High Cheekbones:

High Cheekbones, Pouty Lips, Tight Jeans Alan Farrell, 2007 Film reviews from the pages of The Advocate by Alan F. Farrell. By special arrangement with the author third and expanded edition. This is a collection of reviews written as durable and significant essays, not as newspaper fillers. They are artful and readable, funny and highly memorable social cultural commentary, not plot description and pro studio puff pieces. Nominated for the 2006 Library of Virginia Literary Awards in Nonfiction. Sex and Society Marshall Cavendish Corporation, 2010-09. Moving beyond a partial view of only biology and psychology, this work also examines the wide sociological dimensions of sex. *Sexual Nature/Sexual Culture* Paul R. Abramson, Steven D. Pinkerton, 1995-06. In this multidisciplinary study of human sexuality, an international team of scholars looks at the influences of nature and nurture, biology and culture, and sex and gender in the sexual experiences of humans and other primates. Using as its center the idea that sexual pleasure is the primary motivational force behind human sexuality and that reproduction is simply a byproduct of the pleasurable nature of sex, this book examines sexuality at the individual, societal, and cultural levels. Beginning with a look at the evolution of sexuality in humans and other primates, the essays in the first section examine the sexual ingenuity of primates, the dominant theories of sexual behavior, the differences in male and female sexual interest and behavior, and the role of physical attractiveness in mate selection. The focus then shifts to biological approaches to sexuality, especially the genetic and hormonal origins of sexual orientation, gender, and pleasure. The essays go on to look at the role of pleasure in different cultures. Included are essays on love among the tribespeople of the Brazilian rain forest and the regulation of adolescent sexuality in India. Finally, several contributors look at the methodological issues in the study of human sexuality, paying particular attention to the problems with research that relies on people's memories of their sexual experiences. The contributors are Angela Pattatucci, Dean Hamer, David Greenberg, Frans de Waal, Mary McDonald Paveika, Kim Wallen, Donald Symons, Heino Meyer Bahlburg, Jean D. Wilson, Donald Tuzin, Lawrence Cohen, Thomas Gregor, Lenore Manderson, Robert C. Bailey, Alice Schlegel, Edward H. Kaplan, Richard Berk, Paul R. Abramson, Paul Okami, and Stephen D. Pinkerton. Spanning the chasm of the nature versus nurture debate, *Sexual Nature/Sexual Culture* is a look at human sexuality as a complex interaction of genetic potentials and cultural influences. This book will be of interest to a wide range of readers, from scholars and students in psychology, anthropology, sociology, and history to clinicians, researchers, and others seeking to understand the many dimensions of sexuality. If we ever expect to solve the sexually based problems that modern societies face, we must encourage investigations of human sexual behavior. Moreover, those investigations should employ a broad range of disciplines, looking at sex from all angles, which is precisely what *Sexual Nature/Sexual Culture* does. Mike May, American Scientist. This timely and relevant book reminds us that we cannot rely on simple solutions to complex problems. It represents a transdisciplinary approach, integrating knowledge from diverse fields and providing the reader with a challenging and rewarding experience. Especially for those who are involved in teaching human sexuality to medical students.

and other health care professionals this book is highly recommended Gerald Wiviott M D Journal of Nervous and Mental Disease In short this volume contains much to stimulate inform and amuse in varying proportions What more can one ask Pierre L van den Berghe Journal of the History of Sexuality the book succeeds in bring together some of the sharpest thinkers in the field of human sexuality and goes a long way toward clarifying the diverse perspectives that currently exist David M Buss and Todd K Shackelford Quarterly Review of Biology

The Ethics of Working Class Autobiography Elizabeth Bidinger,2006-07-19 The ethical dimension of autobiography is emerging as an important area of study Scholars now recognize that an autobiography must be read with an element of caution since it represents not so much the literal truth as the author s perception of people and events a perspective sometimes unflattering to those portrayed Focusing on the ethics of autobiography this volume analyzes the works of four writers who spent much of their youth in working class circumstances yet became highly educated intellectual professionals It examines the ways in which each author confronts his or her past and how the authors represent their working class family members Texts discussed are *Growing Up* by Russell Baker 1982 *Brothers and Keepers* by John Edgar Wideman 1984 *A Woman in Amber* by Agate Nesaule 1995 and *Clear Springs* by Bobbie Ann Mason 1999 Each work
