Class and Gender Yao Tang, 2016-02-29 During China s socio economic transition period stretching from 1978 to the present day the nation s social structure underwent enormous changes The economic restructuring from a centrally

planned economy to a market oriented one combined with the retreat of the state administrative sphere from the labour market gradually transformed the mechanisms of resource allocation This has given rise to enlarging gaps between different social groups which have led to an escalation in tensions between the higher and the lower social strata In addition the situation of Chinese women has also changed with those in contemporary China in a quite different position from their pre communist traditional counterparts Over recent decades more equalitarian policies have made a great deal of difference not only to women s self identification but also to their social milieu However the female employment rate has gradually declined since the economic reforms began meaning this period has had a major impact on the social status and conditions of Chinese women These social transformations and differences between the genders have provided an unusual opportunity for scholars and researchers who are interested in social change As such this book examines the social structure of contemporary China exploring how resources are distributed among the different social strata and how these strata have transformed with the economic reforms and development In addition it also investigates the current socio economic circumstances of Chinese women especially since many female workers were laid off xiagang by state owned enterprises SOEs and collectively owned enterprises COEs during the industrial restructuring In confronting an ever more competitive market environment has the situation of women degraded or progressed Do all women face a similar situation or are there discrepancies that exist amongst them What are the factors contributing to these divisions In discussing these questions this book allows readers to obtain a comprehensive understanding of the current Chinese social structure and how it has transformed as well as its influence on gender differentiation
