chinese criminal justice system Based on John Kingdon's theory of the multiple streams the book explains the origins of the legislative process and its outcomes by examining the role of public opinion policy experts and political actors in the making of Chinese criminal law It argues that in authoritarian China the prominence of risk control through criminal justice methods is a state response to uncertainties generated through reforms under the CCP s leadership The process of criminal lawmaking has become more responsive and inclusive than ever before even though it remains a consultation with the elites within the framework set by the Chinese Communist Party CCP including representatives of the Lianghui government ministries academics and others The process enhances the CCP s legitimacy by not only generating popular expectations of legislative participation but also by meeting the punitive demands of the public The book will be of interest to academics and researchers in the areas of Chinese criminal law and comparative Multimodal Approaches to Media Discourses Tim Griebel, Stefan Evert, Philipp Heinrich, 2020-08-18 Multimodal law Approaches to Media Discourses brings together contributions from an interdisciplinary group of scholars on corpus assisted analyses of multimodal data on austerity discourses in the United Kingdom which extend and expand on the understanding of austerity but also of the methodologies used to analyse multimodal corpora The volume demonstrates how the austerity measures introduced in response to global economic and financial crises in recent years can be viewed as being more complexly layered than they appear not simply reduced to their connections to spending cuts and fiscal debt The book

employs an innovative methodological approach in which established and emerging scholars from linguistics and computational and social sciences critically reflect on the exact same set of data multimodal texts and articles from The Guardian and The Daily Telegraph from 2010 to 2016 This framework allows for the exploration of the role of the media in mediating the public s assessment of austerity and the ideas actors emotions geographies and broader material context which contribute to such perceptions In so doing the volume also offers unique insights into systematic analyses to multimodal data which may be applied to other topics and connected with other disciplines Enhancing our awareness and assessment of austerity in public discourse and of the methodologies to study it this book is key reading for students and researchers in discourse analysis corpus linguistics multimodality and those working at the intersection of these fields
