Elicitation Of Preferences:

Elicitation of Preferences Baruch Fischhoff, Charles F. Manski, 2013-03-14 Economists and psychologists have on the whole exhibited sharply different perspectives on the elicitation of preferences Economists who have made preference the central primitive in their thinking about human behavior have for the most part rejected elicitation and have instead sought to infer preferences from observations of choice behavior Psychologists who have tended to think of preference as a context determined subjective construct have embraced elicitation as their dominant approach to measurement This volume based on a symposium organized by Daniel McFadden at the University of California at Berkeley provides a provocative and constructive engagement between economists and psychologists on the elicitation of preferences Elicitation of Preferences Baruch Fischhoff, Charles F. Manski, 2000-02-29 Economists and psychologists have on the whole exhibited sharply different perspectives on the elicitation of preferences Economists who have made preference the central primitive in their thinking about human behavior have for the most part rejected elicitation and have instead sought to infer preferences from observations of choice behavior Psychologists who have tended to think of preference as a context determined subjective construct have embraced elicitation as their dominant approach to measurement This volume based on a symposium organized by Daniel McFadden at the University of California at Berkeley provides a provocative and constructive engagement between economists and psychologists on the elicitation of preferences **Elicitation** Luis C. Dias, Alec Morton, John Quigley, 2017-11-16 This book is about elicitation the facilitation of the quantitative expression of subjective judgement about matters of fact interacting with subject experts or about matters of value interacting with decision makers or stakeholders It offers an integrated presentation of procedures and processes that allow analysts and experts to think clearly about numbers particularly the inputs for decision support systems and models This presentation encompasses research originating in the communities of structured probability elicitation calibration and multi criteria decision analysis often unaware of each other s developments Chapters 2 through 9 focus on processes to elicit uncertainty from experts including the Classical Method for aggregating judgements from multiple experts concerning probability distributions the issue of validation in the Classical Method the Sheffield elicitation framework the IDEA protocol approaches following the Bayesian perspective the main elements of structured expert processes for dependence elicitation and how mathematical methods can incorporate correlations between experts Chapters 10 through 14 focus on processes to elicit preferences from stakeholders or decision makers including two chapters on problems under uncertainty utility functions and three chapters that address elicitation of preferences independently of or in absence of any uncertainty elicitation value functions and ELECTRE Two chapters then focus on cross cutting issues for elicitation of uncertainties and elicitation of preferences biases and selection of experts Finally the last group of chapters illustrates how some of the presented approaches are applied in practice including a food security case in the UK expert elicitation in health care decision making an expert judgement based

Valuing Health Daniel M. Hausman, 2015-02-27 In Valuing Health Daniel M Hausman provides a philosophically sophisticated overview of generic health measurement that suggests improvements in standard methods and proposes a radical alternative He shows how to avoid relying on surveys and instead evaluate health states directly Hausman goes on to tackle the deep problems of evaluation offering an account of fundamental evaluation that does not presuppose the assignment of values to the properties and consequences of alternatives After discussing the purposes of generic health measurement Hausman defends a naturalistic concept of health and its relations to measures such as quality adjusted life years QALYs and disability adjusted life years DALYs In examining current health measurement systems Valuing Health clarifies their value commitments and the objections to relying on preference surveys to assign values to health states Relying on an interpretation of liberal political philosophy Hausman argues that the public value of health states should be understood in terms of the activity limits and suffering that health states impose Hausman also addresses the moral conundrums that arise when policy makers attempt to employ the values of health states to estimate the health benefits of alternative policies and to adopt the most cost effective He concludes with a general discussion of the difficulties of combining consequentialist and non consequentialist moral considerations in policy making

Dynamic Decision Support for Electronic Requirements Negotiations Annika Lenz, 2020-07-16 Annika Lenz develops an interactive preference measurement method which provides dynamic preference adjustment to assess alternatives in terms of utility for an individual decision maker throughout the requirements negotiation process Consequently interactive dynamic decision support is designed which can handle changes related to requirements dynamically An empirical study shows that the newly developed method is both objectively and subjectively more efficient than a static alternative Thus it is argued that efficient preference adjustment enables decision support based on up to date preferences The designed support component is compared to two state of the art approaches for

