Political Problems and Personalities in Contemporary Maryland Theodore F. Sheckels, Carl T. Hyden, 2022-11-08

Political Problems and Personalities in Contemporary Maryland provides a comprehensive rhetorical analysis of contemporary politics and political communication in Maryland at both the state and local levels Theodore F Sheckels and Carl Hyden approach rhetoric in a broader sense arguing that actions by political players including decisions on housing policy urban redevelopment policy and transportation policy are not in a separate category from their messages In many cases they argue actions are messages often with important material consequences Rather than focusing solely on previous or upcoming elections as political communication has traditionally been examined Sheckels and Hyden give considerable space to non election topics responding to current shifts in political communication scholarship and encouraging others to examine political communication at the local and state levels elsewhere in the United States Scholars of communication political science rhetoric and history will find this book of particular interest Only in Santa Fe Denise Kusel, 2004-09 A transplanted Californian and columnist for The Santa Fe New Mexican shares stories she s coaxed out of the local people revealing the culture history and charm of the unique Southwestern city U S History *Better Roads and Streets* ,1915

Changing Lanes Joseph F.C. DiMento, Cliff Ellis, 2014-08-29 The story of the evolution of the urban freeway the competing visions that informed it and the emerging alternatives for more sustainable urban transportation Urban freeways often cut through the heart of a city destroying neighborhoods displacing residents and reconfiguring street maps These massive infrastructure projects costing billions of dollars in transportation funds have been shaped for the last half century by the ideas of highway engineers urban planners landscape architects and architects with highway engineers playing the leading role In Changing Lanes Joseph DiMento and Cliff Ellis describe the evolution of the urban freeway in the United States from its rural parkway precursors through the construction of the interstate highway system to emerging alternatives for more sustainable urban transportation DiMento and Ellis describe controversies that arose over urban freeway construction focusing on three cases Syracuse which early on embraced freeways through its center Los Angeles which rejected some routes and then built I 105 the most expensive urban road of its time and Memphis which blocked the construction of I 40 through its core Finally they consider the emerging urban highway removal movement and other innovative efforts by cities to re envision urban transportation **Highway Topics** ,1923 *National Geographic* ,1976-07 **Poetry in Images** Robert Fanning, Human Rights and the Architecture of Conflict Tim Cunningham, 2025-09-16 Human Rights and the

Architecture of Conflict exposes how governments public officials and private actors on both sides of the Atlantic entrenched racial and ethnic divisions through manipulation of the planning and design of the built environment Based on interviews never before seen documents and field work carried out in Belfast Chicago Miami Washington D C and New York City this book shows how the planning and design of our built environment impacts the physical mental social economic political and environmental well being of communities Tim Cunningham an urban scholar and human rights advocate reveals how the British Army set about reconfiguring the urban fabric of Belfast as part of a counter insurgency strategy in the 1970s His research shows how the techniques used in Northern Ireland during this period mirror earlier processes deployed in U S cities under urban renewal and the Interstate Highway Program A global genealogy of segregation that examines the trajectory of colonial urbanism in the twentieth century the text highlights the real life walls and barriers that cleave communities along ethnic and racial lines and the role of architects planners developers and public officials in erecting them The final chapter considers some contemporary efforts to address the legacy of these practices through restorative architecture and planning initiatives that aim to deliver more cohesive sustainable and inclusive urban spaces This book is ideal reading for courses in architecture city planning community development geography human rights sociology transitional justice urban studies and Irish history

Overbuilt Erick Guerra,2025-07-08 The world s largest public works investment visible from space the Interstate Highway System and the hundreds of thousands of miles of supporting roadways are frequently hailed as a marvel and triumph of engineering President Eisenhower s 1956 Interstate Highway Act is often praised as a model of successful bipartisanship Today the extensive damage wreaked by the creation of the highway system and the ills of car dependency are more widely acknowledged Congestion and traffic deaths remain endemic despite nearly three quarters a century of public policies and trillions of dollars spent with a primary stated goal of reducing congestion and improving traffic safety The financing governance and construction models established by the 1956 act continue to influence what gets built today In Overbuilt The High Costs and Low Rewards of US Highway Construction transportation planning expert Erick Guerra describes how the US roadway system became overbuilt how public policy continues to encourage overbuilding what the scale and consequences of overbuilding are and how we can rethink our approach to highway building in the US Guerra explains that the national propensity to build roadways is no longer official or intentional policy Instead overbuilding stems from the institutions finance mechanisms and evaluation metrics developed in the first half of the twentieth century While more funds are set aside for transit walking biking and beautification the investment paradigm has not changed Planners and

engineers have not adjusted the tools they use to determine which roads should be built rebuilt or widened and why The country has added more lanes of urban Interstate since declaring the Interstate system complete than prior to it Despite having too much roadway the country is still operating in construction mode using the same basic approach used to finance and build the interstate system quickly Guerra states The interstate was completed more than three decades ago Overbuilt argues convincingly that it is time to move on **“And All Our Yesterdays...” and Nine Other Stories** Kenneth C.

Gardner Jr.,2014-05-22 The stories in All Our Yesterdays and Nine Other Stories continue to explore the lives of the Cockburn family and other characters in and around the fictional town of Menninger North Dakota first created in the novel The Song Is Ended and continued in the novel The Dark Between The Stars and the short stories in Meatball Birds and Seven Other Stories While the events and the characters found in the ten stories exist in rural and small town settings the themes explored have a universal appeal Minicars, Maglevs, and Mopeds Selima Sultana,Joe Weber,2016-04-18 This book

provides a fascinating look at the amazing diversity of forms of travel and transport around the world today in the context of cultures politics economics and environment of a place Across the timeline of human history transportation has played a role in the migration of people and information nation building economic development environmental alteration access to and the use of resources and even the fall of civilizations This single volume reference presents more than 150 entries that describe the most up to date surface transport technologies and routes in use on every continent including a broad range of road vehicles railroads person powered vehicles and even animals used for transportation The book melds transportation geography with culture politics economics and environment of place in its coverage of vehicles transportation technologies and some of the most famous streets rail systems and highways from around the world The entries are written by transport geography scholars to be accessible to general readers without technical backgrounds Each entry incorporates cross references that allow readers to easily find related entries making the book ideal for conducting specific research or completing school projects **In re City of Detroit, 261 MICH 278 (1933)** ,1933 88 **National Highway Program** United States.
