accounts Includes a bibliography for further reading Perhaps not surprisingly given how advanced they were in comparison to contemporaries the Egyptians invented one of the first writing systems ever and for centuries people thought these ancient texts held some sort of secret be it aliens advanced technology lost to the world or mystical cures for all of the world's ills Even the ancient Egyptians saw their writing systems as full of mystery and hidden knowledge according to Egyptian mythology writing was invented by the ibis headed god Thoth the most intellectual of the gods He was a scribe also associated with mathematics medicine and astronomy and could appear as either an ibis or a baboon Thoth was originally a lunar god strongly associated with recording events and time He is more commonly known as the scribe who records judgment in the famous weighing of the heart scene in which a person's fate in the afterlife is decided To the Egyptians writing was a gift of the gods and should be used accordingly It was powerful and had the ability to create For example written formula offerings could provide sustenance in multiple ways including being written depicting the offerings and read aloud Each of these methods brought offerings to the recipient for all of eternity Speaking words was especially powerful as shown in myths where the gods create in this fashion One such myth is the Memphite Theology where the creator god Ptah creates other beings through the thoughts of his heart and the words of his mouth Furthermore writing a person or a god's name gave them power and erasing their names took the power away By placing his name on it a person or king could usurp a statue from someone else Since writing was hieroglyphic it was also art and the images held power This is evidenced by signs or images being disfigured in tombs or funerary settings so as not to hurt the owners These so called mutilated signs were often of serpents or other animals that were able to harm the deceased The signs might also be left incomplete for the same purpose That being said real people wrote these texts Some of the scribes might have considered themselves magicians but they weren't time travelers aliens or gods Ancient Egyptian writing is often extremely complex and filled with puns vague statements about religious mysteries and general witty banter In addition to those extremely well written and thought out texts there is also a range of personal letters administrative texts and even graffiti When reading some of these texts it is remarkable how similar the people of ancient Egypt were to people today when it came to their daily concerns and even the jokes they told The ancient Egyptian language was Afro Asiatic distantly related to Semitic and African ones and the writing system only used consonants and not vowels due to the root system This is similar to how Arabic or Hebrew is written today Most words had a root of two or three consonants and the vowels changed based on the form of the word Ancient Egyptian Language and Writing The History and Legacy of Hieroglyphs and Scripts in Ancient Egypt examines the history of writing in Egypt and how it evolved over thousands of years Along with pictures depicting important people places and events you will learn about Egyptian language and writing like never before *Hieroglyphs* Norma Jean Katan, Barbara Mintz, 1985 Explains the origins of hieroglyphs and what they mean tells how this ancient form of writing was decoded and describes the training and importance of scribes *The Hieroglyphics Handbook* Philip Ardagh, 1999 Learn to read and write the language of the
