Hidden Technocrats The New Class And New Capitalism:

Hidden Technocrats Hansfried Kellner, Frank W. Heubeger, In the early 1970s many social scientists and critics noted the emergence of a new elite based on the Knowledge Industry and pitted against the old business based middle class both politically and culturally This work attempts to delineate the features of the New Class phenomenon and map its structural location in contemporary American and Western European societies **A Political Economy of Neotribal Capitalism**

Elizabeth Rata, 2000-01-01 Among the unintended and largely unforeseen consequences of globalization are the fundamental transformations of local relationships both economic and cultural that occur within communities drawn into the predominantly capitalist world economy Democracy once considered the essential political mode of regulation for successful capitalist economies is being replaced by nondemocratic modes of social organization as localized responses to global forces such as Maori tribalization in New Zealand are subverted and transformed A Political Economy of Neotribal Capitalism looks at the past three decades in New Zealand and the shifts in the relationship between the indigenous Maori people and the dominant Pakeha white society to illustrate these fundamental changes to national political social and economic structures The book includes a case study of a Maori family a theoretical exploration of the concept of neotribal capitalism and discussions of themes such as changing socioeconomic relations new social movements the indigenization of ethnicity dominant group ethnic group realignment and the antidemocratic ideologies of late capitalism themes of interest to students of world political economics international relations and anthropology *Citizenship and Identity* Engin F Isin, Patricia K.

Wood, 1999-12-07 This book provides an introduction to themes within citizenship and identity The authors draw together debates in sociology political theory and cultural gender studies to show how the civil political and social meanings of citizenship have been redefined by postmodernization and globalization **Theories of the Information Society** Frank Webster, 2007-01-24 Coping in an era of information flows of virtual relationships and breakneck change poses challenges to one and all In Theories of the Information Society Frank Webster makes sense of the information explosion taking a sceptical look at what thinkers mean when they refer to the Information Society and critically examines the major post war theories and approaches to informational development This third edition brings the book right up to date with both new theoretical work and social and technological changes such as the rapid growth of the Internet and accelerated globalization reassessing the work of key theorists in light of these changes This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post war era It addresses issues of central concern to students of sociology politics communications information science cultural studies computing and librarianship **White**

Backlash and the Politics of Multiculturalism Roger Hewitt, 2005-06-23 The murder of Stephen Lawrence led to the widest review of institutional racism seen in the UK Sections of the white working class communities in south London near to the scene of the murder however displayed deep hostility to the equalities and multiculturalist practice of the local state and

other agencies Drawing on extensive ethnographic research this book relates these phenomena to the backlash to multiculturalism evident during the 1990s in the USA Australia Canada the UK and other European countries It examines these within the unfolding social and political responses to race equalities in the UK and the USA from the 1960s to the present in the context of changes in social class and national political agendas This book is unique in linking a detailed study of a community at a time of its critical importance to national debates over racism and multiculturalism to historically wider international economic and social trends *Tampering with Tradition* Peter Bogason, Sandra Kensen, Hugh Theodore Miller, 2004-01-01 Scholars of politics are comfortable theorizing about the parliamentary process and individual political parties but they are often guilty of ignoring the role of individual citizens except through opinion polls and voting statistics Even at the local level the main focus of political theorists has traditionally been on formal systems of government usually lauding representative democracy as the standard for Western government while the importance of participatory action at a local level has been vastly underestimated Correcting this imbalance the renowned political scholars who contribute to this volume outline both the theory and practice of so called extra formal democracy wherein societal governance is more accurately described as a network activity and citizens politicians public administrators and other professionals act together on issues or problems that are defined as public This new and complex form of democracy explored here in three unique settings the United States the Netherlands and Denmark is increasingly regarded as an achievable vision for a multi faceted theory of government **Surveyors of Customs** Joel Pfister, 2016 Introduction the critical work and critical pleasure of American literature Inner self industries soft capitalism s reproductive logic How America works getting personal to get personnel Dress down conquest Americanizing top down as bottom up Afterword payoffs **Reforming New Zealand Secondary Education** R. Openshaw, 2009-08-31 This timely book argues that the New Zealand educational reforms were the product of longstanding unresolved educational issues that came to a head during the profound economic and cultural crisis of the 1970s and early 1980s Mobilizing Regions, Mobilizing Europe Sebastian M. Buettner, 2013-10-23 Regional development strategies are becoming more similar all around Europe even though regional differences are more pronounced than ever and many European regions have become more autonomous actors This thesis of a peculiar standardized diversification of sub national space in the modern European Union is the point of departure of this book Based upon the analytical premises of Stanford School Sociological Institutionalism Sebastian M B ttner studies regional mobilization in contemporary Europe from a new and innovative perspective He highlights the importance of scientific expertise and global scientific models in contemporary regional development practice and exemplifies their significance with the example of region building in Poland in the course of EU integration This new wave of regional mobilization is not just conceived as an effect of local national or European politics but as an expression of a larger conceptual shift in governing society and space This well researched and clearly argued book not only provides fresh insights into region building and regionalization in

