During the last four years, based on the experience of most of the best experts around the world, CIRP The International Academy for Production Engineering has decided to prepare and structure a Network of Excellence NoE proposal. The European Community accepted to found the VRL KCiP Virtual Research Laboratory Knowledge Community in Production. As its name indicates, its aim of this NoE was really to build a Knowledge Community in Production. This was possible and realistic because the partners were representative of the most important universities in Europe and also because of strong partnerships with laboratories far from Europe: Japan, Australia, South Africa, USA, etc. Based on such powerful partnership, the main issue was to help European manufacturing industry to define and structure the strategic knowledge in order to face the strategic worldwide challenges. Manufacturing in Europe currently has two essential aspects: 1. It has to be knowledge intensive given the European demands for high tech products and services e.g. electronics, medicines.
