Introduction To Neurology

Ellen McHenry

Introduction To Neurology:

An Introduction to Neurology Charles Judson Herrick,1922 An Introduction to Neurology Charles Judson Herrick,1934 *Introduction to Clinical Neurology* Douglas James Gelb,2024 The sixth edition of Introduction to Clinical Neurology continues to present a straightforward approach to diagnosing diseases of the nervous system using a systematic process in which the site of dysfunction is deduced based on knowing streamlined summaries of a few clinically relevant nervous system pathways It provides a comprehensive discussion of how to do a neurologic exam and how to interpret it In clear and concise prose Dr Gelb explains the neurologic diseases and presenting symptoms that non neurologists are likely to encounter in practice *An Introduction to Neurology* C. Judson Herrick,1920 **Introduction to Clinical Neurology** Douglas James Gelb,2005 Provides clear sensible discussions of common neurologic conditions detailing the initial examination interpretation of results diagnosis treatment options and more The author s systematic approach to patient management and his reader friendly style makes complex information easy to understand and apply Emphasizing the information necessary for success on clinical rotations and clerkships in neurology the book approaches neurology the way it is taught by clinical instructors and offers step by step guidance on performing the initial neurologic examination Includes problem solving aids for the interpretation of difficult examination results Introduction to Clinical Neurology Douglas J. Gelb MD,2016-04-12 Newly updated to reflect recent discoveries fifth edition of Introduction to Clinical Neurology covers all the take home points beneficial to everyone who relies on this quick and handy guide This book focuses on the how and why of clinical neurology It includes extensive factual material about individual disease processes but the emphasis is on information that is important for understanding why patients with neurologic conditions are managed the way they are This book covers what clinicians need to know in order to assess and manage the patients they will encounter in general medical practice including the application of a logical approach to diagnosis neurologic examination and how to interpret the findings and the management of specific disease categories and symptoms A highly accessible and engaging text this is the go to in all things neurology *An Introduction to Clinical Neurology* Alan Guberman,1994 Introduction to Clinical Neurology Douglas Gelb, MD, PhD,2010-11-23 All clinicians regardless of their specialty encounter patients with weakness altered sensation headaches spells dizziness sleepiness mental status changes and other symptoms that reflect dysfunction of one or more parts of the nervous system Clinicians need to know how to evaluate such patients how to determine if the patients are likely to have a neurologic condition and how to manage them at least in the initial stages This book written by the lead author of the widely cited Neurology Clerkship Core Curriculum covers the material that clinicians need to know in order to assess and manage the patients they will encounter in general medical practice The focus throughout is on the how and why of clinical neurology Naturally the book includes extensive factual material about individual disease processes but the emphasis is on information that is important for understanding why patients with neurologic conditions are managed the way

they are The first three chapters of the book present a systematic way to think about patients with neurologic symptoms applying a logical approach to diagnosis rather than relying on pattern recognition Because the neurologic examination is fundamental to diagnosis this book provides a detailed description of how to perform each step of the examination and an even more extensive discussion of how to interpret the findings The remaining chapters cover the management of specific disease categories and symptoms always stressing the reasons for doing particular tests and the rationale for the various treatment options Although the book does not cite the original literature it reflects the most current evidence available at the time of publication *An Introduction to Neurology* Charles Judson Herrick,1918 The Brain Ellen McHenry,2008-01-01

This is an in depth introduction to neurology for ages 8 14 The first 96 pages are a student text broken into 10 chapters Each chapter has two levels so that students of varying ages abilities and interest levels can use the same curriculum Topics covered are brain anatomy including inner brain and ventricles left right brain neuron anatomy and physiology including types of glial cells neuronal networks memory learning peripheral nervous system autonomic systems senses reflexes blood brain barrier sleep brain disorders and famous doctors and patients The text is high content but easy to understand Cartoon characters in the margins add plenty of humor too At the end of each chapter there are some activities such as word puzzles review questions coloring activities and suggestions for supplemental videos via a special channel on YouTube The 40 page teacher section gives instructions for activities such as board games active group games crafts and labs Ideal for use in a group because of so many game suggestions but also great for home use as well *The Brain* Ellen Johnston McHenry,2011

An Introduction to Neurology C Judson (Charles Judson) 186 Herrick,2018-02-07 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Long Island Medical Journal* Henry Goodwin Webster,Paul Monroe Pilcher, Frank Overton,Alec Nicol Thomson,1928 **Neurological and Sensory Disease, Film Guide, 1966** United States.
