High Command:

The Soviet High Command John Erickson, 2019-07-11 This book aims to furnish a history of the origins and development of Soviet military leadership together with a survey of its relations with the Communist Party and the governmental apparatus within the chronological limits of the first attempts to organise the Red Army and a military command

Inside Hitler's High Command Geoffrey P. Megargee, 2000-06-08 Challenging previous accounts Geoffrey Megargee shatters the myth that German generals would have prevailed in World War II if only Hitler had not meddled in their affairs Indeed Megargee argues the German high command was much more flawed than many have suspected or acknowledged Inside Hitler's High Command reveals that while Hitler was the central figure in many military decisions his generals were equal partners in Germany's catastrophic defeat Megargee exposes the structure processes and personalities that governed the Third Reich's military decision making and shows how Germany's presumed battlefield superiority was undermined by poor strategic and operational planning at the highest levels His study tracks the evolution of German military leadership under the Nazis from 1933 to 1945 and expands our understanding of the balance of power within the high command the role of personalities in its organizational development and the influence of German military intellectuals on its structure and function He also shows how the organization of the high command was plagued by ambition stubbornness political intrigue and overworked staff officers And his a week in the life chapter puts the high command under a magnifying glass to reveal its inner workings during the fierce fighting on the Russian Front in December 1941 Megargee also offers new insights into the high command crises of 1938 and shows how German general staff made fatal mistakes in their planning for Operation Barbarossa in 1941 Their arrogant dismissal of the Soviet military's ability to defend its homeland and virtual disregard for the extensive intelligence and sound logistics that undergirded successful large scale military campaigns ultimately came back to haunt them In the final assessment observes Megargee the generals' strategic ideas were no better than Hitler's and often worse Heinz Guderian Franz Halder and the rest were as guilty of self deception as their Fuhrer believing that innate German superiority and strength of will were enough to overcome nearly any obstacle Inside Hitler's High Command exposes these surprising flaws and illuminates the process of strategy and decision making in the Third Reich

Conflict and Controversy in the Confederate High Command Dennis B. Conklin, 2025-05-30 The Atlanta Campaign of 1864 played a pivotal role in shaping the outcome of the American Civil War and bolstering Abraham Lincoln's reelection in November securing the path to eventual Union victory Long overshadowed this Georgia campaign has experienced a resurgence of interest over the past decade Dennis B Conklin contributes to this growing body of scholarship with Conflict and Controversy in the Confederate High Command Davis Johnston Hood and the Atlanta Campaign of 1864 Conklin's account originally a Ph D dissertation examines the dysfunctional relationships that plagued the Confederate high command contributing to the defeat of the Army of Tennessee and the loss of Atlanta a vital logistical rail hub He highlights

critical flaws in Jefferson Davis's leadership and the deep mutual distrust between the Confederate president and Joseph E Johnston commander of the Army of Tennessee which led them to work at cross purposes As the campaign slowly unfolded and William T Sherman's advancing armies claimed vast swaths of territory tensions escalated among Davis Johnston corps commander John Bell Hood and Georgia Governor Joseph Brown further compounding the Confederacy's strategic woes Davis's initial unease with Johnston's leadership partly explains why he promoted Hood to command an infantry corps in the principal Western army before the campaign began Hood who had honed his skills as a tactical commander under the aggressive Robert E Lee in the Army of Northern Virginia grew increasingly exasperated by Johnston's repeated withdrawals This tension Conklin argues culminated in their inevitable clash at Cassville a pivotal dispute driven by inconsistent maps and divergent battlefield philosophies The ensuing correspondence among key figures in Richmond further eroded Davis's confidence in Johnston paving the way for Hood's eventual rise to command the Army of Tennessee Conflict and Controversy in the Confederate High Command offers a compelling and briskly paced exploration of command politics human nature and the pressures of war illuminating how these forces shaped the outcome of one of the Civil War's most consequential campaigns

The Soviet High Command, 1967-1989 Dale Roy Herspring, 2014-07-14 The recent transformations in the USSR are nowhere more evident than in the Soviet military Top level military officers have been relieved of their positions Gorbachev has warned of lean times for the military the symbolic role of the armed forces has been downgraded and the concept of military sufficiency points to major modifications in Soviet force structure Contrary to some who see Gorbachev as a Sir Galahad out to slay the evil military high command Dale Herspring concludes that the relationship between the highest Soviet political and military leaders is at the moment more symbiotic than conflictual In this first in depth study of the evolution of civil military relations in the Soviet Union from 1967 to the present he shows how the views of senior military officers have varied over time currently even if the members of the high command do not like all Gorbachev's changes they understand the need for them and are prepared to live with them As Herspring looks at the personalities and politics of eight top military figures he reveals that the most important of them Ogarkov was the first senior Soviet military officer to understand the value of working with the political leadership Ogarkov believed that the arms control and détente processes if carefully managed could enhance the national security of the USSR In Gorbachev the Soviet military has found the type of individual that Ogarkov was seeking Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

McClellan and the Union High Command, 1861-1863 Jeffrey W. Green, 2017-02-19 With Washington's proximity to the Confederate

capital of Richmond Union military operations in the first two years of the Civil War focused mainly on the Eastern Theater where General McClellan commanded the Army of the Potomac. McClellan's on to Richmond battle cry dominated strategic thinking in the high command. When he failed and was sacked by President Lincoln, a coterie of senior officers sought his return. This re-examination of the high command and McClellan's war in the East provides a broader understanding of the Union's inability to achieve victory in the first two years and takes the debate about the Union's leadership into new areas.

The Prisoners of War and German High Command V. Vourkoutiotis, 2003-07-08 Based on archival research in Germany, Great Britain, the USA, and Canada, this study provides the first complete examination of the relationship between the Oberkommando der Wehrmacht, German Armed Forces High Command, and Anglo-American prisoners of war. German military policy is compared with reports of almost one thousand visits by Red Cross and Protecting Power inspectors to the camps, allowing the reader to judge how well the policies were actually put into practice and what their impact was on the lives of the captured soldiers, sailors, and airmen. **High Command** Terry Hekker, John Masters, 1984 Confronted by several German battalions, the British Expeditionary Force fleeing to the rear, the commanding officer suffering a loss of nerve, the regiment is captive to the decision of Major Bill Miller. **Military Intelligence**, 1985 *Executive Agreement Series* United States.
