Institute of Social Anthropology, Thomas McCorkle, 1944 **Peasant Cooperation and Capitalist Expansion in Central Peru** Norman Long, Bryan R. Roberts, 2014-11-06 This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists The area studied the Mantaro Valley of central Peru is one of the most densely populated and economically differentiated of highland zones it is also notable for its community based forms of cooperation and its high level of peasant political activity The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development The case studies cover a range of political and economic topics from peasant movements to the achievements and shortcomings of government sponsored agricultural and manufacturing cooperatives The concluding chapter by the editors explores the theoretical implications of these studies Ecology and Ceramic Production in an Andean Community Dean E. Anthropology and Politics Joan Vincent,2022-08-16 In considering how anthropologists have chosen to look at and write about politics Joan Vincent contends that the anthropological study of politics is itself a historical process Intended not only as a representation but also as a reinterpretation her study arises from questioning accepted views and unexamined assumptions This wide ranging cross disciplinary work is a critical review of the anthropological study of politics in the English speaking world from 1879 to the present a counterpoint of text and context that describes for each of three eras both what anthropologists have said about politics and the national and international events that have shaped their interests and concerns It is also an account of how intellectual social and political conditions influenced the discipline by conditioning both anthropological inquiry and the avenues of research supported by universities and governments Finally it is a study of the politics of anthropology itself examining the survival of theses or schools of thought and the influence of certain individuals and departments **Social Science Perspectives on Managing Agricultural Technology** ,
