Introduction To Modernity:

Introduction to Modernity Henri Lefebvre, 2012-01-16 Originally published in 1962 when Lefebvre was beginning his career as a lecturer in sociology at the University of Strasbourg it established his position in the vanguard of a movement which was to culminate in the events of May 1968 A classic analysis of the modern world using Marxist dialectic it is a book which supersedes the conventional divisions between academic disciplines With dazzling skill Lefebvre moves from philosophy to sociology from literature to history to present a profound analysis of the social political and cultural forces at work in France and the world in the aftermath of Stalin s death an analysis in which the contours of our own postmodernity appear with startling clarity Modernity Stuart Hall, David Held, Don Hubert, Kenneth Thompson, 1996 Introduction to modernity: a symposium on eighteenth-century thought Robert Mollenauer, Introduction to Modernity Robert Mollenauer, 1965 **All that is Solid Melts Into Air** Marshall Berman, 1983 The experience of modernization the dizzying social changes that swept millions of people into the capitalist world and modernism in art literature and architecture are brilliantly integrated in this account **Introduction to modernity** Robert Mollenauer, 1960 Introduction to Modernity University of Texas. Department of Germanic languages (Austin), 1965 The Dilemma of Modernity Lawrence E. Cahoone, 1988-01-01 The development of modern culture along subjectivist lines has led to an analogue of psychological narcissism to philosophical narcissism in the culture The intrinsic value of human cultural activity has been lost and the intellectual foundation of the modern world view has been destroyed Cahoone carefully develops the idea of subjectivity and narcissism using psychological theory the dialectical theory of the Frankfurt school and historians The core of his interpretive argument is developed through careful analysis of Descartes and Kant as well as of Husserl and Heidegger Cahoone maintains a carefully controlled continuity between the analysis of philosophic positions and what they reveal about culture In the conclusion he moves toward a recreation of culture in non subjectivist naturalism Insights are drawn from Freud Fairbairne Winnicott Kohut Sennett Lasch Horkheimer Adorno Dewey Cassirer Kundera and Buchler *Liquid Modernity* Zygmunt Bauman, 2013-07-10 In this new book Bauman examines how we have moved away from a heavy and solid hardware focused modernity to a light and liquid software based modernity This passage he argues has brought profound change to all aspects of the human condition The new remoteness and unreachability of global systemic structure coupled with the unstructured and under defined fluid state of the immediate setting of life politics and human togetherness call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history This book is dedicated to this task Bauman selects five of the basic concepts which have served to make sense of shared human life emancipation individuality time space work and community and traces their successive incarnations and changes of meaning *Liquid Modernity* concludes the analysis undertaken in Bauman s two previous books *Globalization The Human Consequences* and *In Search of Politics Together* these volumes form a brilliant analysis of the changing conditions of

social and political life by one of the most original thinkers writing today **Tradition through Modernity** Pertti J. Anttonen, 2018-03-14 In their study of social practices deemed traditional scholars tend to use the concept and idea of tradition as an element of meaning in the practices under investigation But just whose meaning is it Is it a meaning generated by those who study tradition or those whose traditions are being studied In both cases particular criteria for traditionality are employed whether these are explicated or not Individuals and groups will no doubt continue to uphold their traditional practices or refer to their practices as traditional While they are in no way obliged to explicate in analytical terms their criteria for traditionality the same cannot be said for those who make the study of traditions their profession In scholarly analysis traditions need to be explained instead of used as explanations for apparent repetitions and replications or symbolic linking in social practice values history and heritage politics This book takes a closer look at tradition and folklore in order to conceptualize them within discourses on modernity and modernism The first section discusses modern and traditional as modern concepts and the study of folklore as a modern trajectory The underlying tenet here is that non modernity cannot be represented without modern mediation which therefore makes the representations of non modernity epistemologically modern The second section focuses on the nation state of Finland and the nationalistic use of folk traditions in the discursive production of Finnish modernity and its Others The insights are applicable worldwide in discussions on cultural representation [The Oxford Handbook of History and International Relations](#) Mlada Bukovansky, Edward Keene, Christian Reus-Smit, Maja Spanu, 2023-08-03 Historical approaches to the study of world politics have always been a major part of the academic discipline of International Relations and there has recently been a resurgence of scholarly interest in this area This Oxford Handbook examines the past and present of the intersection between history and IR and looks to the future by laying out new questions and directions for research Seeking to transcend well worn disciplinary debates between historians and IR scholars the Handbook asks authors from both fields to engage with the central themes of modernity and granularity Modernity is one of the basic organising categories of speculation about continuity and discontinuity in the history of world politics but one that is increasingly questioned for privileging one kind of experience and marginalizing others The theme of granularity highlights the importance of how decisions about the scale and scope of historical research in IR shape what can be seen and how one sees it Together these themes provide points of affinity across the wide range of topics and approaches presented here The Handbook is organized into four parts The first Readings gives a state of the art analysis of numerous aspects of the disciplinary encounter between historians and IR theorists Thereafter sections on Practices Locales and Moments offer a wide variety of perspectives from the longue dur e to the ephemeral individual moment and challenge many conventional ways of defining the contexts of historical enquiry about international relations Contributors come from a range of academic backgrounds and present a diverse array of methodological and philosophical ideas as well as their various historical interests The Oxford Handbooks of International Relations is a twelve

volume set of reference books offering authoritative and innovative engagements with the principal sub fields of International Relations The series as a whole is under the General Editorship of Christian Reus Smit of the University of Queensland and Duncan Snidal of the University of Oxford with each volume edited by specialists in the field The series both surveys the broad terrain of International Relations scholarship and reshapes it pushing each sub field in challenging new directions Following the example of Reus Smit and Snidal s original Oxford Handbook of International Relations each volume is organized around a strong central thematic by scholars drawn from different perspectives reading its sub field in an entirely new way and pushing scholarship in challenging new directions

Milk, Modernity and the Making of the Human Richie Nimmo,2010-02-25 This book undertakes a critique of the pervasive notion that human beings are separate from and elevated above the nonhuman world and explores its role in the constitution of modernity The book presents a socio material analysis of the British milk industry in the late nineteenth and early twentieth centuries It traces the dramatic development of the milk trade from a cottage industry into a modernised and integrated system of production and distribution examining the social economic and political factors underpinning this transformation and also highlighting the important roles played by various nonhumans such as microbes refrigeration technologies diseases and even cows themselves Milk as a substance posed deep social and material problems for modernity being hard to transport and keep fresh as well as a highly fertile environment for the growth of bacteria and the transmission of diseases such as tuberculosis from cows to humans Milk Modernity and the Making of the Human demonstrates how the resulting insecurities and dilemmas posed a threat to the nature culture divide as milk consumption grew along with urbanization and had therefore to be managed by emergent forms of scientific and sanitary knowledge and expertise Milk Modernity and the Making of the Human is an ideal volume for any researcher interested in the hybrid socio material economic and political factors underpinning the transformation of the milk industry

Waldner, 2024-07-01 This volume focuses on the connection between modern design and architectural practices and the construction of sacred spaces Not only language and ritual but space place and architecture play a significant role in constructing special or religious spaces However this concept of a constructed sacred space remains undertheorized in religious studies and the history of art and architecture in general This volume therefore revisits the question of a modern sacred space from an interdisciplinary perspective focusing on religion space and architecture during the emergence of the modern period and up until contemporary times Revisiting the ways in which modern architects and artists have endeavored

to create sacred spaces and buildings for the modern world will address the underlying questions of how religious ideas especially those related to esotericism and to alternative religiosities have transformed the way sacred spaces are conceptualized today
