Elkheart David Petersen, 1998 From his self built cabin in the southern Rockies and throughout the wilderness West

Petersen has spent the past twenty years observing studying praising and defending the grand wild beasts that animate his daily world Especially so the elk a miraculous come back that through the 112 000 member Rocky Mountain Elk Foundation enjoys a larger and more dedicated fan club than even the grizzly bear or wolf In this tightly linked collection of essays Petersen takes us deep into the mountain forests to watch smell and talk with wapiti a Shawnee word meaning white rump and their wild neighbors reflecting with wisdom authority and humility on their evolution their behavior their daily lives and the impacts of the continued suburbanization of the West Our guide looks as well at the various creatures who prey on elk from insects to bears to people with guns In the latter instance Petersen steps boldly beyond conventional side taking to selectively praise the good and damn the bad his only loyalty being truth culminating with an exuberant condemnation of elk ranching and other forms of wildlife profiteering

The Better to Eat You With Joel Berger,2009-11-15 At dawn on a brutally cold January morning Joel Berger crouched in the icy grandeur of the Teton Range It had been three years since wolves were reintroduced to Yellowstone after a sixty year absence and members of a wolf pack were approaching a herd of elk To Berger s utter shock the elk ignored the wolves as they went in for the kill The brutal attack that followed swift and bloody led Berger to hypothesize that after only six decades the elk had forgotten to fear a species that had survived by eating them for hundreds of millennia Berger s fieldwork that frigid day raised important questions that would require years of travel and research to answer Can naive animals avoid extinction when they encounter reintroduced carnivores To what extent is fear culturally transmitted And how can a better understanding of current predator prey behavior help demystify past extinctions and inform future conservation The Better to Eat You With is the chronicle of Berger s search for answers From Yellowstone s elk and wolves to rhinos living with African lions and moose coexisting with tigers and bears in Asia Berger tracks cultures of fear in animals across continents and climates engaging readers with a stimulating combination of natural history personal experience and conservation Whether battling bureaucracy in the statehouse or fighting subzero wind chills in the field Berger puts himself in the middle of the action The Better to Eat You With invites readers to join him there The thrilling tales he tells reveal a great deal not only about survival in the animal kingdom but also the process of doing science in foreboding conditions and hostile environments

The Meat

Paradox Rob Percival, 2022-03-01 From a vital new voice in food ethics comes a smart nuanced investigation into the current meat debate Our future diet will be shaped by diverse forces It will be shaped by novel technologies by geopolitical tensions and the evolution of cultural preferences by shocks to the status quo pandemics and economic strife the escalation of the climate and ecological crises and by how we choose to respond It will also be shaped by our emotions It will be shaped by the meat paradox Should we eat animals was until recently a question reserved for moral philosophers and an ethically minded minority but it is now posed on restaurant menus and supermarket shelves on social media and morning television The recent surge in popularity for veganism in the UK Europe and North America has created a rupture in the rites and rituals of meat challenging the cultural narratives that sustain our omnivory In *The Meat Paradox* Rob Percival an expert in the politics of meat searches for the evolutionary origins of the meat paradox asking when our relationship with meat first became emotionally and ethically complicated Every society must eat and meat provides an important source of nutrients But every society is moved by its empathy We must all find a way of balancing competing and contradictory imperatives This new book is essential reading for anyone interested in the origins of our empathy the psychology of our dietary choices and anyone who has wondered whether they should or shouldn't eat meat
