Shadows Roberto Casati, 2007-12-18 In this original wide ranging and endlessly thought provoking work of popular nonfiction a leading science writer uncovers the pervasive presence of shadows in our

world For Plato shadows were the symbol of our limitations For Galileo they knocked the Earth from the center of the cosmos They are a source of fear and a symbol of ignorance and they loom large in art and design mythology and folklore physics and metaphysics and architecture and urban planning From shadows puppets and the psychology of shadows to the role of shadows in astronomy and the influence of shadows on the architectural profiles of our cities Roberto Casati awakens our fascination in this tour de force of investigation and imagination **Short Story Index** ,1989 The Intimate Universe

Marek Kukula,2015-10-01 The scale of the cosmos can be baffling with distances so vast and timescales so long that it s easy to dismiss them as being completely divorced from our everyday life But in this new book Dr Marek Kukula Public Astronomer at the Royal Observatory Greenwich shows you the myriad ways we are intrinsically connected to the rest of the universe and how everything on Earth from the ground beneath our feet to the technology in our pockets has origins in space Discover how rocks from space reveal what conditions are like at our planet s core how the desolate surface of the moon holds ancient clues to Earth s earliest life forms and how buried treasure in the Nile reveals the watery past of Mars Discover how the atoms of your own body were forged in the heart of a star how you can see the echo of creation on your TV and the ways in which technology developed for observing the most far flung corners of space is now used to diagnose potentially fatal human diseases The Intimate Universe is a curated tour of the most fascinating phenomena and discoveries in astronomy revealing how we are inextricably inspirationally linked to the cosmos *The 100 Most Outrageous Hoaxes and Mistakes* Susan Elkin,2017-12-15 Scientific breakthroughs are often regarded with suspicion especially those that diverge substantially from established theories New ideas are tested by scientists around the world to ensure that they hold up to scrutiny This book takes a look at the instances when despite these precautions the scientific community got it wrong The book includes the most infamous cases of fraud and famous mistakes that initially had scientists fooled We Know So Shamefully Little about the Moon Howard Simons,United States. The Dark Side of Translation Federico Italiano,2020-02-06 We tend to consider translation as something good virtuous and bright but it can also function as an instrument of concealment silencing and misdirection as something that darkens and obscures Propaganda misinformation narratives of trauma and imagery of the enemy to mention just a few of the negative phenomena that shape our lives show patterns of communication in which translation either functions as a weapon or constitutes a space of conflict But what does this dark side of translation look like How does it work Ground breaking in its theoretical conception and pioneering in its thematic approach this book unites international scholars from a range of disciplines including philosophy translation studies literary theory ecocriticism game studies history and political science With examples that illustrate complex theoretical and philosophical issues this book also has a major focus on the translational dimension of ecology and climate change Transdisciplinary and topical this book is key reading for researchers scholars and advanced students of translation studies literature and related areas Chapter 8 of this book is freely available as

Gottheimer, 2009-04-21 Ripples of Hope brings together the most influential and important civil rights speeches from the entire range of American history from the colonial period to the present. Gathered from the great speeches of the civil rights movement of African Americans, Asian Americans, gays, Hispanic Americans, and women, Ripples of Hope includes voices as diverse as Sister Souljah, Spark Matsui, and Harvey Milk, which taken as a whole constitute a unique chronicle of the modern civil rights movement. Featuring a foreword by President Bill Clinton and an afterword by Mary Frances Berry, this collection represents not just a historical first but also an indispensable resource for readers searching for an alternative history of American rhetoric. Edited and with an introduction by former Clinton speechwriter Josh Gottheimer, the stirring speeches that make up this volume provide an important perspective on our nation's development and will inform the future debate on civil rights.

NASA Technical Translation, 1973 The Expansion of Physical Quantities in Terms of the Irreducible Representations of the Scale-Euclidean Group and Applications to the Construction of Scale-invariant Correlation Functions

H. E. Moses, A. F. Quesada, 1972 The irreducible representations of the scale Euclidean group in three dimensions are introduced and the general tensor is expanded in terms of these representations. The cases of zero rank tensor, scalar, rank 1 tensor, vector, and rank 2 tensor are studied in detail. The expansion is shown to be a generalization of the Helmholtz expansion of a vector into rotational and irrotational parts. As in Part 1 of the work, Concepts One Dimensional Problems, the correlations that are introduced are invariant under changes of frames of reference. Correlations are set up between tensors of different ranks and dimensions. A correlation that measures a degree of isotropy is defined.

Bibliography of Lunar and Planetary Research, 1961 John W. Salisbury, Roger A. Van Tassel, Joel E. M. Adler, 1962 **The Fifth History of Man** John Bershof, MD, In the spirit of medieval writer Chaucer, all human activity lies within the artist's scope. The History of Man Series uses medicine as a jumping off point to explore precisely that: all history, all science, all human activity since the beginning of time. The jumping off style of writing takes the reader, the listener into worlds unknown, always returning to base only to jump off again. History of Man are stories and tales of nearly everything. The Fifth History of Man has a few parting shots at viruses but mostly continues with the world of parasites: from tick disease that ticks us off, Old Lyme, Connecticut, and Lyme disease, toxoplasmosis, Crazy Cat Lady, and her clowder of cats, then on into a discussion of the avatar of parasites, malaria. Our travels will venture down into the valley, Valley Girls, Valspeak, Valley Fever, fungus, and fungal infections. We'll jump into the biology of evolution, Darwin, Huxley, and the great debates, the geology of earthquakes, volcanos, the Ring of Fire, and Johnny Cash, and then through the homos: Homo habilis, Homo erectus, and Homo sapiens, and once the dust cleared, how the opposable thumbs, walking erect, and bigger brains left one man standing, one woman too. No discussion of human history can leave out the G.O.A.T. of French history, heck, of European history, the man, the legend, Napoleon Bonaparte, loved and