contemporary European space but also contributes to the new sociology of Europeanization It will be an illuminating read for scholars and students in Sociology European and EU studies International Relations Cultural Studies Geography Regional Science Polish Studies and related subject areas *Social Entrepreneurship and Social Enterprises* Linda Lundgaard Andersen, Malin Gawell, Roger Spear, 2016-06-23 Migrant women stepping into ethnic catering homeless men employed to take care of bees producing honey for sale young people on the edge getting microcredit funding to start social businesses or former criminals joining forces to create social and economic structures for an honest lifestyle These initiatives capture the transformative power of social enterprise and might indicate how social enterprises have the potential to make a difference for people and societies The Nordic countries represent an interesting case Social enterprises and co operatives played a significant part in paving the way for the Nordic solidaristic welfare state As the welfare state grew civil society organizations and co operatives lost ground to a certain extent But in recent decades the welfare state has been restructured and simultaneously the concepts social entrepreneurship and social enterprises have gained attention The Nordic context with extensive public welfare structures and a high degree of citizens participation in public affairs might affect the emergence of social entrepreneurship and social enterprises **Globalizing Social Rights** S. Kott, J. Droux, 2013-03-20 Based on the case of the ILO both as an actor and driver of international social policy this collection explores the internationalization process of social rights in a number of national and international contexts This collection brings together a variety of new scholarship by a group of highly qualified and internationally renowned scholars **Saving the Protestant Ethic** Andrew Lynn, 2023 Andrew Lynn draws on archival research and interviews with movement leaders to survey and assess the surging number of new organizations books conferences worship songs seminary classes vocational programming and study groups promoting classically Protestant and Calvinist ideas of work and vocation with American Evangelicalism

Power/knowledge/pedagogy Dennis Carlson, 2018-03-05 The essays in this volume explore the educational implications of unsettling shifts in contemporary culture associated with postmodernism These shifts include the fragmentation of established power blocs the emergence of a politics of identity growing inequalities between the haves and the have nots in a new global economy and the rise in influence of popular culture in defining who we are In the academy postmodernism has been associated with the emergence of new theoretical perspectives that are unsettling the way we think about education These shifts the authors suggest are deeply contradictory and may lead in divergent political directions some of them quite dangerous Power Knowledge Pedagogy examines these issues with regard to four broad domains of educational inquiry state educational policy and curriculum reform student identity formation the curriculum as a text and critical pedagogy The book contributes to the dialogue on the forging of a new commonsense discourse on democratic educational renewal attuned to the changing times in which we live *Property and Power in Social Theory* Dick Pels, 2002-08-26 Property and power perform a key role in social and political theories of class inequality and social stratification however theorists have yet

