Multiple Criteria Problem Solving S. Zionts, 2012-12-06 The objective of this conference was to foster a healthy exchange of ideas and experience in the domain of multiple criteria problem solving This conference was an outgrowth of an earlier conference I organized with Herve Thiriez at CESA Jouy en Josas France in 1975 during my stay at the European Institute in Brussels When I re joined the State University of New York at Buffalo that year I began to search for potential sponsors for this conference Approximately one year later when the prospects began to look promising I contacted several individuals to act as an informal coordinating committee for the conference I wanted to avoid biasing the conference completely to my way of thinking The members of this committee were Jim Dyer Peter Fishburn Ralph Keeney Bernard Roy Universite de Paris IX Dauphine who was unable to participate in the conference and Milan Zeleny Though the committee did not meet per se their inputs regarding format possible participants number of participants length of the conference and so on were of great value to me in planning and organizing the conference I wish to acknowledge the contributions of this group We were most fortunate in obtaining the financial support of the European Institute for Advanced Studies in Management Brussels one of the sponsors of the Jouy en Josas conference the Office of Naval Research and the State University of New York at Buffalo

Hydraulic Parameter Identification Luc C. Lebbe, 2012-12-06 Hydraulic parameter identification is a crucial step in hydrogeological investigations The book proposes a unique and generalized interpretation method for single and multiple pumping tests made in groundwater reservoirs with layered heterogeneity and with or without lateral anisotropy This method eliminates the drawbacks of the numerous and frequently applied interpretation methods The book also presents an introduction to inverse modeling resulting in optimal parameter values with their joint confidence region and the corresponding residuals Cross sections through this multidimensional region elucidate the relation between the shape of this region and some statistical parameters describing the reliability of the identified parameters This method is demonstrated by means of five pumping or recharge tests

Evolutionary Algorithms for Solving Multi-Objective Problems Carlos Coello Coello, Gary B. Lamont, David A. van Veldhuizen, 2007-08-26 Solving multi objective problems is an evolving effort and computer science and other related disciplines have given rise to many powerful deterministic and stochastic techniques for addressing these large dimensional optimization problems Evolutionary algorithms are one such generic stochastic approach that has proven to be successful and widely applicable in solving both single objective and multi objective problems This textbook is a second edition of *Evolutionary Algorithms for Solving Multi Objective Problems* significantly expanded and adapted for the classroom The various features of multi objective evolutionary algorithms are presented here in an innovative and student friendly fashion incorporating state of the art research The book disseminates the application of evolutionary algorithm techniques to a variety of practical problems including test suites with associated performance based on a variety of appropriate metrics as well as serial and parallel algorithm implementations
