High Performing Teacher:

Increasing Student Achievement through High-Performance Teacher Leadership Matthew J. Jennings, 2021-11-19

Teacher leadership has many potential benefits for colleagues and students. Unfortunately, due to unsupportive conditions and a lack of professional training, these benefits frequently do not materialize. To succeed, teacher leaders require a conducive school culture, supportive school administrators, time to complete responsibilities, appropriate incentives, and recognition and feedback designed to improve performance. In addition, highly effective teacher leaders participate in high quality professional learning intended to prepare them to fulfill their roles and responsibilities. This professional development prepares teacher leaders to utilize effective interpersonal skills, diagnose and manage school culture and politics, lead professional growth activities, provide instructional leadership, and assist with human resources management. This book provides the reader with both strategies for creating supportive conditions and the knowledge and skills required to meet the challenges of teacher leadership.

Discover how high performing systems shape teaching quality around the world. Producing highly skilled and committed teachers is not the work of a single innovative school or the aggregation of heroic individuals who succeed against the odds. In high performing countries, the opportunities for teachers to learn sophisticated practices and continue to improve are embedded systemically in education policies and practices. *Empowered Educators* describes how this seemingly magical work is done: how a number of forward thinking educational systems create a coherent set of policies designed to ensure quality teaching in all communities and how the results are manifested in practice. Spanning three continents and five countries, *Empowered Educators* examines seven jurisdictions that have worked to develop comprehensive teaching policy systems: Singapore and Finland, the states of New South Wales and Victoria in Australia, the provinces of Alberta and Ontario in Canada, and the province of Shanghai in China. Renowned education expert Linda Darling-Hammond and a team of esteemed scholars offer lessons learned in a number of areas that shape the teaching force and the work of teachers, shedding unprecedented light on areas such as teacher recruitment, preparation, induction, and mentoring, professional learning, career and leadership development, and more. Find out how quality teaching is developed and conducted across the globe. Discover a common set of strategies for developing, supporting, and sustaining the ongoing learning and development of teachers and school leaders. See how high performing countries successfully recruit and train educators. Understand why the sharing of expertise among teachers and administrators within and across schools is beneficial. A fascinating read for researchers, policymakers, administrators, teacher educators, pre-service teachers, and leaders, and anyone with an interest in education, this book offers a rare glimpse into the systems that are shaping quality teaching around the world.

Charter School City Douglas N. Harris, 2020-07-15 In the wake of the tragedy and destruction that came with Hurricane Katrina in 2005 public schools in New Orleans became part of an almost unthinkable experiment eliminating the traditional public education system and completely replacing it with charter schools and school choice Fifteen years later the results have been remarkable and the complex lessons learned should alter the way we think about American education New Orleans became the first US city ever to adopt a school system based on the principles of markets and economics When the state took over all of the city's public schools it turned them over to non profit charter school managers accountable under performance based contracts Students were no longer obligated to attend a specific school based upon their address allowing families to act like consumers and choose schools in any neighborhood The teacher union contract tenure and certification rules were eliminated giving schools autonomy and control to hire and fire as they pleased In Charter School City Douglas N Harris provides an inside look at how and why these reform decisions were made and offers many surprising findings from one of the most extensive and rigorous evaluations of a district school reform ever conducted Through close examination of the results Harris finds that this unprecedented experiment was a noteworthy success on almost every measurable student outcome But as Harris shows New Orleans was uniquely situated for these reforms to work well and that this market based reform still required some specific and active roles for government Letting free markets rule on their own without government involvement will not generate the kinds of changes their advocates suggest Combining the evidence from New Orleans with that from other cities Harris draws out the broader lessons of this unprecedented reform effort At a time when charter school debates are more based on ideology than data this book is a powerful evidence based and in depth look at how we can rethink the roles for governments markets and nonprofit organizations in education to ensure that America's schools fulfill their potential for all students
