**Embodiment of a Nation** Cecelia TICH, Cecelia Tichi, 2009-06-30 From Harriet Beecher Stowe's image of the Mississippi's bosom to Henry David Thoreau's Cape Cod as the bared and bended arm of Massachusetts the American environment has been represented in terms of the human body Exploring such instances of embodiment Cecelia Tichi exposes the historically varied and often contrary geomorphic expression of a national paradigm *Ecosocial Theory, Embodied Truths, and the People's Health* Nancy Krieger, 2021-09-17 From public health luminary Nancy Krieger comes a revolutionary way of addressing health justice and the embodied truths of lived experience Since the 1700s fierce debates in medicine and public health have centered around whether sources of ill health can be attributed to either the individual or the surrounding body politic But what if instead health researchers measure and policies address how people biologically embody their societal and ecological context *Ecosocial Theory Embodied Truths and the People's Health* represents a daring new foray into analyzing how population patterns of health reveal the intersections of lived experience and biology in historical context Expanding on Nancy Krieger's original ecosocial theory of disease distribution this volume lays new theoretical groundwork about embodiment and health justice through concrete and novel examples involving pathways such as workplace discrimination relationship abuse Jim Crow police violence pesticides fracking green space and climate change It offers a crucial counterargument to dominant biomedical and public health narratives attributing causality to either innate biology or decontextualized health behaviors and provides a key step forward towards understanding and addressing the structural drivers of health inequities and health justice Bridging insights from politics history sociology ecology biology and public health *Ecosocial Theory Embodied Truths and the People's Health* presents a bold new framework to transform biomedical and population health thinking practice and policies and to advance health equity across a deeply threatened planet Reading Embodied Citizenship Emily Russell, 2011-02-25 Liberal individualism a foundational concept of American politics assumes an essentially homogeneous population of independent citizens When confronted with physical disability and the contradiction of seemingly unruly bodies however the public searches for a story that can make sense of the difference The narrative that ensues makes abnormality an important part of the dialogue about what a genuine citizen is though its role is concealed as an exception to the rule of individuality rather than a defining difference *Reading Embodied Citizenship* brings disability to the forefront illuminating its role in constituting what counts as U.S. citizenship Drawing from major figures in American literature including Mark Twain Flannery O'Connor Carson McCullers and David Foster Wallace as well as introducing texts from the emerging canon of disability studies Emily Russell demonstrates the place of disability at the core of American ideals The narratives prompted by the encounter between physical difference and the body politic require a new understanding of embodiment as a necessary conjunction of physical textual and social bodies Russell examines literature to explore and unsettle long held assumptions about American citizenship Faulkner and the Ecology of the

South Joseph R. Urgo, Ann J. Abadie, 2009-09-18 In 1952 Faulkner noted the exceptional nature of the South when he characterized it as the only really authentic region in the United States because a deep indestructible bond still exists between man and his environment The essays collected in Faulkner and the Ecology of the South explore Faulkner's environmental imagination seeking what Ann Fisher Wirth calls the ecological counter melody of his texts Ecology was not a term in common use outside the sciences in Faulkner's time However the word environment seems to have held deep meaning for Faulkner Often he repeated his abiding interest in man in conflict with himself with his fellow man or with his time and place his environment Eco criticism has led to a renewed interest among literary scholars for what in this volume Cecelia Tichi calls humanness within congeries of habitats and environments Philip Weinstein draws on Pierre Bourdieu's notion of habitus Eric Anderson argues that Faulkner's fiction has much to do with ecology in the sense that his work often examines the ways in which human communities interact with the natural world and François Pitavy sees Faulkner's wilderness as unnatural in the ways it represents reflections of man's longings and frustrations Throughout these essays scholars illuminate in fresh ways the precarious ecosystem of Yoknapatawpha County

**Bodies, Embodiment, and Theology of the Hebrew Bible** S. Tamar Kamionkowski, Wonil Kim, 2010-05-20 Recognizing that human experience is very much influenced by inhabiting bodies the past decade has seen a surge in studies about representation of bodies in religious experience and human imaginations regarding the Divine The understanding of embodiment as central to human experience has made a big impact within religious studies particularly in contemporary Christian theology feminist cultural and ideological criticism and anthropological approaches to the Hebrew Bible Within the sub field of theology of the Hebrew Bible the conversation is still dominated by assumptions that the God of the Hebrew Bible does not have a body and that embodiment of the divine is a new concept introduced outside of the Hebrew Bible To a great extent the insights regarding how body discourse can communicate information have not yet been incorporated into theological studies
