Getting to Positive Outcomes for Children in Child Care Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, 2001-07-12 As a result of the heightened public and political attention and the movement toward standards and accountability performance measurement has emerged as an important concern in the early childhood care and education field At the request of the Department of Health and Human Services Administration for Children and Families the Board on Children Youth and Families convened two workshops to learn from existing efforts to develop performance measures for early childhood care and education to consider what would be involved in developing and implementing an effective performance measurement system for this field and to delineate some critical next steps for moving such an effort forward **The States of Child Care** Sara Gable, 2014

Gill, Jacob W. Dembosky, Jonathan Paul Caulkins, 2002 The Early Childhood Initiative ECI was an ambitious effort launched in Pittsburgh in 1996 to provide high quality early care and education services to at risk children on a countywide scale and under the direction of local neighborhood agencies Its goal was to improve the preparation of these children for kindergarten promote their long term educational attainment and give them the early tools to help them become productive successful members of society Initially funded by foundations and private donors ECI planned to become financially sustainable over the long term by persuading the state of Pennsylvania to commit to funding the program at the end of a startup period Four years after its launch ECI was far short of its enrollment targets the cost per child was significantly higher than expected and the effort to secure a commitment of state funding had failed ECI was therefore converted to a small scale demonstration program leaving a residue of disappointment in many communities around the county Although findings from a parallel study suggest that participating children may have derived substantial benefits from ECI it failed to achieve its goals in terms of scale and sustainability In the aftermath of ECI's scale down RAND was commissioned by the Heinz Endowments ECI's largest funder to study why ECI fell short of its objectives and to learn from its mistakes The findings of the study are presented in this report which summarizes ECI's organizational history analyzes and explains critical weaknesses that hindered ECI's ability to succeed and articulates lessons to inform the design and implementation of future large scale reform initiatives whether in early care and education or in other areas of social services **Early Childhood Interventions** Lynn A. parenting how to promote children's health foster social adjustment and cognitive competence and interact with school legal and public officials Contributors to the Handbook of Parenting have worked in different ways toward understanding all these diverse aspects of parenting and all look to the most recent research and thinking in the field to shed light on many topics every parent wonders about Each chapter addresses a different but central topic in parenting each is rooted in current thinking and theory as well as classical and modern research in that topic each has been written to be read and absorbed in a single sitting In addition each chapter follows a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classical and modern research forecasts of future directions of theory and research and a set of conclusions Of course contributors own convictions and research are considered but contributions to this new edition present all major points of view and central lines of inquiry and interpret them broadly The Handbook of Parenting is intended to be both comprehensive and state of the art As the expanded scope of this second edition amply shows parenting is naturally and closely allied with many other fields
