Psychotherapy without the Self Mark Epstein, 2008-10-01 Immersed in Buddhist psychology prior to studying Western psychiatry Dr Mark Epstein first viewed Western therapeutic approaches through the lens of the East This posed something of a challenge Although both systems promise liberation through self awareness the central tenet of Buddha's wisdom is the notion of no self while the central focus of Western psychotherapy is the self This book which includes writings from the past twenty five years wrestles with the complex relationship between Buddhism and psychotherapy and offers nuanced reflections on therapy meditation and psychological and spiritual development A best selling author and popular speaker Epstein has long been at the forefront of the effort to introduce Buddhist psychology to the West His unique background enables him to serve as a bridge between the two traditions which he has found to be more compatible than at first thought Engaging with the teachings of the Buddha as well as those of Freud and Winnicott he offers a compelling look at desire anger and insight and helps reinterpret the Buddha's Four Noble Truths and central concepts such as egolessness and emptiness in the psychoanalytic language of our time

Confession of a Buddhist Atheist Stephen Batchelor, 2010-03-02 Does Buddhism require faith Can an atheist or agnostic follow the Buddha's teachings without believing in reincarnation or organized religion This is one man's confession In his classic Buddhism Without Beliefs Stephen Batchelor offered a profound secular

approach to the teachings of the Buddha that struck an emotional chord with Western readers Now with the same brilliance and boldness of thought he paints a groundbreaking portrait of the historical Buddha told from the author's unique perspective as a former Buddhist monk and modern seeker Drawing from the original Pali Canon the seminal collection of Buddhist discourses compiled after the Buddha's death by his followers Batchelor shows us the Buddha as a flesh and blood man who looked at life in a radically new way Batchelor also reveals the everyday challenges and doubts of his own devotional journey from meeting the Dalai Lama in India to training as a Zen monk in Korea to finding his path as a lay teacher of Buddhism living in France Both controversial and deeply personal Stephen Batchelor's refreshingly doctrine-free life informed account is essential reading for anyone interested in Buddhism

Toward a Spiritual Research Paradigm

Jing Lin, Rebecca L. Oxford, Tom E. Culham, 2016-07-01 Spirituality and spiritual experiences have been the bedrock of every civilization and together form one of the highest mechanisms for making sense of the world for billions of people Current research paradigms due to their limitation to empirical sensory psychologically or culturally constructed realities fail to provide a framework for exploring this essential area of human experience The development of a spiritual research paradigm will provide researchers from the social sciences and education the tools and abilities to systematically explore fundamental questions regarding human spiritual experiences and spiritual growth A spiritual research paradigm requires an ontology that considers all reality to be multidimensional interconnected and interdependent It requires an epistemology that integrates knowing from outer sources as well as inner contemplation acknowledging our integration of soul and spirit with the body and mind Three additional aspects are useful to a spiritual research paradigm axiology methodology and teleology An axiology concerns what is valued good and ethical A methodology is the appropriate approach to systematic inquiry A fifth and less frequently mentioned aspect is teleology an explanation of the goal or end telos to which new knowledge is applied such as gaining wisdom and truth touching the divine increasing inner peace exploring hidden dimensions or improving society This book takes the first step to develop such a research paradigm We draw from world spiritual traditions as well as scholarship that has arisen from contemplative practices We also attempt to build a bridge between science and spirituality Spiritual research is not necessarily opposed to scientific research in fact each can shed light on the other
