**Bioterrorism Threat , Germ Warfare** Amy Romano, Margaux Baum, 2016-07-15 Among the most fearsome tools of the modern era of war and certainly one of the most controversial biological weapons exist within the arsenals of many nations This book discusses the history of biological warfare from ancient times through the modern era and examines the various types of weaponized organisms that can and have been used by nations and may be used by nonstate actors in potential acts of bioterrorism It also documents the preventative measures that governments and the international community employ to curtail the use of these thankfully rarely used but nonetheless terrifying weapons *Bioterrorism with CD-ROM* Robert J. Ursano, Ann E. Norwood, Carol S. Fullerton, 2004-06-17 In addition to planning and pre disaster exercises essential for allocating resources and devising effective mental health interventions this book also includes two CDs showing an international panel of experts discussing how best to plan for a bioterrorist event Although only twelve people died after the sarin gas attack on the Tokyo subway system in 1995 more than five thousand sought medical care for the effects of possible exposure Bioterrorism can create chaos and disruption on a national and international scale Moreover it is believed to incur

the most devastating psychological sequelae of all disasters

### **Countering the Proliferation of Weapons of Mass**

**Destruction** Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region's geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO's political and military posture Thanos P Dokos presents an assessment of the Alliance's options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers

shocking exposé of the reckless proliferation of bio weapon research and the threat this poses to everyday Americans Battling a new generation of corporate giants and uncovering threats right in our own backyard Kenneth King's *Germs Gone Wild* reveals the massive expansion of America's bio defense research labs and the culture of deception surrounding hundreds of facilities that have opened since 9/11 King experienced the menace of bio defense research firsthand when local government and business leaders tried to lure a new facility to his hometown in Kentucky Researching the safety claims he not only found many of them to be completely false but was also horrified by the lack of oversight and the recklessness with which these labs genetically modified pathogens like smallpox Ebola and influenza without a care for what happened to the public if there was ever a leak And yet the greed that drove the development of these labs has effectively counteracted any cautionary checks by the government and universities All have been seduced by the economic gains and corporate stipends that come with compliance and turning a blind eye But now the reality of these labs and the germs they manipulate will finally be brought to light as King examines the controversies surrounding plants from Maryland to Boston and Utah to the Department of Homeland Security's dubious National Bio and Agro Facility NBAF project and the precautions or lack thereof being taken to protect us all from a deadly pandemic
