## Getting Equal:

**Getting Equal** Marilyn Lake, 1999-10-01 What woman today would accept losing her job or her nationality on marriage What mother would accept that she had no custody rights to her children Who would deny women the right to equal pay and economic independence Women today enjoy freedoms unimagined by their mothers and grandmothers the result of over 100 years of feminist activism in this country Getting Equal is the first full length history of the movements and their feisty ebullient determined leaders who fought for women s political and economic rights sexual and drinking rights the right to control their bodies and their destinies Getting Equal provides new understandings of women s activism and new perspectives on Australian politics it shows that feminists were leading theorists of citizenship and the welfare state and outspoken advocates of Aboriginal rights and international law But the goal of equality has also proved problematic participating in the world on men s terms has reinforced the masculine standard as the norm In this path breaking and lively study leading historian Marilyn Lake challenges common misconceptions and offers new interpretations of a politics that has swung between an emphasis on women s difference from men and a demand for the same rights as men It is her hope that a knowledge of the complexity of the past will enable us to be more clear sighted about what remains to be done **Equality**

**Introduction to Nonparametric Statistics** John E. Kolassa,2020-09-29 This textbook presents techniques for statistical analysis in the absence of strong assumptions about the distributions generating the data Rank based and resampling techniques are heavily represented but robust techniques are considered as well These techniques include one sample testing and estimation multi sample testing and estimation and regression Attention is paid to the intellectual development of the field with a thorough review of bibliographical references Computational tools in R and SAS are developed and illustrated via examples Exercises designed to reinforce examples are included Important techniques covered include Rank based techniques including sign Kruskal Wallis Friedman Mann Whitney and Wilcoxon tests are presented Tests are inverted to produce estimates and confidence intervals Multivariate tests are explored Techniques reflecting the dependence of a response variable on explanatory variables are presented Density estimation is explored The bootstrap and jackknife are discussed This text is intended for a graduate student in applied statistics The course is best taken after an introductory course in statistical methodology a course in elementary probability and a course in regression Mathematical prerequisites include calculus through multivariate differentiation and integration and ideally a course in matrix algebra

**Communication for Gender Sensitization** Manisha Pathak Shelat,2004 The Focus Is An Value Discussion Model In Communication For Gender Equality Among Adolescents Covers Gender Equality Gender Stereotyping Value Judgement And Value Classification Influence Of Sex On The Subject Profession Of Parents Their Education Etc All Those Working On Gender Equality Will Find It Useful Has Five Chapters And Seven Appendices And More Than Forty Tables     The Solidarity Approach in Geography Kavita Arora,Rashmi Rani Anand,2025-07-08 This contributed volume explains the concept of solidarity and illustrates how perspectives informed by a solidarity approach can be utilized in geographic research Geography offers a set of concepts and tools including space place scale landscape and mobility that makes it a particularly useful lens through which to view issues of solidarity It is distinct from other sciences in its subject matter and methodology but at the same time offers a multidisciplinary approach and transcends its disciplinary boundary The concept of solidarity in geography is illustrated here through nearly thirty five case chapters all from the Indian subcontinent Topics covered here include but are not limited to geographical approaches to solidarity in economic issues indigenous knowledge international relations global geopolitics climate change crisis management human health and more     Against Equality of Opportunity Matt Cavanagh,2002-02-14 Against Equality of Opportunity deals with the ways in which opportunities education jobs and other things which affect how people get on in life are distributed Take jobs should the best person always get the job Or should everyone be given an equal life chance Or can we somehow combine these two ideas saying that the best person should always get the job but that everyone should have an equal chance to become the best These seem to be the standard

views but this book argues that they are all flawed We need to understand meritocracy for what it is a technical rather than a moral ideal and we need to accept that equality just isn't something we should be striving for at all in this area We also need to rethink our approach to the related issue of discrimination We tend to assume discrimination is wrong because it violates either meritocracy or equality when in fact it is wrong for quite different reasons In all these areas then Cavanagh aims to loosen the grip of established ways of thinking in order that other ideas might find room to breathe This is particularly important in the case of meritocracy which after the recent conversion of the centre left now dominates the debate more than ever This book will be of interest to students and teachers of political philosophy but ultimately it is aimed at anyone who cares about the fundamental values that lie behind the way society is organized Though the argument is rigorous it does not require a professional philosophical training to follow it

**Economics Model Paper** SBPD Editorial Board, 2016-11-26

From the Bottom Up Kent Greenawalt, 2016-05-02 Kent Greenawalt's

From the Bottom Up constitutes a collection of articles and essays written over the last five decades of his career They cover a wide range of topics many of which address ties between political and moral philosophy and what the law does and should provide A broad general theme is that in all these domains what really is the wisest approach to difficult circumstances often depends on the particular issues involved and their context Both judges and scholars too often rely on abstract general formulations to provide answers A notable example in political philosophy was the suggestion of the great and careful scholar John Rawls that laws should be based exclusively on public reason The essays explain that given uncertainty of what people perceive as the line between public reason and their religious convictions the inability of public reason to resolve some difficult questions such as what we owe to higher animals and the feeling of many that their religious understanding should count urging exclusive reliance on public reason is not a viable approach Other essays show similar problems with asserted bases for legal interpretations and the content of provisions such as the First Amendment

**An Introductory Course on Mathematical Game Theory and**

**Applications** Julio González-Díaz, Ignacio García-Jurado, M. Gloria Fiestras-Janeiro, 2023-12-01 Game theory provides a

mathematical setting for analyzing competition and cooperation in interactive situations The theory has been famously applied in economics but is relevant in many other sciences such as psychology computer science artificial intelligence biology and political science This book presents an introductory and up to date course on game theory addressed to mathematicians and economists and to other scientists having a basic mathematical background The book is self contained providing a formal description of the classic game theoretic concepts together with rigorous proofs of the main results in the field The theory is illustrated through abundant examples applications and exercises The style is distinctively concise while offering motivations and interpretations of the theory to make the book accessible to a wide readership The basic concepts and results of game theory are given a formal treatment and the mathematical tools necessary to develop them are carefully presented In this second edition the content on cooperative games is considerably strengthened with a new chapter on applications of cooperative games and operations research including some material on computational aspects and applications outside academia