clearly to define these concepts their mutual boundaries and scopes of application This book answers the property power puzzle by undertaking a broad historical inquiry into its intellectual origins and present day effects through a series of case studies including Marxism vs anarchism the fascist assertion of the primacy of the political social science as power theory the managerial revolution the knowledge society and the new intellectual classes The Waning of the Welfare State Anton Zijderveld, 2018-04-17 The welfare state in postwar Western Europe has been extended and intensified in a spectacular manner Today welfare represents a complex mix of services covering health education welfare the arts leisure and social security Anton C Zijderveld is of the opinion that Europe s vast comprehensive welfare state is becoming leaner and meaner heading down a more sober path toward decentralization and deregulation which only but not merely secures order for its citizens and shields society s vulnerable As the millennium approaches Zijderveld believes Europe is experiencing a cultural renaissance and a socioeconomic and political reformation in which the market will flourish and civil society will prosper The Waning of the Welfare State focuses on the transformation of the welfare state in Europe over a four decade period Zijderveld employs the democratic triangle theoretical model in which democracy is viewed as a system in which state market and civil society are held in precious balance If one component supersedes the other two democracy is endangered In its 1960s and 1970s heyday the state took center stage at the expense of the market and civil society social democracy was the prevailing ideology In the 1980s the market triumphed often at the expense of both the state and civil society this was the decade of liberalism Today civil society prevails albeit at risk of being injurious to state and market Ideologically this is the decade of conservatism Zijderveld sees a future Americanization of European social policy producing a fortuitously balanced coalition of social democracy liberalism and conservatism a place where safety and order prosperity and economic participation and social participation and meaningful interactions flourish equally This transformation carries many risks But it will in the end strengthen Europe s political economic and sociocultural stamina If it also draws the Atlantic partners closer together as Zijderveld believes it does the chances of another European communist libertarian or fascist Gtterdommerung will remain remote Zijderveld presents useful concepts in a highly organized fashion He has produced a very important book for American readers who will hopefully discover beyond the often vast differences some basic similarities of structures and developments within the European welfare state *The Church as Polis* Arne Rasmusson, 2025-02-15 Political theology is one of the most influential theological movements of the latter part of the twentieth century and yet as Arne Rasmusson argues here the field suffers from deep inherent tensions in its attempt to mediate the Christian tradition and the modern emancipatory tradition Rasmusson contributes to political theology through an innovative discussion of the relationship between church and society and an exposition of the thought and work of political theology s influential representative J rgen Moltmann Rasmusson further refines his argument by filtering Moltmann s theology through an exploration of Stanley Hauerwas s theological positions *Cultural Economy* Paul du Gay, Michael Pryke, 2002-01-31 Phrases such as corporate

culture market culture and the knowledge economy have now become familiar clarion calls in the world of work They are calls that have echoed through organizations and markets Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution In particular the once clean divide that placed the economy dealt with mainly by economists on one side and culture addressed chiefly by those in anthropology sociology and the other cultural sciences on the other can no longer hold This volume presents the work of an international group of academics from a range of disciplines including sociology media and cultural studies social anthropology and geography all of whom are involved not only in thinking culture into the economy but thinking culture and economy together

Technology and Globalisation David Pretel,Lino Camprubí,2018-06-13 This book examines the role of experts and expertise in the dynamics of globalisation since the mid nineteenth century It shows how engineers scientists and other experts have acted as globalising agents providing many of the materials and institutional means for world economic and technical integration Focusing on the study of international connections *Technology and Globalisation* illustrates how expert practices have shaped the political economies of interacting countries entire regions and the world economy This title brings together a range of approaches and topics across different regions transcending nationally bounded historical narratives Each chapter deals with a particular topic that places expert networks at the centre of the history of globalisation The contributors concentrate on central themes including intellectual property rights technology transfer tropical science energy production large technological projects technical standards and colonial infrastructures Many also consider methodological theoretical and conceptual issues

Times of the Technoculture Kevin Robins, Frank Webster,2003-09-02 *Times of the Technoculture* explores the social and cultural impact of new technologies tracing the origins of the information society from the coming of the machine with the industrial revolution to the development of mass production techniques in the early twentieth century The authors look at how the military has controlled the development of the information society and consider the centrality of education in government attempts to create a knowledge society Engaging in contemporary debates surrounding the internet Robins and Webster question whether it can really offer us a new world of virtual communities and suggest more radical alternatives to the corporate agenda of contemporary technologies

Science and the Good James Davison Hunter,Paul Nedelisky,2018-01-01 Why efforts to create a scientific basis of morality are neither scientific nor moral In this illuminating book James Davison Hunter and Paul Nedelisky trace the origins and development of the centuries long passionate but ultimately failed quest to discover a scientific foundation for morality The new moral science led by such figures as E O Wilson Patricia Churchland Sam Harris Jonathan Haidt and Joshua Greene is only the newest manifestation of that quest Though claims for its accomplishments are often wildly exaggerated this new iteration has been no more successful than its predecessors But rather than giving up in the face of this failure the new moral science has taken a surprising turn Whereas earlier efforts sought to demonstrate what is right and wrong the

new moral scientists have concluded ironically that right and wrong don't actually exist. Their perhaps unwitting moral nihilism turns the science of morality into a social engineering project. If there is nothing moral for science to discover, the science of morality becomes at best a feeble program to achieve arbitrary societal goals. Concise and rigorously argued, *Science and the Good* is a definitive critique of a would-be science that has gained extraordinary influence in public discourse today and an exposé of that project's darker turn.