decision support in requirements negotiations **Advances in Case-Based Reasoning** Klaus-Dieter Althoff, Ralph Bergmann, Mirjam Minor, Alexandre Hanft, 2008-08-26 This book constitutes the refereed proceedings of the 9th European Conference on Case Based Reasoning ECCBR 2008 held in Trier Germany in September 2008 The 34 revised research papers and 5 revised application papers presented together with 3 invited talks were carefully reviewed and selected from 71 submissions All current issues in case based reasoning are addressed ranging from theoretical and methodological issues to advanced applications in various fields such as knowledge discovery similarity context awareness uncertainty and health sciences **A Guided Tour of Artificial Intelligence Research** Pierre Marquis, Odile Papini, Henri Prade, 2020-05-08 The purpose of this book is to provide an overview of AI research ranging from basic work to interfaces and applications with as much emphasis on results as on current issues It is aimed at an audience of master students and Ph D students and can be of interest as well for researchers and engineers who want to know more about AI The book is split into three volumes the first volume brings together twenty three chapters dealing with the foundations of knowledge representation and the formalization of reasoning and learning Volume 1 Knowledge representation reasoning and learning the second volume offers a view of AI in fourteen chapters from the side of the algorithms Volume 2 AI Algorithms the third volume composed of sixteen chapters describes the main interfaces and applications of AI Volume 3 Interfaces and applications of AI Implementing reasoning or decision making processes requires an appropriate representation of the pieces of information to be exploited This first volume starts with a historical chapter sketching the slow emergence of building blocks of AI along centuries Then the volume provides an organized overview of different logical numerical or graphical representation formalisms able to handle incomplete information rules having exceptions probabilistic and possibilistic uncertainty and beyond as well as taxonomies time space preferences norms causality and even trust and emotions among agents Different types of reasoning beyond classical deduction are surveyed including nonmonotonic reasoning belief revision updating information fusion reasoning based on similarity case based interpolative or analogical as well as reasoning about actions reasoning about ontologies description logics argumentation and negotiation or persuasion between agents Three chapters deal with decision making be it multiple criteria collective or under uncertainty Two chapters cover statistical computational learning and reinforcement learning other machine learning topics are covered in Volume 2 Chapters on diagnosis and supervision validation and explanation and knowledge base acquisition complete the volume Handbook of Generalized Pairwise Comparisons Marc Buyse, Johan Verbeeck, Everardo D. Saad, Mickaël De Backer, Vaiva Deltuvaite-Thomas, Geert Molenberghs, 2025-03-31 In today's healthcare landscape there is a pressing need for quantitative methodologies that include the patients perspective in any treatment decision Handbook of Generalized Pairwise Comparisons Methods for Patient Centric Analysis provides a comprehensive overview of an innovative and powerful statistical methodology that generalizes the traditional Wilcoxon Mann Whitney test by extending it to any number of outcomes of any type and including thresholds

Judgments, Decisions, and Public Policy

Mothakapalli Venkatappa Rajeev Gowda, Jeffrey C. Fox, 2002 Behavioral decision theory draws on experimental research in cognitive psychology to provide a descriptively accurate model of human behavior It shows that people systematically violate the normative assumptions of economic rationality by miscalculating probabilities and making choices based on one economic criteria Behavioral decision theory's ability to capture the complexity of human judgments and choices makes it a useful foundation for improving public policy analysis design and implementation This volume showcases the research of leading scholars who are working on applications of behavioral decision theory in diverse policy settings It is designed to give policy analysts and practitioners who are non psychologists a clearer understanding of the complexities of human judgment and choice and an idea of how to integrate behavioral decision theoretic insights into the policy sciences This interdisciplinary volume should be insightful and useful wherever people's judgments and choices matter for policy formulation acceptance and effectiveness

Algorithms for Optimization Mykel J. Kochenderfer, Tim A. Wheeler, 2019-03-12 A comprehensive introduction to optimization with a focus on practical algorithms for the design of engineering systems This book offers a comprehensive introduction to optimization with a focus on practical algorithms The book approaches optimization from an engineering perspective where the objective is to design a system that optimizes a set of metrics subject to constraints Readers will learn about computational approaches for a range of challenges including searching high dimensional spaces handling problems

where there are multiple competing objectives and accommodating uncertainty in the metrics Figures examples and exercises convey the intuition behind the mathematical approaches The text provides concrete implementations in the Julia programming language Topics covered include derivatives and their generalization to multiple dimensions local descent and first and second order methods that inform local descent stochastic methods which introduce randomness into the optimization process linear constrained optimization when both the objective function and the constraints are linear surrogate models probabilistic surrogate models and using probabilistic surrogate models to guide optimization optimization under uncertainty uncertainty propagation expression optimization and multidisciplinary design optimization Appendixes offer an introduction to the Julia language test functions for evaluating algorithm performance and mathematical concepts used in the derivation and analysis of the optimization methods discussed in the text The book can be used by advanced undergraduates and graduate students in mathematics statistics computer science any engineering field including electrical engineering and aerospace engineering and operations research and as a reference for professionals
