## **High Return Low Risk Investing Using Stock Selection And Market Timing:**

*High-return, Low-risk Investment* Thomas J. Herzfeld, Robert F. Drach (author), 1993 Right from Chapter 1 you'll see that High Return Low Risk Investment is no ordinary stock market investment guide. The reader is going to experience a journey into the stock market guided by two internationally recognized professionals who have demonstrated their capacity for attaining consistent profitability where most others fail. Over the past 16 years through boom times and the infamous crash of 1987, Thomas J. Herzfeld and Robert F. Drach have enjoyed exceptionally consistent success. Now you can learn the techniques behind the authors' success and follow their guidance in specific stock selection and market timing. First, Herzfeld and Drach dissect how the market works and how its participants behave so that you can take full advantage of your fellow investors' weaknesses. In their words, "We are entering into a predator-prey relationship. The stock market is not a team sport." Next, they show you how to recognize and seize areas of opportunity. At the heart of High Return Low Risk Investment are the authors' specific methods of risk reduction based on combining stock selection with market timing. Herzfeld and Drach also show how to construct a master list of stocks to be used during buy and sell indications. What's more, readers of this book can receive updated master lists from the authors FREE for the asking, making it possible for your investment in High Return Low Risk Investment to repay itself many times over. If you're a new or risk-averse investor, you'll appreciate this book's emphasis on low risk. More experienced investors will relish the authors' blunt criticisms of well-known investment theories and systems, including hedging, indexing, random walk theories, pyramiding, beta factor calculations, historical repetition, dollar cost averaging, and others. Those considering nonstock investments will find incisive coverage of options, bonds, and closed-end funds. And all readers will enjoy Herzfeld and Drach's inside tips on dealing with brokers. In short, High Return Low Risk Investment delivers a total strategy, hard-nosed, realistic, with a documented winning record that will help you decode the signals and conquer the stock market. *A Modern Approach to Graham and Dodd Investing* Thomas P. Au, 2004-03-29 An updated approach to classic security analysis. The principles of value investing outlined by Graham and Dodd in the 1940s continue to be used today by individuals and companies who face challenging investment decisions. *A Modern Approach to Graham and Dodd Investing* examines the classic Graham and Dodd approach to valuation and updates it for the twenty-first century. Thomas Au, a credentialed analyst with a leading insurance company and an ex-Value Line analyst, reworks the basics of value investing from net present value, financial statement analysis, and return on capital to return and leverage, asset allocation, and diversification. Through case studies and real-time analysis, *A Modern Approach to Graham and Dodd Investing* presents readers with examples that will make analysis and portfolio theory more relevant and powerful. Thomas P. Au, Hartford, CT, is a Vice President and Portfolio Manager for the investment arm of a large insurance and healthcare provider. His specialty is emerging and international markets. He received his BA cum laude with a double major in economics and history from Yale.
