into sharp focus through relatable examples and clear explanations of philosophy's big questions and arguments. The second edition of this accessible textbook is organized around seven central philosophical problems including ethics, the existence of God, free will, personal identity, philosophy of mind, and epistemology. New to this edition is a chapter on political philosophy that explores the state of nature, anarchy, contractarianism, libertarianism, and the liberal state. These self-contained chapters have been reordered and recalibrated to best suit the needs of introductory philosophy courses and can be taught independently or in sequence. Enhanced by updated examples, new hyperlinks, and references, and detailed bibliographies, the book is complemented by extensively revised online resources available to instructors, including a 200-question test bank and over 450 PowerPoint slides designed to strengthen student comprehension of key concepts. Strengthening the popular first edition which launched the series, *This is Philosophy: An Introduction*, Second Edition is the perfect primary textbook for beginning philosophy students as well as general readers with an interest in philosophy.

Introduction to Philosophy George Thomas White, Patrick, Frank Miller, Chapman, 1958

What Does It All Mean? Thomas Nagel, 1987-10-15. In this cogent and accessible introduction to philosophy, the distinguished author of *Mortal Questions* and *The View From Nowhere* sets forth the central problems of philosophical inquiry for the beginning student. Arguing that the best way to learn about philosophy is to think about its questions directly, Thomas Nagel considers possible solutions to nine problems: knowledge of the world beyond our minds, knowledge of other minds, the mind-body problem, free will, the basis of morality, right and wrong, the nature of death, the meaning of life, and the meaning of words. Although he states his own opinions clearly, Nagel leaves these fundamental questions open, allowing students to entertain other solutions and encouraging them to think for themselves.
