HPC@Green IT Ralf Gruber, Vincent Keller, 2010-03-15 Making the most of computer systems has rapidly become a leading topic of interest for the computer industry and its customers alike However the focus of these discussions is often on single isolated and speci c architectural and technological improvements for power reduction and conservation while ignoring the fact that power of ciency as a ratio of performance to power consumption is equally in uenced by performance improvements and architectural power red tion Furthermore of ciency can be in uenced on all levels of today s

system hi archies from single cores all the way to distributed Grid environments To improve execution and power ef ciency requires progress in such diverse elds as program optimization optimization of program scheduling and power reduction of idling system components for all levels of the system hierarchy Improving computer system ef ciency requires improving system performance and reducing system power consumption To research and reach reasonable conc sions about system performance we need to not only understand the architectures of our computer systems and the available array of code transformations for p formance optimizations but we also need to be able to express this understanding in performance models good enough to guide decisions about code optimizations for speci c systems This understanding is necessary on all levels of the system hierarchy from single cores to nodes to full high performance computing HPC systems and eventually to Grid environments with multiple systems and resources High Performance Computing Julian M. Kunkel, Rio Yokota, Michela Taufer, John Shalf, 2017-10-18 This book constitutes revised selected papers from 10 workshops that were held as the ISC High Performance 2017 conference in Frankfurt Germany in June 2017 The 59 papers presented in this volume were carefully reviewed and selected for inclusion in this book They stem from the following workshops Workshop on Virtualization in High Performance Cloud Computing VHPC Visualization at Scale Deployment Case Studies and Experience Reports International Workshop on Performance Portable Programming Models for Accelerators P 3MA OpenPOWER for HPC IWOPH International Workshop on Data Reduction for Big Scientific Data DRBSD International Workshop on Communication Architectures for HPC Big Data Deep Learning and Clouds at Extreme Scale Workshop on HPC Computing in a Post Moore's Law World HCPM HPC I O in the Data Center HPC IODC Workshop on Performance and Scalability of Storage Systems WOPSSS IXPUG Experiences on Intel Knights Landing at the One Year Mark International Workshop on Communication Architectures for HPC Big Data Deep Learning and Clouds at Extreme Scale ExaComm Creativity in Computing and DataFlow SuperComputing, 2017-01-02 Creativity in Computing and DataFlow Supercomputing the latest release in the Advances in Computers series published since 1960 presents detailed coverage of innovations in computer hardware software theory design and applications In addition it provides contributors with a medium in which they can explore topics in greater depth and breadth than journal articles typically allow As a result many articles have become standard references that continue to be of significant lasting value in this rapidly expanding field Provides in depth surveys and tutorials on new computer technology Presents well known authors and researchers in the field Includes extensive bibliographies with most chapters Contains extensive chapter coverage that is devoted to single themes or subfields of Advances on Broadband and Wireless Computing, Communication and Applications Leonard computer science Barolli, Fang-Yie Leu, Tomoya Enokido, Hsing-Chung Chen, 2018-10-18 This book presents on the latest research findings and innovative research methods and development techniques related to the emerging areas of broadband and wireless computing from both theoretical and practical perspectives Information networking is evolving rapidly with various kinds of

networks with different characteristics emerging and being integrated into heterogeneous networks As a result a number of interconnection problems can occur at different levels of the communicating entities and communication networks hardware and software design These networks need to manage an increasing usage demand provide support for a significant number of services guarantee their QoS and optimize the network resources The success of all IP networking and wireless technology has changed the way of life for people around the world and the advances in electronic integration and wireless communications will pave the way for access to the wireless networks on the fly This in turn means that all electronic devices will be able to exchange the information with each other in a ubiquitous way whenever necessary
