"A mystic's view of the universe  
looks toward a world unseen,  
but an unseen world that is believed in  
fervently nonetheless, like the belief  
in rainfall, and the belief in water,  
where there is little, or none.

It is a religion.

It is a religion in which  
the unseen rain might yet fall, and  
it is a religion that worships not rain,  
but the ghosts of rain."

Ernest Anderson, 2013-10-24 This book is a must read for researchers interested in extensional tectonics in general and the Neogene tectonics of the Basin and Range in particular because it challenges on the basis of more than 50 years of field studies the existing paradigm of province wide uniformly large extension and replaces it with a model integrating extension with extension normal shortening both as primary strains The first chapter takes the reader on two journeys southwestward from central Utah through the Lake Mead area the first to emphasize the lack of uniformly distributed or integrated extension and the second to highlight left lateral shear at 13 localities along the east margin of the Basin and Range that is kinematically compatible with right lateral shear along the west margin The compatibility provides a basis for understanding the extreme Neogene tectonics of the Lake Mead area The second chapter summarizes multifaceted field evidence from the well studied eastern Lake Mead area as a focused example of the need for a complete revision of the extensional paradigm Publisher's description **Northern Paiutes of the Malheur** David H. Wilson, Jr., 2022-05 2023 Oregon Book Award Finalist In 1870 a twenty six year old Paiute Sarah Winnemucca wrote to an army officer requesting that Paiutes be given a chance to settle and farm their ancestral land in Oregon Country The eloquence of her letter was such that it made its way into Harper's Weekly Ten years later as her people languished in confinement as a result of the Bannock War she convinced Secretary of the Interior Carl Schurz to grant the requests in her letter and to free the Paiutes as well Schurz's decision unleashed a furious campaign of disinformation by the Bureau of Indian Affairs cattlemen and settlers overturning Schurz's decision sweeping truth aside and falsely branding Paiute chief Egan as instigator of the war To this day histories of the Paiutes appear to be unanimous in their mistaken claim

that Egan led his Paiutes into the Bannock War Indian agents betrayal of the people they were paid to protect saddled Paiutes with responsibility for a war that most opposed and that led to U S misappropriation of their land their only source of life s necessities With neither land nor reservation Paiutes were driven more deeply into poverty and disease than any other Natives of that era In Northern Paiutes of the Malheur David H Wilson Jr pulls back the curtain to reveal what government officials hid exposing the full jarring injustice and after 140 years recounting the Paiutes true and proud history for the first time

*Convincing Ground* Bruce Pascoe, 2007 Convincing Ground pulses with love of country In this powerful lyrical and passionate new work Bruce Pascoe asks us to fully acknowledge our past and the way those actions continue to influence our nation today both physically and intellectually The book resonates with ongoing debates about identity dispossession memory and community Pascoe draws on the past through a critical examination of major historical works and witness accounts and finds uncanny parallels between the techniques and language used there to today's national political stage He has written the book for all Australians as an antidote to the great Australian inability to deal respectfully with the nation's constructed Indigenous past For Pascoe the Australian character was not forged at Gallipoli Eureka and the back of Bourke but in the furnace of Murdering Flat Convincing Ground and Werribee He knows we can't reverse the past but believes we can bring in our soul from the fog of delusion Pascoe proposes a way forward beyond shady intellectual argument and immature nationalism with our strengths enhanced and our weaknesses acknowledged and addressed

*The Nation's Largest Landlord* James R. Skillen, 2009-09-02 It is the largest landholder in America overseeing nearly an eighth of the country 258 million acres located almost exclusively west of the Mississippi River with even twice as much below the surface Its domain embraces wildlife and wilderness timber range and minerals and for over 60 years the Bureau of Land Management has been an agency in search of a mission This is the first comprehensive analytical history of the BLM and its struggle to find direction James Skillen traces the bureau's course over three periods its formation in 1946 and early focus on livestock and mines its 1970s role as mediator between commerce and conservation and its experience of political gridlock since 1981 when it faced a powerful antienvironmental backlash Focusing on events that have shaped the BLM's overall mission organization and culture he takes up issues ranging from the National Environmental Policy Act to the Sagebrush Rebellion in order to paint a broad picture of the agency's changing role in the American West Focusing on the vast array of lands and resources that the BLM manages he explores the complex and at times contradictory ways that Americans have

valued nature Skillen shows that although there have been fleeting moments of consensus over the purpose of national forests and parks there has never been any such consensus over the federal purpose of the public lands overseen by the BLM Highlighting the perennial ambiguities shadowing the BLM's domain and mission Skillen exposes the confusion sown by conflicting congressional statutes conflicting political agendas and the perennial absence of public support He also shows that while there is room for improvement in federal land management the criteria by which that improvement is measured change significantly over time In the face of such ambiguity political social and economic Skillen argues that the agency's history of limited political power and uncertain mission has ironically better prepared it to cope with the more chaotic climate of federal land management in the twenty first century Indeed operating in an increasingly crowded physical and political landscape it seems clear that the BLM's mission will continue to be marked by ambiguity For historians students public administrators or anyone who cares about American lands Skillen offers a cautionary tale for those still searching for a final solution to federal land and resource conflicts

sources such as desalination of brackish water and seawater along with reusing treated wastewater will be required to meet future water supply needs Also changing climatic conditions will force water management systems to be more robust so that future water supply demands can be met as droughts become more intense and rainfall events become more intense A range of water management techniques are described and discussed in order to illustrate the methods for integrating these measures within the context of arid lands conditions
