## **High Risk Drinking In College:**

**High-Risk Drinking in College** Barry Leonard, 2003-06 College student drinking to excess especially a potentially dangerous practice often termed binge drinking is a widespread national problem with serious consequences Two out of five college students who engage in binge drinking risk a wide range of alcohol related consequences including grave injuries and death This volume contains two reports by the Task Force of the Nat Advisory Council on Alcohol Abuse and Alcoholism that address this problem 1 High Risk Drinking in College What We Know and What We Need to Learn Final Report of the Panel on Contexts and Consequences and 2 How to Reduce High Risk College Drinking Use Proven Strategies Fill Research Gaps Final Report of the Panel on Prevention and Treatment *High-risk Drinking in College*, 2002 This report represents the work of the Panel on Contexts and Consequences and is based on 12 commissioned peer reviewed papers by experts in the field and extensive discussion among panel members and the authors of the papers It focuses on what is known about drinking in college and its consequences and on gaps in knowledge that need further study **Clinical Protocols to Reduce High Risk Drinking in College Students** Michael F. Fleming, 2002 The college drinking prevention curriculum for health care providers is part of a national effort sponsored by the National Institute on Alcohol Abuse and Alcoholism NIAAA to reduce high risk drinking and alcohol related problems among college students The curriculum is divided into four teaching modules Each module is based on current evidence and research and includes the essential information every clinician should know about the prevention and treatment of college drinking problems Reducing the Risks for Substance Abuse Raymond P. Daugherty, 2013-03-08 Authors Raymond P Daugherty and Carl Leukefeld argue for replacing the youth based zero tolerance approach to substance abuse prevention that has been dominant in the field over the past two decades Their dynamic alternative is the Lifestyle Risk Reduction Model which revises standard prevention strategies to make them relevant throughout the entire life span Features of this revolutionary new paradigm include Five Principles of Lifestyle Risk Reduction LRR Five Conditions of Effective LRR and the LLR Formulas **Interventions for Addiction**, 2013-05-20 Interventions for Addiction examines a wide range of responses to addictive behaviors including psychosocial treatments pharmacological treatments provision of health care to addicted individuals prevention and public policy issues Its focus is on the practical application of information covered in the two previous volumes of the series Comprehensive Addictive Behaviors and Disorders Readers will find information on treatments beyond commonly used methods including Internet based and faith based therapies and criminal justice interventions The volume features extensive coverage of pharmacotherapies for each of the major drugs of abuse including disulfiram buprenorphine naltrexone and others as well as for behavioral addictions In considering public policy the book examines legislative efforts price controls and limits on advertising as well as World Health Organization WHO efforts Interventions for Addiction is one of three volumes comprising the 2 500 page series Comprehensive Addictive Behaviors and Disorders This series provides the most complete collection of current knowledge on

addictive behaviors and disorders to date In short it is the definitive reference work on addictions Includes descriptions of both psychosocial and pharmacological treatments Addresses health services research on attempts to increase the use of evidence based treatments in routine clinical practice Covers attempts to slow the progress of addictions through prevention programs and changes in public policy Binge Drinking on College Campuses ,1998 **How to Reduce High-risk College Drinking** National Institute on Alcohol Abuse and Alcoholism,National Institute on Alcohol Abuse and,2014-06-24 College student drinking to excess is a widespread national problem with serious consequences and it has been for a long time Although the factors that have made the problem so intractable are complex today based on scientific research results we have the potential to make real progress in controlling excessive drinking In fact a substantial body of research studies now offers direction on how to reduce excessive underage and high risk college drinking On the basis of this information colleges and universities communities and other interested organizations can take steps toward positive change more confidently Although significant information gaps remain the science based guidance now available means campuses and communities no longer have to reinvent the wheel when they try to address the problem It also enables us to avoid inadvertently perpetuating ineffective programs and approaches The availability of science based guidance is a significant step forward because lack of information about what works and what does not has been a major obstacle to progress On the research side high quality research has addressed only some of the issues of concern to college administrators and the practical implications of research results have not been widely disseminated On the institutional side most campus alcohol efforts have not been evaluated which has hindered the effectiveness of individual campus efforts and slowed the growth of the knowledge base from which all could learn Although the research base on college alcohol problems is limited the panel of college presidents students and alcohol research specialists that contributed to this report identified a number of effective strategies that colleges and universities could confidently use today These include strategies for changing the environment to discourage high risk drinking affecting the behavior of individuals and groups creating comprehensive college community efforts to combat the problem and adopting effective approaches for managing program implementation It is encouraging that many of these strategies require no new resources are modest in costs and can be accomplished by existing staff From its review of the scientific literature the Panel on Prevention and Treatment believes that adopting approaches with demonstrated effectiveness can begin to reduce high risk college drinking and continue to advance knowledge by filling critical research gaps The Panel recommends that the action steps and research needs described below receive priority attention from colleges and universities researchers the National Institute on Alcohol Abuse and Alcoholism NIAAA and other potential funders communities and interested organizations The Panel recommended more action steps in some areas than in others This is primarily due to the amount of research available Except as noted approaches that have not been included in the recommendations are not necessarily ineffective Often simply less is known about them Among the key research gaps

identified by the Panel is the need for rigorous testing of strategies now considered promising based on face value or common sense As researchers rise to this challenge the effectiveness of many of these approaches will become known

Dowdall, 2023-07-03 Drinking is recognized as one of the most important problems confronting students on campus today with major impacts on health and safety This book answers crucial questions about why students drink examines its complex links to campus crime and sexual assault and offers new insights on how to address the issue It differs from other studies of college drinking by dispelling the myth that the problem is universal Dowdall s research reveals that the incidence of alcohol abuse varies enormously between colleges and in doing so identifies interventions and policies that have been effective and those that have failed His study is also unique in looking upstream at the broader cultural organizational and social forces that shape this behavior where most studies focus only on downstream behaviors well after students have selected their college and have started drinking Students and parents can take action to lower the risk of binge drinking by following the book s recommendations and consulting the data it provides about alcohol violations and crime at thousands of colleges For administrators and student affairs personnel it both defines and illuminates the issue and outlines effective interventions      **Under The Influence: The Binge Drinking Epidemic On College Campuses...
