Hall, 2021-08-04 Bridges have always played an important role on the social and economic history of human development and Buckinghamshire has a great wealth of them Trade systems and road networks must solve the challenges of geography's waterways and bridges causeways fords and flood systems were necessarily a key aspect of the experience of historical travel Bridges and river crossings anchored the Buckinghamshire road network in the landscape and once established it proved remarkably durable Settlements villages and eventually cities have traditionally sprung up at bridgeheads or where a river could be crossed at any time of the year Some examples in Buckinghamshire are Newport Pagnell Buckingham and Cookham The most ancient vital and interesting architectural structures linked to use of these crossings are bridges and people hold a deep fascination for them There are literally thousands of bridges in

Buckinghamshire varying vastly in size style and materials Many are stone a few are wooden and there are numerous brick and more modern steel and concrete constructions Bridges in this book are more than 100 years old mostly lie on public roads or rights of way are publicly accessible and have a significant proportion of the original bridge intact Through photographs stories and historical facts this book looks at the wonderful historic bridges that make up the chronology of Buckinghamshire
