

Example 1: Solve the equation:

$$15 - 4x = 2(3x + 1)$$

$$15 - 4x - 6x = \quad + 2$$

$$-10x \quad = 2 - 15$$

$$-10x = -13$$

$$\frac{-\cancel{10}^1x}{-\cancel{10}_1} = \frac{-13}{-10}$$

Algebra Margaret L. Lial, John Hornsby, Terry McGinnis, 2019 *Introductory Algebra Global Edition* Introductory Algebra K.
Elayn Martin-Gay, 2002 *Introductory Algebra* is typically a 1 semester course that provides a solid foundation in algebraic
skills and reasoning for students who have little or no previous experience with the topic The goal is to effectively prepare
students to transition into Intermediate Algebra **Introductory Algebra for College Students** Robert Blitzer, 1997-07
For a one semester undergraduate introductory algebra course The goal of this text is to provide students with a strong
foundation in Basic Algebra skills to develop students critical thinking and problem solving capabilities and prepare students
for Intermediate Algebra and some service math courses Topics are presented in an interesting and inviting format
incorporating real world sourced data modeling **Instructor's Manual to Accompany Introductory Algebra** Joseph F.

Instructor's Solutions Manual Steffensen, 1998-03-21 Introductory Algebra Arnold R. Steffensen, Lee Murphy
Johnson, 1994 **Mathematics in Action** Consortium for Foundation Mathematics, 2003-12 This introductory algebra text
based on standards in the AMATYC Crossroads document motivates college math students to develop mathematical literacy
and a solid foundation for future study in mathematics and other disciplines This second book of a three book series presents
mathematical concepts and skills through relevant activities derived from real life situations these activities are meaningful
to students because they illustrate how mathematics arises naturally from real world situations and problems The
Mathematics in Action series is based on the assumption that students learn mathematics best by doing mathematics in a
meaningful context Students take an active role in their own learning by working in groups thereby developing
communication skills a sense of independence and a can do attitude about mathematics Technology is integrated throughout
the book so that students learn to interpret real life data numerically symbolically and graphically Regardless of their level of
preparation for the course students can use this text to increase their knowledge of mathematics their problem solving skills
and their overall confidence in their ability to learn **Articles and Excerpts, Volume 1** AoPS Incorporated, 2006
Mathematical Investigations Phil DeMarois, Mercedes A. McGowen, Darlene Whitkanack, 2001 Reflective of AMATYC
and NCTM standards for teaching mathematics this text the first in a series of two texts aims to make mathematics truly
accessible to all students by taking an active approach to learning Focused on mathematical reasoning and problem solving

strategies Mathematical Investigations presents a series of carefully sequenced investigations where students gather data and work collaboratively to discover key concepts The function concept is central to all topics from Chapter 3 forward and is explored through multiple representations This text explores variables notation and processes explicitly rather than assuming students have mastered these concepts in previous courses Content is explored in depth and contextual problems are revisited throughout the text to create a spiral that gives students multiple opportunities to master important skills and concepts Graphing calculators are integrated throughout the text to help students discover patterns and interpret data intelligently Students construct their knowledge of a particular topic in a real world context and then reinforce this knowledge through reflection practice and synthesis with other topics as they work through the text
